*The Radicalisation of Bradley Manning* - Tim Price 2014-03-10

Bradley Manning is the 24-year-old US soldier accused of the release of thousands of US embassy emails to Wikileaks. On Friday 16th

December 2011, his pre-trial hearing opened in Fort Meade in Maryland. Manning faces a maximum sentence of life in custody with no chance of parole. But just a few years ago, he was a teenager in west Wales. How does his story impact on the people he left behind, and who is responsible for his 'radicalisation'? The *Radicalisation of Bradley Manning* aims to place him in the pantheon of great Welsh radicals, from the Chartists to Aneurin Beva. This young soldier, who names the president of the United States as a defence witness, knows bus timetables around Haverfordwest. This young man who played a part in the Arab spring, knows the trials of schoolboy rugby. This young soldier who apparently chose his moral code over his military one, speaks rudimentary Welsh. Tim Price's trademark humanity, warmth and wit depicts a complex portrait of Manning as a modern-day, troubled and flawed martyr, but a martyr nonetheless.

**Teaching STEM in the Secondary School -**

Frank Banks 2020-12-30

This book looks at the purpose and pedagogy of STEM teaching and explores the ways in which STEM subjects can interact in the curriculum to enhance student understanding, achievement and motivation. By reaching outside their own classroom, teachers can collaborate across STEM subjects to enrich learning and help students relate school science, technology and maths to the wider world. Packed with ideas and practical details for teachers of STEM subjects, the new revised edition of this book: ■ considers what the STEM subjects contribute separately to the curriculum and how they relate to each other in the wider education of secondary school students; ■ describes and evaluates different curriculum models for STEM; ■ suggests ways in which a critical approach to the pedagogy of the classroom, laboratory and workshop can support and encourage all pupils to engage fully in STEM; ■ addresses the practicalities of introducing, organising and sustaining STEM-

related activities in the secondary school; ■ looks to ways schools can manage and sustain STEM approaches in the long-term. This new revised edition is essential reading for trainee and practising teachers, those engaged in further professional development and all who wish to make the learning of science, technology, engineering and mathematics an interesting, motivating and exciting experience for their students.

Weber's Rationalism and Modern Society -  
2015-04-08

Weber's Rationalism and Modern Society rediscovers Max Weber for the twenty-first century. Tony and Dagmar Waters' translation of Weber's works highlights his contributions to the social sciences and politics, credited with highlighting concepts such as "iron cage," "bureaucracy," "bureaucratization," "rationalization," "charisma," and the role of the "work ethic" in ordering modern labor markets. Outlining the relationship between community

(Gemeinschaft), and market society (Gesellschaft), the issues of social stratification, power, politics, and modernity resonate just as loudly today as they did for Weber during the early twentieth century.

*Journalism, fake news & disinformation* - Ireton, Cherilyn 2018-09-17

*Introduction to Documentary, Second Edition* - Bill Nichols 2010-12-07

This new edition of Bill Nichols's bestselling text provides an up-to-date introduction to the most important issues in documentary history and criticism. Designed for students in any field that makes use of visual evidence and persuasive strategies, *Introduction to Documentary* identifies the distinguishing qualities of documentary and teaches the viewer how to read documentary film. Each chapter takes up a discrete question, from "How did documentary filmmaking get started?" to "Why are ethical issues central to documentary filmmaking?"

Carefully revised to take account of new work and trends, this volume includes information on more than 100 documentaries released since the first edition, an expanded treatment of the six documentary modes, new still images, and a greatly expanded list of distributors.

**What Should Schools Teach?** - Alka Sehgal Cuthbert 2021-01-07

The design of school curriculums involves deep thought about the nature of knowledge and its value to learners and society. It is a serious responsibility that raises a number of questions. What is knowledge for? What knowledge is important for children to learn? How do we decide what knowledge matters in each school subject? And how far should the knowledge we teach in school be related to academic disciplinary knowledge? These and many other questions are taken up in *What Should Schools Teach?* The blurring of distinctions between pedagogy and curriculum, and between experience and knowledge, has served up a

confusing message for teachers about the part that each plays in the education of children. Schools teach through subjects, but there is little consensus about what constitutes a subject and what they are for. This book aims to dispel confusion through a robust rationale for what schools should teach that offers key understanding to teachers of the relationship between knowledge (what to teach) and their own pedagogy (how to teach), and how both need to be informed by values of intellectual freedom and autonomy. This second edition includes new chapters on Chemistry, Drama, Music and Religious Education, and an updated chapter on Biology. A revised introduction reflects on emerging discourse around decolonizing the curriculum, and on the relationship between the knowledge that children encounter at school and in their homes. *Good Practice In Science Teaching: What Research Has To Say* - Osborne, Jonathan 2010-05-01

This volume provides a summary of the findings that educational research has to offer on good practice in school science teaching. It offers an overview of scholarship and research in the field, and introduces the ideas and evidence that guide it.

