Logic Design and Verification Using SystemVerilog (Revised) - Donald Thomas 2016-03-01

SystemVerilog is a Hardware Description Language that enables designers to work at the higher levels of logic design abstractions that match the increased complexity of current day integrated circuit and field-programmable gate array (FPGA) designs. The majority of the book assumes a basic background in logic design and software programming concepts. It is directed at: * students currently in an introductory logic design course that also teaches SystemVerilog, * designers who want to update their skills from Verilog or VHDL, and * students in VLSI design and advanced logic design courses that include verification as well as design topics. The book starts with a tutorial introduction on hardware description languages and simulation. It proceeds to the register-transfer design topics of combinational and finite state machine (FSM) design - these mirror the topics of introductory logic design courses. The book covers the design of FSM-datapath designs and their interfaces, including SystemVerilog interfaces. Then it covers the more advanced topics of writing testbenches including using assertions and functional coverage. A comprehensive index provides easy access to the book's topics. The goal of the book is to introduce the broad spectrum of features in the language in a way that complements introductory and advanced logic design and verification courses, and then provides a basis for further learning. Solutions to problems at the end of chapters, and text copies of the SystemVerilog examples are available from the author as described in the Preface.

International Business Law and Lex Mercatoria - Filip De Ly 1992

Traditionally, legal problems arising in connection with international business transactions had to be solved by a national law. This view was challenged in post war scholarly writing and transnational practice. It was argued that transnational rules (such as transnational contracts, general conditions, trade usages, general principles, uniform rules, arbitral cases) should be applied instead. Often, these transnational rules are referred to as lex mercatoria. This volume analyzes the different legal approaches to international business problems (including the theory of lex mercatoria) as well as their implications for international practice. As

such, the relevance and importance of substantive law and conflict of laws and of national, international and transnational rules are discussed both with regard to their application by national courts and by international commercial arbitrators.

The Albanian National Awakening - Stavro Skendi 2015-12-08

Professor Skendi, a native of Albania, traces the progress and setbacks of Albania's long struggle for national unity during this least-known period of its intricate history. He discusses the heritage of its people and examines in detail the developments that led to Albanian independence: national resistance to the decisions of the Congress of Berlin, later opposition to Turkey, and the struggle between the Albanians and the Young Turks. Consideration is given to such internal problems as geographic configuration, religious and political division, and to such external problems as Italo-Austrian rivalry, political interference from neighboring states, and the involvement of great powers. Originally published in 1967. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

The Sciences of the Soul - Fernando Vidal 2011-12-01

The Sciences of the Soul is the first attempt to explain the development of the disciplinary conception of psychology from its appearance in the late sixteenth century to its redefinition at the end of the seventeenth and its emergence as an institutionalized field in the eighteenth. Fernando Vidal traces this

development through university courses and textbooks, encyclopedias, and nonacademic books, as well as through various histories of psychology. Vidal reveals that psychology existed before the eighteenth century essentially as a "physics of the soul," and it belonged as much to natural philosophy as to Christian anthropology. It remained so until the eighteenth century, when the "science of the soul" became the "science of the mind." Vidal demonstrates that this Enlightenment refashioning took place within a Christian framework, and he explores how the preservation of the Christian idea of the soul was essential to the development of the science. Not only were most psychologists convinced that an empirical science of the soul was compatible with Christian faith; their perception that psychology preserved the soul also helped to elevate its rank as an empirical science. Broad-ranging and impeccably researched, this book will be of wide importance in the history and philosophy of psychology, the history of the human sciences more generally, and in the social and intellectual history of eighteenth-century Europe.

Transboundary Water Resources in the Balkans - Jacques Ganoulis 2012-12-06

A source of up-to-date information on current water resources, their quality and quantity, in every country in the Balkans. Institutional structures, water management issues and water monitoring problems are analyzed, with special reference to international waters, using characteristic case studies, including the Sava River, Lake Ohrid, The Nestos/Mesta River, the Neretva River estuary, and coastal waters in Turkey. Contributions written by experts from France, the UK and the USA demonstrate state-of-the-art electronic networking and the management of distributed water databases. The protection of water resources in the Balkans has become a high profile issue since the collapse of communism in the area, the break up of former Yugoslavia, and ethnic tensions in Kosovo. Transboundary river pollution and the development of international water basins call demand urgent regional co-operation, which will be facilitated by the International Network of Water-Environment Centres for the Balkans, the initiation of which is described in the final conclusions of the book.

Albania in Transition - Elez Biberaj 2019-08-28

In early 1997, Albania's transition to democracy suffered a serious setback when pyramid schemes sparked violent unrest, plunging the country into its worst political and economic crisis since the downfall of communism. The uprisings and subsequent elections, in which the Socialist Party won a landslide victory,

have made front-page news in the int

International Management - Arvind V. Phatak 2005

International Management: Managing in a Diverse and Dynamic Global Environment offers a modern perspective of international management rooted in a recognized framework. The framework follows the generally accepted course structure beginning with the macro-environment, then moves to the firm level, and concludes with the individual manager in the international setting. This traditional framework is embellished with modern chapters on collaborative strategies, managing technology and knowledge, and ethics and corporate social responsibility. Each chapter has several mini-case examples and full-length, comprehensive cases conclude each part.

