I don't have anything extraordinary. I am the typical guy that no one pays attention to because he's so discreet. I wasn't blessed with an amazing physique, nor am I endowed with an above average intelligence. I am just a regular guy, admittedly with a painful past, but a regular guy nonetheless. I don't possess any special talents; yet, I am able to return consistent profits, year after year, in an endeavor where most people fail. My name is Yvan Byeajee, I am a trader. Not the kind you see in the movies - those who partake in lavish lifestyles; snort lines of coke off of some hooker's behind; or threaten the very health of our economy - no, I am more modest than that. And I have my reasons. Durable success in the markets is the only logical outcome of the kind of consistency you cultivate in your day-to-day life. Furthermore, it is a function of your ability to tame that voice in your head that is constantly nagging at you and forcing you to make poor decisions, whether in the markets or in your personal life. After having lost everything in the markets because of my inability to calm that inner voice, I knew I had to make some changes. Eventually, I stumbled upon an effective way to calm the zoo that is my mind, something I always assumed to be either impossible or useless. For the price of a cocktail, in this short book, you will learn the

secret to my success in the markets! I will show you the one exercise that I think all traders should be doing on a daily basis. This exercise has not only changed my trading, but it has also changed my life - and I am confident it can change yours as well! *Wyckoff 2.0: Structures, Volume Profile and Order Flow* - Rubén Villahermosa 2021-02-04

**CAPS LOCK: How Capitalism Took Hold of Graphic Design, and How to Escape from It** - Ruben Pater 2021-09-21

Capitalism could not exist without the coins, banknotes, documents, information graphics, interfaces, branding, and advertisements made by graphic designers. Even anti-consumerist strategies such as social design and speculative design are appropriated to serve economic growth. It seems design is locked in a cycle of exploitation and extraction, furthering inequality and environmental collapse. CAPS LOCK uses clear language and visual examples to show how graphic design and capitalism are inextricably linked. The book features designed objects and also examines how the study, work, and professional practice of designers support the market economy. Six radical design cooperatives are featured that resist capitalist thinking in their own way, hoping to inspire a more socially aware graphic design.

Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**Unholy Grails** - Nick Radge 2012-03-05

What's the fastest way to lose money? Follow the herd. Nick Radge stopped following the herd many years ago. As a trader and stock broker, Nick learnt to recognise what the herd were doing and how they react to financial information. He also realised that it made no sense. Are you one of the herd? Here's a test: If a stock's price is falling do you think it represents good value, i.e. it's cheap? OneTel and HIH were not cheap when they eventually delisted in 2001. ABC Learning was not cheap when it delisted in 2008. How about Bear Sterns, Lehman Brothers, Trump Entertainment or Kodak? Billabong does not look cheap at the moment! A stock price in motion tends to stay in motion;

Unholy Grails will show you how to be on the positive side of this statement. Nick Radge is focused on momentum investing; purchasing stocks that are trending up. Nick shows you how to hitch a ride on stocks in an uptrend or protect your capital during sustained bear markets. Unholy Grails goes against almost everything your stock broker, financial planner and your fund manager will ever tell you. Considering that in 2008 capital managed by fund managers dropped up to 50% we are in desperate need of an alternative way of thinking. In Unholy Grails, Nick Radge details a road less travelled; a compilation of practical strategies for investors looking for long term gains with minimum daily effort. "I am shocked that so many Mum and Dad investors were financially and emotionally battered during the GFC. The financial planners and fund managers they were relying on for advice gave them no advice: just the same old 'buy and hold' strategy that simply does not work in a collapsing market. In Unholy Grails I define specific strategies for investors, allowing them to manage their own investments and stop paying fees to financial planners and advisors," said the author, Nick Radge. Whether investing for your retirement or using an active investment strategy to manage your personal wealth, Nick Radge examines and tests numerous investment strategies to help determine the right one for you. Don't expect the same old, worn out advice from Nick Radge. His latest book is not called Unholy Grails for nothing!

Way of the Turtle: The Secret Methods that Turned Ordinary People into Legendary Traders - Curtis Faith 2007-03-30

"We're going to raise traders just like they raise turtles in Singapore." So trading guru Richard Dennis reportedly said to his long-time friend William Eckhardt nearly 25 years ago. What started as a bet about whether great traders were born or made became a legendary trading experiment that, until now, has never been told in its entirety. Way of the Turtle reveals, for the first time, the reasons for the success of the secretive trading system

used by the group known as the "Turtles." Top-earning Turtle Curtis Faith lays bare the entire experiment, explaining how it was possible for Dennis and Eckhardt to recruit 23 ordinary people from all walks of life and train them to be extraordinary traders in just two weeks. Only nineteen years old at the time-the youngest Turtle by far-Faith traded the largest account, making more than \$30 million in just over four years. He takes you behind the scenes of the Turtle selection process and behind closed doors where the Turtles learned the lucrative trading strategies that enabled them to earn an average return of over 80 percent per year and profits of more than \$100 million. You'll discover How the Turtles made money-the principles that guided their trading and the step-by-step methods they followed Why, even though they used the same approach, some Turtles were more successful than others How to look beyond the rules as the Turtles implemented them to find core strategies that work for any tradable market How to apply the Turtle Way to your own trades-and in your own life Ways to diversify your trading and limit your exposure to risk Offering his unique perspective on the experience, Faith explains why the Turtle Way works in modern markets, and shares hard-earned wisdom on taking risks, choosing your own path, and learning from your mistakes.

*Sentiment in the Forex Market* - Jamie Saettele 2012-06-29  
Crowds move markets and at major market turning points, the crowds are almost always wrong. When crowd sentiment is overwhelmingly positive or overwhelmingly negative ? it's a signal that the trend is exhausted and the market is ready to move powerfully in the opposite direction. Sentiment has long been a tool used by equity, futures, and options traders. In *Sentiment in the Forex Market*, FXCM analyst Jaime Saettele applies sentiment analysis to the currency market, using both traditional and new sentiment indicators, including: Commitment of Traders reports; time cycles; pivot points; oscillators; and Fibonacci time and price ratios. He also explains how to interpret news coverage of the markets to get a sense of when participants have become overly bullish or bearish. Saettele points out that several famous traders such as George Soros and Robert Prechter

made huge profits by identifying shifts in crowd sentiment at major market turning points. Many individual traders lose money in the currency market, Saettele asserts, because they are too short-term oriented and trade impulsively. He believes retail traders would be much more successful if they adopted a longer-term, contrarian approach, utilizing sentiment indicators to position themselves at the beginning points of major trends.
