The Robomobility Revolution of Urban Public Transport - Sylvie Mira-Bonnardel 2021-08-31

Over the past two decades, society has been witnessing how technological, political, and societal changes have been transforming individual and collective urban mobility. Driven both by newcomers and traditional players, by disruptive as well as incremental innovations, the main objective now is to enhance mobility and accessibility while, reducing vehicle ownership, congestion, road accidents, and pollution in cities. This transformation has been mainly enabled by the widespread adoption of internet-connected devices (e.g.: smartphones and tablets) and by the innovative business models, technologies, and use-cases that arose from this rapid digitalization, such as peer-to-peer, and two-sided markets providing several mobility schemes: car-sharing, car-pooling, bike sharing, free-floating (cars, bikes, electric scooter), ridesharing and ride hailing either for long distances as well as for urban and micro-mobility. The book presents - in a holistic perspective - how this revolution is happening and what are the major cornerstones for the implementation of robomobility. It aims at answering several substantial issues, such as: What is robomobility and what does it imply for the different stakeholders of the public transport ecosystem? How do policy makers integrate this innovation and how ready the regulations are? How do citizens take part in this transformation? What is the level of

user acceptance for this new type of mobility? What are its environmental impacts? What is the economic impact of deploying these shuttles in a local ecosystem?

Winning the Oil Endgame - 2004-01-01
Offers a coherent strategy for ending oil dependence, starting with the United States but applicable worldwide. There are many analyses of the oil problem. This synthesis is the first roadmap of the oil solution, one led by business for profit, not dictated by government for reasons of ideology. This roadmap is independent, peer-reviewed, written for business and military leaders, and co-funded by the Pentagon. It combines innovative technologies and new business models with uncommon public policies: market-oriented without taxes, innovation-driven without mandates, not dependent on major (if any) national legislation, and designed to support, not distort, business logic.

OGT Reading - Andrea J. Lapey 2005
OGT Exit Level Reading Workbook prepares students for the reading portion of the Ohio Graduation Test. Samples from similar tests provide plenty of practice and students learn to take multiple choice tests on their comprehension of what they read. Students learn to evaluate their own short answers to targeted questions, and learn from other students' responses to similar questions. This book is suitable for students in all states who need to take a reading exam for graduation or course completion.

Migration from the Middle East and North Africa to Europe - Michael Bommes 2014-08-05

One of the most important challenges concerning the future of the European Union is the demographic reproduction of the European population. Decreasing birth-rates and the retirement of the baby boomers will dramatically reduce the labour force in the EU, which will entail not only a lack of manpower but also lower contributions to European social systems. It seems clear that the EU will have to counterbalance this population decrease by immigration in the coming years. Migration Between the Middle East, North Africa and Europe takes this challenge as a point of departure for analysing the MENA region, in particular Morocco, Egypt and Turkey, as a possible source of future migration to the European Union. At the same time, it illustrates the uncertainties implied in such calculations, especially at a time of radical political changes, such as those brought about by the Arab Uprising.

Popular Protest, Political Opportunities, and Change in Africa - Edalina Rodrigues Sanches 2022

"This book offers a fresh analysis of third wave popular protests in Africa, shedding light on the complex dynamics between political change and

continuity in contemporary Africa. The book argues that protests are simultaneously products and generators of change in that they are triggered by micro-and-macrosocial changes, but they also have the capacity to transform the nature of politics. By examining the triggers, actors, political opportunities, resources and framing strategies, the contributors shed light onto tangible (e.g. policy implementation, liberal reforms, political alternation) and intangible (e.g. perceptions, imagination, awareness) forms of change elicited by protests. It reveals the relevant role of African protests as engines of democracy, accountability and collective knowledge. Bringing popular protests in authoritarian and democratic settings into discussion, this book will be of interest to scholars of African politics, democracy and protest movements"--

Social Welfare in Muslim Societies in Africa - Holger Weiss 2002

In recent decades there has been an increasing attempt by Muslim intellectuals to reflect on the provision of social welfare in Muslim societies in Africa. One reason for this is the few, if not non-existent, possibilities of the states to provide for the basic needs of their subjects, a situation that has become painfully evident in most African states not only the Muslim ones. However, public as well as private provision of social welfare is not a new phenomenon in the Muslim world. "This book deals with a most important and previously largely overlooked theme. In the current situation, when economically weak African states have great problems providing social amenities for their people, the welfare activities of Islamic -- and other -- non-governmental organizations have become especially important. This book provides a number of theoretically and, in particular, empirically interesting and valuable discussions on various kinds of Muslim social welfare in a number of

