**Also Innovators** - Christopher B. Yardley 2019-04-30

‘Thank you for your order, Mr Mainframe Customer. The cost is £5 million and the lead-time for manufacture will be two years. In the meantime you will have to build a special computer centre to our specification. For our part, our project team will help you recruit and train potential programmers and we shall advise on how you might use the system.’ How different from today when the customer will want to see a specific application running before he puts a hand in his/her pocket. Chris Yardley lived the changes as a computer salesman and tells his story of a career living and working in five countries. Warts and all. The ecstasies, the heartbreaks and idiocies of major corporations. His career was not a planned one. In a growing industry, opportunities presented themselves and Chris believes he grasped every one presented. Having written his story, he has had every chapter verified by at least one person who features in that narrative. His respondents have universally endorsed the facts with comments such as ‘Wow, I’d forgotten most of that’. ‘You have a fantastic memory.’ ‘I never knew before the full facts of what happened.’ ‘How have you remembered all the circumstances?’ ‘It really is a people business.’ This is the only book that has followed a computer sales career over almost 50 years.

Viscous Expectations - Cara Judea Alhadeff 2013

Orchestrating text and color photography through the lens of vulnerability, Cara Judea Alhadeff explores embodied democracy as the intersection of technology, aesthetics, eroticism, and ethnicity. She demonstrates the potential for social resistance and a rhizomatic reconceptualization of community rooted in difference--and a socio-erotic ethic of ambiguity that disrupts codified normalcy. Within the context of global corporatocracy, international development, the pharma-addictive health industry, petroleum-parenting, and arts-as-entertainment, she scrutinizes the emancipatory possibilities of social ecology, post-humanism, and the pedagogy of trauma. Confronting hegemonies of convenience culture, she lays the groundwork for a reticulated citizenry that requires theory-becoming-practice. Alhadeff’s primary text and footnotes become parallel narratives, reflecting their intermedial content. As she integrates the personal and theoretical with the visual and textual, she mobilizes a comprehensive exploration of our bodies as contingent modes of relation. She cites philosophers and artists from Spinoza to Audre Lorde, Louise Bourgeois, and douard Glissant, who have explored collaborative and uncanny conditions of becoming vulnerable. In the context of multiple constituencies, creativity becomes a political imperative in which cognitive and somatic risk-taking gives voice to social justice.

**Completing the Forecast** - National Research Council 2006-11-09

Uncertainty is a fundamental characteristic of weather, seasonal climate, and hydrological prediction, and no forecast is complete without a description of its uncertainty. Effective communication of uncertainty helps people better understand the likelihood of a particular event and improves their ability to make decisions based on the forecast. Nonetheless, for decades, users of these forecasts have been conditioned to receive incomplete information about uncertainty. They have become used to single-valued (deterministic) forecasts (e.g., "the high temperature will be 70 degrees Fahrenheit 9 days from now") and applied their own experience in determining how much confidence to place in the forecast. Most forecast products from the public and private sectors, including those from the National Oceanographic and Atmospheric Administration's National Weather Service, continue this deterministic legacy. Fortunately, the National Weather Service and others in the prediction community have recognized the need to view uncertainty as a fundamental part of forecasts. By partnering with other segments of the community to understand user needs, generate relevant and rich informational products, and utilize effective

communication vehicles, the National Weather Service can take a leading role in the transition to widespread, effective incorporation of uncertainty information into predictions. "Completing the Forecast" makes recommendations to the National Weather Service and the broader prediction community on how to make this transition.

