The Last Bastion of Racism? - John Coxhead 2007

This book deals with prejudice, specifically the neglected area of prejudice towards Romany Gypsies and Irish Travellers. It describes a problem-solving approach at both practitioner and strategic levels that can overcome prejudice in many of its forms and help achieve greater social justice. John Coxhead has drawn on his extensive research with practitioners, strategic workers and the communities to highlight the issues for and about Travellers. He provides an analytical but practical approach that is also a toolkit for those working in public services to improve service delivery. As the definitive text for understanding the approaches and strategies by which prejudice towards a certain community can be effectively tackled, the book will be indispensable to practitioners in public services, particularly criminal justice and policing. It will also interest sociologists and the communities themselves.

The Discursive Construction of European Identities - Michał Krzyżanowski 2010

This book looks at the discursive construction of European identities in a variety of institutional and non-institutional contexts and through a variety of social and political actors. Its multilevel and interdisciplinary approach - rooted in the Discourse-Historical tradition of Critical Discourse Analysis - allows for a comparison of identity constructions at different levels of Europe's social and political organisation and in different modes of communication. The book analyses discourses as diverse as those of the EU politicians, of Europe's national media as well as of migrants living in Europe. It offers a set of integrated models and analytical procedures which bring to the fore the inherent dynamism and complexity of both 'bottom-up' and 'top-down' European identity constructions.

Romanian Literature as World Literature - Mircea Martin 2017-12-28

Approaching Romanian literature as world literature, this book is a critical-theoretical manifesto that places its object at the crossroads of empires, regions, and influences and draws conclusions whose relevance extends beyond the Romanian, Romance, and East European cultural systems. This "intersectional" revisiting of Romanian literature is organized into three parts. Opening with a fresh look at the literary ideology of Romania's "national poet," Mihai Eminescu, part I dwells primarily on literary-cultural history as process and discipline. Here, the focus is on cross-cultural mimesis, the role of strategic imitation in the production of a distinct literature in modern Romania, and the shortcomings marking traditional literary historiography's handling of these issues. Part II examines the ethno-linguistic and territorial complexity of Romanian literatures or "Romanian literature in the plural." Part III takes up the trans-systemic rise of Romanian, Jewish Romanian, and Romanian-European avant-garde and modernism, Socialist Realism, exile and migr literature, and translation.

Imperial Rule - Alekse? I. Miller 2004-01-01

Renowned academics compare major features of imperial rule in the 19th century, reflecting a significant shift away from nationalism and toward empires in the studies of state building. The book responds to the current interest in multi-unit formations, such as the European Union and the expanded outreach of the United States. National historical narratives have systematically marginalized imperial dimensions, yet empires play an important role. This book examines the methods discerned in the creation of the Habsburg Monarchy, the Ottoman Empire, the Hohenzollern rule and Imperial Russia. It inspects the respective imperial elites in these empires, and it details the role of nations, religions and ideologies in the legitimacy of empire building, bringing the Spanish Empire into the analysis. The final part of the book focuses on modern empires, such as the German "Reich." The essays suggest that empires were more adaptive and resilient to change than is commonly thought.

In this, her most successful collection of poetry, Christi strikes the reader by her seraphic serenity, inspired, as she confesses, by Fra Angelico's mural paintings. In naturally flowing lines, full of a sober inner musicality, that support a painful and clear vision of life, the often inimical gods slowly turn into God, the all-pacifying.

English in Europe - Manfred Görlach 2002-05-23

English in Europe charts the English invasion of Europe since 1945. Sixteen distinguished European scholars report on the English words and phrases that have become integral parts of their languages. Each describes the effect of English on the host language, and shows how the process of incorporation often modifies pronunciation and spelling and

frequently transforms meaning and use. The languages surveyed are Icelandic, Dutch, French, Spanish, Norwegian, German, Italian, Romanian, Polish, Croatian, Finnish, Albanian, Russian, Bulgarian, Hungarian, and Greek. The book is designed as a companion to A Dictionary of European Anglicisms but may be read as an independent work. This is the first systematic survey of a phenomenon that is fascinating, alarming, and apparently unstoppable.

The Digitalization of the 21st Century Supply Chain - Stuart M. Rosenberg 2020-11-09

The goal of this book is to gain a clear picture of the current status and future challenges with regard to the digitalization of the supply chain - from the perspective of the suppliers, the manufacturers, and the customers. They were the target groups of the book. Digitization has touched upon all aspects of businesses, including supply chains. Technologies such as RFID, GPS, and sensors have enabled organizations to transform their existing hybrid (combination of paper-based and IT-supported processes) supply chain structures into more flexible, open, agile, and collaborative digital models. Unlike hybrid supply chain models, which have resulted in rigid organizational structures, unobtainable data, and disjointed relationships with partners, digital supply chains enable business process automation, organizational flexibility, and digital management of corporate assets. In order to reap maximum benefits from digital supply chain models, it is important that companies internalize it as an integral part of the overall business model and organizational structure. Localized disconnected projects and silo-based operations pose a serious threat to competitiveness in an increasingly digital world. The technologies discussed in this text - artificial intelligence, 3D printing, Internet of things, etc. - are beginning to come together to help digitize, automate, integrate, and improve the global supply chains. It's certainly an exciting and challenging time for both new supply chain professionals and long-time supply chain professionals.