African countries." -- David Westerlund, Associate Professor, Faculty of Theology, Uppsala University, Sweden

Informal Transport in the Developing World - Robert Cervero 2000

Publics, Politics and Participation - Seteney Shami 2009

Though it is rarely explicitly articulated, many believe that there is no "public" in the Middle East. Scholarship on the Middle East and North Africa almost always engages with politics—a prominent focus of this region—yet the assumed absence of public spaces and fora has led many to think that debate, consensus, and concerted social action are antithetical to the cultural, religious, and national heritage of the region. It is a mistake to exclude the public dimension from the study of processes in this region. Recent studies have demonstrated not only the critical importance of the public in everyday practices of the MENA region, but they have also shown how the term and notion of the public sphere can be used productively to advance understandings of collective life. The first section of this volume offers alternative conceptions of the public sphere through rich and innovative theoretical analysis. Philosophical investigations focus on the role of collective action, the relationship between nationalism and democracy, and the notions of the public employed by socioreligious movements. The second section addresses a wide range of counter-hegemonic discourses and practices that enable the public sphere, such as memoirs, testimonies, strategies of surveillance, the Tehran bazaar, and the movements of migratory workers. The third section provides empirical accounts of the way in which mutual communication through technology has vitally expanded the notion of the public in the MENA region. In conclusion, conflict and resistance are shown to be generative forces in public discourse and debate and in the production of national publics.

Handbook of Unmanned Aerial Vehicles

- Kimon P. Valavanis 2014-08-29

The Handbook of Unmanned Aerial Vehicles is a reference text for the academic and research communities, industry, manufacturers, users,

practitioners, Federal Government, Federal and State Agencies, the private sector, as well as all organizations that are and will be using unmanned aircraft in a wide spectrum of applications. The Handbook covers all aspects of UAVs, from design to logistics and ethical issues. It is also targeting the young investigator, the future inventor and entrepreneur by providing an overview and detailed information of the state-of-the-art as well as useful new concepts that may lead to innovative research. The contents of the Handbook include material that addresses the needs and 'know how' of all of the above sectors targeting a very diverse audience. The Handbook offers a unique and comprehensive treatise of everything one needs to know about unmanned aircrafts, from conception to operation, from technologies to business activities, users, OEMs, reference sources, conferences, publications, professional societies, etc. It should serve as a Thesaurus, an indispensable part of the library for everyone involved in this area. For the first time, contributions by the world's top experts from academia, industry, government and the private sector, are brought together to provide unique perspectives on the current state-of-the-art in UAV, as well as future directions. The Handbook is intended for the expert/practitioner who seeks specific technical/business information, for the technically-oriented scientists and engineers, but also for the novice who wants to learn more about the status of UAV and UAV-related technologies. The Handbook is arranged in a user-friendly format, divided into main parts referring to: UAV Design Principles; UAV Fundamentals; UAV Sensors and Sensing Strategies; UAV Propulsion; UAV Control; UAV Communication Issues; UAV Architectures; UAV Health Management Issues; UAV Modeling, Simulation, Estimation and Identification; MAVs and Bio-Inspired UAVs; UAV Mission and Path Planning; UAV Autonomy; UAV Sense, Detect and Avoid Systems; Networked UAVs and UAV Swarms; UAV

Integration into the National Airspace; UAV-Human Interfaces and Decision Support Systems; Human Factors and Training; UAV Logistics Support; UAV Applications; Social and Ethical Implications; The Future of UAVs. Each part is written by internationally renowned authors who are authorities in their respective fields. The contents of the Handbook supports its unique character as a thorough and comprehensive reference book directed to a diverse audience of technologists, businesses, users and potential users, managers and decision makers, novices and experts, who seek a holistic volume of information that is not only a technical treatise but also a source for answers to several questions on UAV manufacturers, users, major players in UAV research, costs, training required and logistics issues.