**Convergence Culture** - Henry Jenkins 2008-09

"What the future fortunes of [Gramsci's] writings will be, we cannot know. However, his permanence is already sufficiently sure, and justifies the historical study of his international reception. The present collection of studies is an indispensable foundation for this." —Eric Hobsbawm, from the preface Antonio Gramsci is a giant of Marxian thought and one of the world's greatest cultural critics. Antonio A. Santucci is perhaps the world's preeminent Gramsci scholar. Monthly Review Press is proud to publish, for the first time in English, Santucci's masterful intellectual biography of the great Sardinian scholar and revolutionary. Gramscian terms such as "civil society" and "hegemony" are much used in everyday political discourse. Santucci warns us, however, that these words have been appropriated by both radicals and conservatives for contemporary and often self-serving ends that often have nothing to do with Gramsci's purposes in developing them. Rather what we must do, and what Santucci illustrates time and again in his dissection of Gramsci's writings, is absorb Gramsci's methods. These can be summed up as the suspicion of "grand explanatory schemes," the unity of theory and practice, and a focus on the details of everyday life. With respect to the last of these, Joseph Buttigieg says in his Nota: "Gramsci did not set out to explain historical reality armed with some full-fledged concept, such as hegemony; rather, he examined the minutiae of concrete social, economic, cultural, and political relations as they are lived in by individuals in their specific historical circumstances and, gradually, he acquired an increasingly complex understanding of how hegemony operates in many diverse ways and

under many aspects within the capillaries of society.” The rigor of Santucci’s examination of Gramsci’s life and work matches that of the seminal thought of the master himself. Readers will be enlightened and inspired by every page.

*Me Myself & Him* - Chris Tebbetts 2019-07-09 Perfect for fans of Becky Albertalli's *Simon vs. the Homo Sapiens Agenda* and A. S. King's *Still Life with Tornado*, this story of parallel time lines cleverly explores how our choices can change and shape us--as well as the ways in which choices don't change the core of our being at all. When Chris Schweitzer takes a hit of whippets and passes out face first on the cement, his nose isn't the only thing that changes forever. Instead of staying home with his friends for the last summer after high school, he's shipped off to live with his famous physicist but royal jerk of a father to prove he can "play by the rules" before Dad will pay for college. Or . . . not. In an alternate time line, Chris's parents remain blissfully ignorant about the accident, and life at home goes back to normal--until it doesn't. A new spark between his two best (straight) friends quickly turns Chris into a (gay) third wheel, and even worse, the truth about the whippets incident starts to unravel. As his summer explodes into a million messy pieces, Chris wonders how else things might have gone. Is it possible to be jealous of another version of yourself in an alternate reality that doesn't even exist? With musings on fate, religion, parallel universes, and the best way to eat a cinnamon roll, *Me Myself & Him* examines how what we consider to be true is really just one part of the much (much) bigger picture. "Wildly ingenious,...altogether, the novel's a winner in this and any other universe."-Booklist, Starred Review "Tebbetts creates entertaining dual narratives...[and] enjoyable Easter eggs."-Publishers Weekly "An engaging story that examines love, relationships, and the different paths one's life can take...[perfect] for fans of Adam Silvera and Becky Albertalli's *What if It's Us*, Bill Konigsberg's *The Music of What Happens*, and Robyn Schneider's *The Beginning of Everything*."--SLJ

**The Influence of Teachers' Beliefs on Literature Instruction in the High School English Classroom** - Laura Renzi 2005

Abstract: This research investigates how teachers' beliefs about literature, students, and pedagogy effect their literature instruction in the high school English classroom. What teachers choose to teach and how they teach within the context of a literature classroom is important. Teacher's perceptions of literature and literature instruction have been studied before, but this study adds to the current research in taking into account how community expectations, the school's expectations of students and teachers, and the teacher's own perceptions and beliefs work together to influence literature instruction within the classroom. This study is grounded in qualitative research traditions with a focus on an interpretive descriptive process of "thick description" to create three case studies of teachers' literature instruction in high school classrooms. Data sources included, interviews and stimulated recall sessions, observations, audio and video tapes of classroom instruction, researcher's field notes, and surveys of students. Analysis was conducted to construct a case study of each of the three teachers and to understand how their beliefs and community influences affected their literature instruction. Cross-Case analysis was then conducted to search for emerging patterns between the three cases. These case studies suggested that there are several influences on teacher's literature instruction in the high school classroom. Teachers' beliefs were

mediated by personal experiences in educational settings, their experiences of teaching in general, and teaching particular students within a particular setting. Their beliefs about literature instruction were influenced by community expectations, departmental mandates for content coverage, and their personal relationships with the texts being taught in their classroom. Each of these teacher's

beliefs about what worked in the classroom (beliefs about pedagogy) and what students could and could not do (beliefs about students) were directly related to what their purpose for literature was in the classroom (beliefs about literature). The success of their instructional practices depended largely upon whether the teacher was apt in his or her beliefs about students.