Solar Resources - Roland L. Hulstrom 1989

Solar Resources takes stock of the resource - sunlight - on which any plan for solar heat conversion technologies must be based. It describes the evolution of theoretical models, algorithms, and equipment for measuring, analyzing, and predicting the quantity and composition of solar radiation, and it reviews and directs readers to insolation databases and other references that have been compiled since 1975. Following an overview of solar energy research by the editor, Raymond J. Bahm presents a comprehensive guide to available insolation databases and other information resources in the United States. Charles M. Randall and Richard Bird discuss the theoretical models and algorithms used to characterize the transference of solar radiation through the earth's atmosphere. Their chapter also addresses the important question of the accuracy of the data sets produced by the various modeling methods and algorithms. The National Weather Service (NWS) monitoring network and other major monitoring networks in the United States are discussed by Kirby Hanson and Thomas Stoffel. And Eugene Zerlaut covers the instrumentation used to measure total solar irradiance and spectral solar irradiance; he describes types of equipment, their manufacturers, procedures for calibration, and the accuracy of the data produced. Richard Bird and Carol Riordan explain the nature of spectral solar irradiance at the earth's surface, and John Jensenius describes the NWS Operational Solar Insolation Forecast System, which predicts the daily total global-horizontal insolation for two days. In the concluding chapter, Claude Robbins summarizes daylighting models and resources, and details methods for converting insolation data to illuminance data. Solar Resources is volume 2 in the series Solar Heat Technologies: Fundamentals and Applications, edited by Charles A. Bankston

Becoming Myself - Irvin D. Yalom 2017-10-03

Bestselling writer and psychotherapist Irvin D. Yalom puts himself on the couch in a lapidary memoir Irvin D. Yalom has made a career of investigating the lives of others. In this profound memoir, he turns his writing and his therapeutic eye on himself. He opens his story with a nightmare: He is twelve, and is riding his bike past the home of an acne-scarred girl. Like every morning, he calls out, hoping to befriend her, "Hello Measles!" But in his dream, the girl's father makes Yalom understand that his daily greeting had hurt her. For Yalom, this was the birth of empathy; he would not forget the lesson. As *Becoming Myself* unfolds, we see the birth of the insightful thinker whose books have been a beacon to so many. This is not simply a man's life story, Yalom's reflections on his life and development are an invitation for us to reflect on the origins of our own selves and the meanings of our lives.

EU Mediation Law and Practice - Giuseppe De Palo 2012-10-04

A practical reference on the EU rules and international initiatives that impact directly on EU cross-border disputes, this handbook is a must-have for any practitioner of cross-border mediation. The EU Mediation Directive 2008/52/EC laid down obligations on EU Member States to encourage quality of mediators and providers across specific compliance considerations, including codes of conduct and training, court referral, enforceability of mediated settlements, confidentiality of mediation, the effect of mediation on limitation periods, and encouraging public information. The book is organized into clear and consistent themes, structured and numbered in a common format to provide easily accessible provisions and commentary across the essential considerations of the Directive. All EU countries which have complied, along with Denmark (which opted out of implementing the Directive), or attempted to comply, with the Directive are included, allowing straightforward comparison of key issues across the different countries in this important and evolving area. Supplementary points of practical use, such as statistics on the success rates of mediation and advice on the requirements for parties to participate in mediation, and for parties and lawyers to consider mediation, add further value to the jurisdiction-specific commentary. A comparative table of the mediation laws forms an invaluable quick-reference appendix for an overview and comparison of the information of each jurisdiction, together with English translations of each country's mediation law or legislative provisions. Address this dynamic area of law with the benefit of guidance across all elements of the Directive impacting practice, provided by respected and experienced editors from the knowledgeable European authority in mediation, ADR Center, along with a host of expert contributors.

Scientific Elite -

Scientific Elite is about Nobel prize winners and the well-defined stratification system in twentieth-century science. It tracks the careers of all American laureates who won prizes from 1907 until 1972, examining the complex interplay of merit and privilege at each stage of their scientific lives and the creation of the ultra-elite in science. The study draws on biographical and bibliographical data on laureates who did their prize-winning research in the United States, and on detailed interviews with forty-one of the fifty-six laureates living in the United States at the time the study was done. Zuckerman finds laureates being successively advantaged as time passes. These advantages are producing growing disparities between the elite and other scientists both in performance and in rewards, which create and maintain a sharply graded stratification system.