Performance Drivers - Nils-Göran Olve 2001-05-08

A Practical Guide to Using the Balanced Scorecard performance drivers Nils-Göran Olve, Jan Roy and Magnus Wetter Since the groundbreaking work of Robert S. Kaplan and David P. Norton, the concept of the Balanced Scorecard has achieved increasing popularity in the business world. Previously, many organizations had built their business objectives around financial targets and goals that bore little relation to a long-term strategic vision. Typically, this leaves a gap between the development of a company's strategy and its implementation. The business scorecard, however, provides a more

'balanced view' by looking at not just-financial concerns, but also customers, internal business processes, and learning and growth. But it is not just a system of performance measurement - by focusing on future potential success it can be used as a dynamic management system that reinforces, implements and drives corporate strategy forward. In this book, the authors draw on their extensive experience with scorecard projects to provide a step-by-step method for introducing the Balanced Scorecard into an organization. This is done through the use of some of the most important practical examples in existence, with case studies from ABB, Coca Cola, Electrolux, British Telecom, Nat West, Skandia and Volvo. The desired strategic control system using scorecards that is presented focuses on creating and communicating a total comprehensive picture to all members of the organization from the top down, a long-term view of what the company's strategic objectives really are, how to make use of knowledge gained through experience and the required flexibility of such a system to cope with the fast-changing business environment. This book will provide senior and operational managers, consultants and business academics with a comprehensive view of emerging Balanced Scorecard practice supported by both business advice and a theoretical foundation. Reflections on the relations between the Balanced Scorecard and other areas, such as TQM, information systems and intellectual capital and knowledge management are also made. Business Strategy

An Introduction to Japanese Society - Yoshio Sugimoto 2010-06-22

Essential reading for students of Japanese society, An Introduction to Japanese Society now enters its third edition. Here, internationally renowned scholar, Yoshio Sugimoto, writes a sophisticated, yet highly readable and lucid text, using both English and Japanese sources to update and expand upon his original narrative. The book challenges the traditional notion that Japan comprises a uniform culture, and draws attention to its subcultural diversity and class competition. Covering all aspects of Japanese society, it includes chapters on class, geographical and generational variation, work, education, gender, minorities, popular culture and the establishment. This new edition features sections on: Japan's cultural capitalism; the decline of the conventional Japanese management model; the rise of the 'socially divided society' thesis; changes of government; the spread of manga, animation and Japan's popular culture overseas; and the expansion of civil society in Japan.

Industrial Clusters and Innovation Systems in Africa - Oyebanji

Oyelaran-Oyeyinka 2007

This book examines the incidence and role of clusters as a viable and increasingly important form of industrial organization in Africa. It presents a series of theoretically grounded case studies that analyze clusters in different industrial sectors and at different levels of economic development. The overall aim is to improve understanding of how local clusters can be transformed into local systems of innovation and how local clusters can be better connected to global actors. The authors draw out implications for policy and practice and provide guidance to governments, private sector associations, and non-governmental organizations.-- Publisher's description.

The Tongue and Quill - Air Force
2019-10-11

The Tongue and Quill has been a valued Air Force resource for decades and many Airmen from our Total Force of uniformed and civilian members have contributed their talents to various editions over the years. This revision is built upon the foundation of governing directives and user's inputs from the unit level all the way up to Headquarters Air Force. A small team of Total Force Airmen from the Air University, the United States Air Force Academy, Headquarters Air Education and Training Command (AETC), the Air Force Reserve Command (AFRC), Air National Guard (ANG), and Headquarters Air Force compiled inputs from the field and rebuilt The Tongue and Quill to meet the needs of today's Airmen. The team put many hours into this effort over a span of almost two years to improve the content, relevance, and organization of material throughout this handbook. As the final files go to press it is the desire of The Tongue and Quill team to say thank you to every Airman who assisted in making this edition better; you have our sincere appreciation!

Twelve Years A Slave (Illustrated) -
Solomon Northup 2014-08-22

Twelve Years a Slave (1853) is a memoir and slave narrative by Solomon Northup, as told to and edited by David Wilson. Northup, a black man who was born free in New York, details his kidnapping in Washington, D.C. and subsequent sale into slavery. After having been kept in bondage for 12 years in Louisiana by various masters, Northup was able to write to friends and family in New York, who were in turn able to secure his release. Northup's account provides extensive details on the slave markets in Washington, D.C. and New Orleans and describes at length cotton and sugar cultivation on major plantations in Louisiana.

100 Years of Radar - Gaspare Galati
2015-09-15

This book offers fascinating insights into the key technical and scientific developments in the history of radar, from the first patent, taken out by Hülsmeyer in 1904, through to the present day. Landmark events are highlighted and fascinating insights provided into the exceptional people who made possible the progress in the field, including the scientists and technologists who worked independently and under strict secrecy in various countries across the world in the 1930s and the big businessmen who played an important role after World War II. The book encourages multiple levels of reading. The author is a leading radar researcher who is ideally placed to offer a technical/scientific perspective as well as a historical one. He has taken care to structure and write the book in such a way as to appeal to both non-specialists and experts. The book is not sponsored by any company or body, either formally or informally, and is therefore entirely unbiased. The text is enriched by approximately three hundred images, most of which are original and have been accessed by detailed searches in the archives.

