Race and Entrepreneurial Success - Robert W. Fairlie 2010-08-13

A comprehensive analysis of racial disparities and the determinants of entrepreneurial performance—in particular, why Asian-owned businesses on average perform relatively well and why black-owned businesses typically do not. Thirteen million people in the United States—roughly one in ten workers—own a business. And yet rates of business ownership among African Americans are much lower and have been so throughout the twentieth century. In addition, and perhaps more importantly,

businesses owned by African Americans tend to have lower sales, fewer employees and smaller payrolls, lower profits, and higher closure rates. In contrast, Asian American-owned businesses tend to be more successful. In *Race and Entrepreneurial Success*, minority entrepreneurship authorities Robert Fairlie and Alicia Robb examine racial disparities in business performance. Drawing on the rarely used, restricted-access Characteristics of Business Owners (CBO) dataset compiled by the U.S. Census Bureau, Fairlie and Robb examine in particular why Asian-owned firms perform well in comparison to white-owned businesses and black-owned firms typically do not. They also explore the broader question of why some entrepreneurs are successful and others are not. After providing new comprehensive estimates of recent trends in minority business ownership and performance, the authors examine the importance of human capital, financial capital,

and family business background in successful business ownership. They find that a high level of startup capital is the most important factor contributing to the success of Asian-owned businesses, and that the lack of startup money for black businesses (attributable to the fact that nearly half of all black families have less than \$6,000 in total wealth) contributes to their relative lack of success. In addition, higher education levels among Asian business owners explain much of their success relative to both white- and African American-owned businesses. Finally, Fairlie and Robb find that black entrepreneurs have fewer opportunities than white entrepreneurs to acquire valuable pre-business work experience through working in family businesses.

Health Data in the Information Age - Institute of Medicine 1994-01-01
Regional health care databases are being established around the country with the goal of providing timely and useful

information to policymakers, physicians, and patients. But their emergence is raising important and sometimes controversial questions about the collection, quality, and appropriate use of health care data. Based on experience with databases now in operation and in development, Health Data in the Information Age provides a clear set of guidelines and principles for exploiting the potential benefits of aggregated health data "without jeopardizing confidentiality. A panel of experts identifies characteristics of emerging health database organizations (HDOs). The committee explores how HDOs can maintain the quality of their data, what policies and practices they should adopt, how they can prepare for linkages with computer-based patient records, and how diverse groups from researchers to health care administrators might use aggregated data. Health Data in the Information Age offers frank analysis and guidelines

know that there is an orgasm gap of around 30% between heterosexual couples when they have sex? In *Mind The Gap*, Dr Karen Gurney, a clinical psychologist and certified psychosexologist, explores not just this gap, but the gaps in our knowledge of so much of the most important new science around sex and desire. In this book, you will learn that nearly everything that you've been led to believe about female sexuality isn't actually true. And that, despite what you might think, it is possible to simultaneously feel little to no spontaneous desire and have a happy and mutually satisfying sex life long term. Exploring the mismatch between ideas about sex in our society and what the science tells us, *Mind The Gap* also explains how this disconnect lies at the root of many of our sexual problems. Combining science with case studies, practical exercises and tips, this is a book for anyone who wants to better understand the mechanics of desire and futureproof their sex life, for life.

Different Accounts - David Gahtan 2008-01-18

Karl Tycho, a divorced, low-keyed economist in his 50's, is employed by a commercial bank in Manhattan, and finds it hard to adjust to the competitive nature of his new assignment. When he loses an important account, he is promptly fired. Just how he lost his most important customer, however, is a mystery; and the story behind it is one of financial deal-making, broken friendships, and conflicting personalities. Among them are Laura, the blunt boss who fires Karl without remorse; Roy, the wealthy and eccentric client whose money means everything to Karl's department at the bank; and Tim, the archetypal aggressive Wall Street executive. And many others. There are also Karl's conflicting love interests interwoven in the plot: Harriet, a musician who knows nothing about the stock market, and who gets Karl's attention; and Sarah, a witty ex-academician, about whom he has reservations. Communication Gaps and How to Close Them - Naomi Karten 2013-07-15

This is the digital version of the printed book (Copyright © 2002). The success of systems or software development depends on effective communication. But have you ever had trouble articulating a

complex concept? Have you ever doubted that someone truly understood you—or that you completely received someone’s message? Managers and technical professionals have to communicate effectively in order to understand client requirements, build work-related relationships, meet market demands, and survive time pressures. So often, though, communication breaks down, and nothing gets done (or done well, at least). Thankfully, Naomi Karten—author of *Managing Expectations*—is here to help. Readers learn how to improve the way they handle a wide variety of communication conflicts, from one-on-one squabbles to interdepartmental chaos to misinterpretations between providers and customers. Drawing on a variety of recognizable experiences and on useful models for understanding personalities, such as the Myers-Briggs Type Indicator and the teachings of family therapist Virginia Satir, Karten provides a series of powerful

tools and concepts for resolving communication problems—as well as methods for preventing them in the first place. Inadequate communications include misunderstood or missed messages, contradictory or mixed messages, and messages that are intentionally sabotaged. As the author notes, these miscommunications “can have a damaging, puzzling, and counterproductive impact on projects and relationships.” Karten helps readers identify many of the common factors that can cause communication gaps. For example, mistaken assumptions of understanding lack of follow-up unfixed project terminology emotional baggage personality conflicts mismatched communication preferences Karten’s witty, conversational tone makes this book easy to read; her real-life stories and examples make it easy to understand; and her use of hilarious cartoons by Mark Tatro brings her lessons to life. *Communication Gaps and How to Close Them* is a must-read for anyone who recognizes

that the way he or she communicates in professional encounters, as well as in personal ones, can be improved. With Karten's useful insights and practical techniques, this book will change not only how you communicate but also how you think about communication.

World Development Report 1978 - 1978

This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing

interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

Invisible Women - Caroline Criado Perez 2019-03-12

Winner of the 2019 Financial Times and McKinsey Business

Downloaded from
sixideasapps.pomona.edu

Book of the Year Award Winner of the 2019 Royal Society Science Book Prize A landmark, prize-winning, international bestselling examination of how a gender gap in data perpetuates bias and disadvantages women, now in paperback Data is fundamental to the modern world. From economic development to health care to education and public policy, we rely on numbers to allocate resources and make crucial decisions. But because so much data fails to take into account gender, because it treats men as the default and women as atypical, bias and discrimination are baked into our systems. And women pay tremendous costs for this insidious bias, in time, in money, and often with their lives. Celebrated feminist advocate Caroline Criado Perez investigates this shocking root cause of gender inequality in the award-winning, #1 international bestseller Invisible Women. Examining the home, the workplace, the public square, the doctor's office, and more, Criado Perez unearths a

dangerous pattern in data and its consequences on women's lives. Product designers use a "one-size-fits-all" approach to everything from pianos to cell phones to voice recognition software, when in fact this approach is designed to fit men. Cities prioritize men's needs when designing public transportation, roads, and even snow removal, neglecting to consider women's safety or unique responsibilities and travel patterns. And in medical research, women have largely been excluded from studies and textbooks, leaving them chronically misunderstood, mistreated, and misdiagnosed. Built on hundreds of studies in the United States, in the United Kingdom, and around the world, and written with energy, wit, and sparkling intelligence, this is a groundbreaking, highly readable exposé that will change the way you look at the world.