Manual of Deixis in Romance Languages - Konstanze Jungbluth 2015-10-16

Deixis as a field of research has generated increased interest in recent years. It is crucial for a number of different subdisciplines: pragmatics, semantics, cognitive and contrastive linguistics, to name just a few. The subject is of particular interest to experts and students, philosophers, teachers, philologists, and psychologists interested in the study of their language or in comparing linguistic structures. The different deictic structures - not only the items themselves, but also the oppositions between them - reflect the fact that neither the notions of space, time, person nor our use of them are identical cross-culturally. This diversity is not restricted to the difference between languages, but also appears among related dialects and language varieties. This volume will provide an overview of the field, focusing on Romance languages, but also reaching beyond this perspective. Chapters on diachronic developments (language change), comparisons with other (non-)European languages, and on interfaces with neighboring fields of interest are also included. The editors and authors hope that readers, regardless of their familiarity with Romance languages, will gain new insights into deixis in general, and into the similarities and differences among deictic structures used in the languages of the world.

Images of English - Richard W. Bailey 2009-03-19

Images of English was the first book to focus exclusively on opinions about the language as they have evolved through time. Through the use

of abundant quotations, Richard Bailey lets voices from the past speak to our present assumptions and challenges the notion of English triumphalism throughout the world and the ages. The book offers a unique historical perspective on attitudes towards the language. We see that journalists who fill anxious columns on slow news-days with fulminations on linguistic deterioration are embellishing centuries of complaint; that women who campaign for a language free of patriarchy and suited to themselves express a yearning first conveyed long ago; that teachers who recommend the vigour of Anglo-Saxon words are sustaining an idea that emerged four hundred years ago in notions about racial purity.

Thus, the phenomenon "Fake News" understood as propaganda, lies, disinformation and fake factory stories are serious threats to our democracies. The Nordic Council of Ministers urges for finding ways to meet this challenge and is launching a booklet to create a debate on how to counter fakes and build trust in words and facts. The booklet is based upon results from a meeting in September 2017 of a high-level group of key experts on the topic and in particular from four experts contributing by focusing on media and information literacy, ethical standards and quality journalism to be among the best tools to counter fakes. This booklet will be launched at the UNESCO World Press Freedom Day 2018 in Accra asking for international feedback on its recommendations.

Teaching journalism for sustainable development - Banda, Fackson (UNESCO) 2015-09-21

Journalism and Democracy - Brian McNair 2012-10-12

The public sphere is said to be in crisis. Dumbing down, tabloidisation, infotainment and spin are alleged to contaminate it, adversely affecting the quality of political journalism and of democracy itself. There is a pervasive pessimism about the relationship between the media and democracy, and widespread concern for the future of the political process. Journalism and Democracy challenges this orthodoxy, arguing instead for an alternative, more optimistic evaluation of the contemporary public sphere and its contribution to the political process. Brian McNair argues not only that the quantity of political information in mass circulation has expanded hugely in the late twentieth century, but that political journalism has become steadily more rigorous and effective in its criticism of elites, more accessible to the public, and more thorough in its coverage of the political process. Journalism and Democracy combines textual analysis and extensive in-depth interviews with political journalists, editors, presenters and documentary makers. In separate chapters devoted to the political news agenda, the political interview, punditry, public access media and spin doctoring, McNair considers whether dumbing down is a genuinely new trend in political journalism, or a kind of moral panic, provoked by suspicion of mass involvement in culture.

Clitics in Phonology, Morphology and Syntax - Birgit Gerlach 2001-02-01

This book contains fourteen articles that reflect current ideas on the phonology, morphology, and syntax of clitics. It covers the forms and functions of clitics in various typologically diverse languages and presents data from, e.g. European Portuguese, Macedonian, and Yoruba. It extensively deals with the prosodic structure of clitics, their morphological status, clitic placement, and clitic doubling. The form and behavior of clitics with respect to tonal phenomena and in verse are discussed in two articles (Akinlabi & Liberman, Reindl & Franks). Other articles address the prosodic representation of clitics in Irish (Green), the differences in the acquisition of clitics and strong pronouns in Catalan (Escobar & Gavarro), the similarities between clitics and affixes or words in Romance and Bantu languages (Cocchi, Crysmann, Monachesi, Ortman & Popescu), the semantics of clitics in the Greek DP and in Spanish doubling (Alexiadou & Stavrou, Uriagereka), and complex problems concerning verbal clitics in Romanian and Balkan languages (Legendre, Spencer, Tomic).

Popasuri scriitoricești este o serie antologică dedicată scriitorilor care s-au născut în spațiul geografic al Oltului, sunt sau au fost trăitori în acest areal ori au alte legături cu râurile Olt și Olteț, plaiuri natale ale antologatorului.