Research Methodology in Applied Economics - Don E. Ethridge 2004-05-31

Focused attention on how to organize and conduct research can increase the efficiency of the research process and its outcomes. The second edition of Research Methodology in Applied Economics provides time-tested guidelines to instruct graduate students in the research process. Emphasizing research methodology as it applies to economics, Ethridge provides (1) an overview of the conceptual and philosophical basis of research methodology and (2) procedural guidelines on designing, coordinating, and conducting research projects. This textbook integrates philosophies, concepts, and procedures in research methodology, adding practical tips such as how to write a research proposal, how to apply for funding, and how to write reports that effectively present research. This edition updates and increases the use of relevant examples for today's students, faculty, and researchers

How All Teachers Can Support Citizenship and Human Rights Education - Peter Brett 2009-01-01

This publication sets out the core competences needed by teachers to put democratic citizenship and human rights into practice in the classroom, throughout the school and in the wider community. It is intended for all teachers, not only specialists but teachers in all subject areas, and teacher educators working in higher-education institutions or other settings, both in pre- and in-service training. Some 15 competences are presented and grouped into four clusters. Each cluster of competences corresponds to one chapter, within which the competences are described in detail and exemplified. The reader will find progression grids and suggested developmental activities for each competence: these grids, featuring focusing, developing, established and advanced practice, aim to help teachers and teacher educators determine the level to which their professional practice corresponds, and thus identify specific and practical improvements upon which they can focus.

Management of Unintended and Abnormal Pregnancy - Maureen Paul 2011-08-24

Access to high quality abortion care is essential to women's health, as evidenced by the dramatic decrease in pregnancy-related morbidity and mortality since the legalization of abortion in the United States, and by high rates of maternal death and complications in those countries where abortion is still provided under unsafe conditions. The past two decades have brought important advances in abortion care as well as increasing cross-disciplinary use of abortion technologies in women's health care. Abortion is an important option for pregnant women who have serious medical conditions or fetal abnormalities, and fetal reduction techniques are now well-integrated into infertility treatment to reduce the risks of multiple pregnancies resulting from assisted reproductive technologies. Management of Unintended and Abnormal Pregnancy: Comprehensive Abortion Care is the textbook of the National Abortion Federation, and serves as the standard, evidence-based reference text in abortion care. This state-of-the-art textbook provides a comprehensive overview of the public health implications of unsafe abortion and reviews the best surgical and medical practices for pregnancy termination, as well as managing ectopic and other abnormal pregnancies. Management of Unintended and Abnormal Pregnancy: Comprehensive Abortion Care is the leading source for a comprehensive understanding of issues related to unintended and abnormal pregnancy. This textbook: is authored by internationally-known leaders in women's health care; addresses unintended pregnancy and abortion from historical, legal, public health, clinical, and quality care

perspectives; includes chapters on pregnancy loss, ectopic pregnancy, gestational trophoblastic disease, and multifetal pregnancy reduction; covers treatment of pregnancies in the first and second trimester by both medical and surgical techniques; and provides resources for clinical, scientific, and social support for the abortion provider and patient.

Kanuni i Lekë Dukagjinit - Lekë Dukagjini 1989

"THE CODE OF LEKE DUKAGJINI is a great cultural treasure, comparable to the chapters of The Old Testament." "It provides deep insights into the ancient society of the Albanians, their somber dignity & their magnificent sense of honor."--David Binder, The New York Times. "This legal system was established & passed on to future generations as a common law by Leke Dukagjini, a co-fighter of the legendary Skenderbeg." "The 'Besa' or the 'word of honor' as stated in THE CODE OF LEKE DUKAGJINI which means peace & protection to those whom it is given, has become today an important fighting tool in the political struggle of Kosovo's Albanians against Serb oppression."--Victor Meier, The Frankfurter Allgemeine Zeitung. "The legal Code of the Albanians known by them for a thousand years, is one of the most original in the history of mankind. Among the basic pillars of this code are the equality of men before the code & the non-abuse of justice." "The entire essence of the legal code of the Albanians is an unparalleled rigorous respect for this basic principle: non-violation of the dignity of a man- his honor, home, & life."--Ismail Kadare, Albanian writer.

Accelerated Learning for the 21st Century - Colin Rose 2011-11-02

We live in an era when the unprecedented speed of change means: The only certainty is uncertainty; you can't predict what skills will be useful in ten years time; in most professions knowledge is doubling every two or three years; and no job is forever--so being employable means being flexible and retraining regularly. Accelerated Learning into the 21st Century contains a simple but proven plan that delivers the one key skill that every working person, every parent and student must master, and every teacher should teach: it's learning how to learn. The theory of eight multiple intelligences (linguistic, logical-mathematical, visual-spatial, kinesthetic, musical, interpersonal, intrapersonal, and naturalist) developed by Howard Gardner at Harvard University provides a foundation for the six-step MASTER-Mind system to facilitate learning (an acronym for Mind, Acquire, Search, Trigger, Exhibit, and Review), and is enhanced by the latest findings on the value of emotion and memory on the process of learning. Combined with motivational stories of success applying these principles, and putting forth a clear vision of how the United States can dramatically improve the education system to remain competitive in the next century, Accelerated Learning into the 21st Century is a dynamic tool for self-improvement by individuals as diverse as schoolchildren and corporate executives.