**The International status of education about the Holocaust** - Carrier, Peter 2015-01-14

How do schools worldwide treat the Holocaust as a subject? In which countries does the Holocaust form part of classroom teaching? Are representations of the Holocaust always accurate, balanced and unprejudiced in curricula and textbooks? This study, carried out by UNESCO and the Georg Eckert Institute for International Textbook Research, compares for the first time representations of the Holocaust in school textbooks and national curricula. Drawing on data which includes countries in which there

exists no or little information about representations of the Holocaust, the study shows where the Holocaust is established in official guidelines, and contains a close textbook study, focusing on the comprehensiveness and accuracy of representations and historical narratives. The book highlights evolving practices worldwide and thus provides education stakeholders with comprehensive documentation about current trends in curricula directives and textbook representations of the Holocaust. It further formulates recommendations that will help policy-makers provide the educational means by which pupils may develop Holocaust literacy.

**Love and Information** - Caryl Churchill 2013  
"Caryl Churchill is a dramatist who must surely be amongst the best half-dozen now writing? a playwright of genuine audacity and assurance, able to use her considerable wit and intelligence in ways at once unusual, resonant and dramatically riveting."?Benedict Nightingale

From Love and Information: SEX What sex evolved to do is get information from two sets of genes so you get offspring that's not identical to you. Otherwise you just keep getting the same thing over and over again like hydra or starfish. So sex essentially is information. You don't think that while we're doing it do you? It doesn't hurt to know it. Information and also love. If you're lucky. In this fast-moving kaleidoscope, more than one hundred characters try to make sense of what they know. Declared "the greatest living English playwright" by Tony Kushner, Caryl Churchill will premiere this latest work at London's Royal Court in fall 2012. Caryl Churchill is one of the most influential playwrights of our time. She is the author of more than twenty plays, including Seven Jewish Children, Drunk Enough to Say I Love You, Top Girls, This is a Chair, Far Away, A Number, Cloud Nine, and Serious Money.

**War Horse** - Nick Stafford 2009

This moving story, based on the novel by National Curriculum recommended author Michael Morpurgo and adapted for the stage by Nick Stafford, is an incredibly moving portrayal of the bond between a soldier and his horse in the deadly chaos of the First World War. Sold to the army in 1914 and separated from his beloved young master Albert, farm horse Joey is thrust into the midst of the Western Front. Albert vows to follow Joey to war and to be reunited with his friend, but will they find one another?

Chimerica - Lucy Kirkwood 2013

The smash-hit play about international relations and the shifting balance of power between East and West.

## **Genre and Hollywood** - Steve Neale

2005-06-20

Genre and Hollywood provides a comprehensive introduction to the study of genre. In this important new book, Steve Neale discusses all the major concepts, theories and accounts of Hollywood and genre, as well as the key genres which theorists have written about, from horror to the Western. He also puts forward new arguments about the importance of genre in understanding Hollywood cinema. Neale takes issue with much genre criticism and genre theory, which has provided only a partial and misleading account of Hollywood's output. He calls for broader and more flexible conceptions of genre and genres, for more attention to be paid to the discourses and practices of Hollywood itself, for the nature and range of Hollywood's films to be looked at in more detail, and for any assessment of the social and cultural significance of Hollywood's genres to take account of industrial factors. In detailed,

revisionist accounts of two major genres - film noir and melodrama - Neale argues that genre remains an important and productive means of thinking about both New and old Hollywood, its history, its audiences and its films.

*DNA* - Dennis Kelly 2021-05-20  
Dennis Kelly's play *DNA* centres on friendship, morality and responsibility in odd circumstances. When a group of young friends are faced with a terrible accident, they deliberately make the wrong choices to cover it up and find themselves in an unusually binding friendship where no one will own up to what they've done. The play began life as a National Theatre Connections commission in 2008 and has subsequently been produced, studied and toured around the world. *DNA* is published for the first time in the Methuen Drama Student Edition series with commentary and notes by Clare Finburgh Delijani, which look at the play's context, themes, dramatic form, staging possibilities and production history, plus offers suggestions for further reading.

### **Hindu Bioethics for the Twenty-first**

**Century** - S. Cromwell Crawford 2003-10-23

Explores contemporary controversies in bioethics from a Hindu perspective. S. Cromwell Crawford breaks new ground in this provocative study of Hindu bioethics in a Western setting. He provides a new moral and philosophical perspective on fascinating and controversial bioethical issues that are routinely in the news: cloning, genetic engineering, the human genome project, reproductive technologies, the end of life, and many more. This Hindu perspective is particularly noteworthy because of India's own indigenous medical system, which is stronger than ever and drawing continued interest from the West. The Hindu bioethics presented in this book are philosophically pluralistic and ethically contextual, giving them that conceptual flexibility which is often missing in Western religions, but which is demanded by the twenty-first century's complex moral problems. Comprehensive in scope and passionate in nature, Crawford's study is an important

resource for analyses of practical ethics, bioethics, and health care.

Deployment of Deep Decarbonization Technologies - National Academies of Sciences, Engineering, and Medicine 2020-01-31

While progress has been made in the development of decarbonization technologies, much work remains in scale-up and deployment. For decarbonization technologies to reach meaningful scale, real-world constraints, societal, economic, and political, must be considered. To identify the primary challenges and opportunities to deploying decarbonization technologies at scale across major sectors of the U.S. economy, the Board on Energy and Environmental Systems of the National

Academies of Sciences, Engineering, and Medicine convened a workshop on July 22-23, 2019. In addition to technology-specific and sector-specific studies, the workshop considered the types of societal transformations required, as well as potential policy drivers for carbon dioxide emissions reductions. This publication summarizes the presentations and discussion of the workshop.