Visual Methodology in Migration Studies - Karolina Nikielska-Sekula
2021-07-29

This open access book explores the use of visual methods in migration studies through a combination of theoretical analyses and empirical studies. The first section looks at how various visual methods, including

photography, film, and mental maps, may be used to analyse the spatial presence of migrants. The second section addresses the processual building of narratives around migration, thereby using formats such as film and visual essay, and reflecting upon the ways they become carriers and mediators of both story and theory within the subject of migration. Section three focuses on vulnerable communities and discusses how visual methods can empower these communities, thereby also focusing on the theoretical and ethical implications of migration. The fourth section addresses the issue of migrant representation in visual discourses. Based on these contributions, a concluding methodological chapter systematizes the use of visual methods in migration studies across disciplines, with regard to their empirical, theoretical, and ethical implications. Multidisciplinary in character, this book is an interesting read for students and migration scholars who engage with visual methodologies, as well as practitioners, journalists, filmmakers, photographers, curators of exhibitions who address the topic of migration visually.

Destruction and human remains - Jean-Marc Dreyfus 2016-05-16

This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. *Destruction and human remains* investigates a crucial question frequently neglected in academic debate in the fields of mass violence and genocide studies: what is done to the bodies of the victims after they are killed? In the context of mass violence, death does not constitute the end of the executors' work. Their victims' remains are often treated and manipulated in very specific ways, amounting in some cases to true social engineering, often with remarkable ingenuity. To address these seldom-documented phenomena, this volume includes chapters based on extensive primary and archival research to explore why, how and by whom these acts have been committed through recent history.

Interdisciplinary in scope, *Destruction and human remains* will appeal to readers interested in the history and implications of genocide and mass violence, including researchers in anthropology, sociology, history, politics and modern warfare. The research program leading to this publication has received funding from the European Research Council under the European Union's Seventh Framework Programme (FP/2007-2013) / ERC Grant Agreement n° 283-617.

The Fatal Strain - Alan Sipress
2010-11-30

In 2009, Swine Flu reminded us that pandemics still happen, and award-winning journalist Alan Sipress reminds us that far worse could be brewing. When a highly lethal strain of avian flu broke out in Asia in 2003 and raced westward, Sipress, as a reporter for *The Washington Post*, tracked the virus across nine countries, watching its secrets elude the world's brightest scientists and most intrepid disease hunters. A vivid portrayal of the struggle between man and microbe, *The Fatal Strain* is a fast-moving account that weaves cultural, political, and scientific strands into a tale of inevitable pandemic.

Jeep TJ 1997-2006 - Michael Hansen
2018-08-15

p.p1 {margin: 0.0px 0.0px 0.0px
0.0px; font: 12.0px Arial} The Jeep
CJ, the icon that started it all, is
the most popular off-road vehicle of
all time. The look, style, and
functionality of the CJ made it
instantly popular and recognizable
the world over, in no doubt partly
due to its military presence in World
War II. The Jeep Wrangler platform
had the difficult task of replacing
the extremely popular CJ platform.
Outwardly similar in appearance, the
YJ, TJ, and JK that followed all had
significant design improvements, as
can be expected when a platform has a
life span of more than five decades.
The YJ was the first Chrysler release
after it purchased AMC in the
mid-1980s, and it was aimed at taming

the original CJ for more comfort and,
arguably, a larger audience. The TJ
that followed next was an
evolutionary update, significant in
that it featured a coil spring
suspension and the celebrated return
of round headlights, for a more
traditional look compared to the
square lights of the YJ. In Jeep TJ
1997-2006: How to Build & Modify,
everything you need to know about how
to modify your TJ for off-road use is
covered. Beginning with why you
should choose a TJ for modification,
Jeep expert Michael Hanssen takes you
through all the different systems
needing modification, including
engine modifications and swaps,
transmission swaps, transfer case and
driveshafts modifications, axles and
traction systems, suspensions and
lifts, wheels, tires, brakes, chassis
protection, electrical, and winches.
Included in every chapter are step-
by-step modification instructions to
help walk you through the process. If
you want to build a TJ for serious
off-road trail use, or you just want
a capable and great-looking Jeep for
around town, this book has you
covered.
