When people should go to the book stores, search launch by shop, shelf by shelf, it is in reality problematic. This is why we provide the book compilations in this website. It will unquestionably ease you to look guide **Chapter 5 The Industrial Revolution Begins Khs Robinson** as you such as.

By searching the title, publisher, or authors of guide you truly want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be every best place within net connections. If you intend to download and install the Chapter 5 The Industrial Revolution Begins Khs Robinson, it is categorically easy then, in the past currently we extend the colleague to purchase and make bargains to download and install Chapter 5 The Industrial Revolution Begins Khs Robinson consequently simple!

Handbook of Petrochemical Processes - James G. Speight 2019-06-13

The petrochemical industry is a scientific and engineering field that encompasses the production of a wide range of chemicals and polymers. The purpose of this book is not only to provide a follow-on to form the later chapters of the highly successful Chemistry and Technology of Petroleum 5th Edition but also provides a simplified approach to a very diverse chemical subject dealing with the chemistry and technology of various petroleum and petrochemical process. Following from the introductory chapters, this book provides the readers with a valuable source of information containing insights into petrochemical reactions and products, process technology, and polymer synthesis. Provides readers with a valuable source of information containing insights into petrochemical reactions and products, process technology, and polymer synthesis Introduces the reader to the various petrochemical intermediates are generally produced by chemical conversion of primary petrochemicals to form more complicated derivative products The reactions and processes involved in transforming petroleum-based hydrocarbons into the chemicals that form the basis of the multi-billion dollar petrochemical industry are reviewed and described The book includes information on new process developments for the production of raw materials and intermediates for petrochemicals Includes a description of the origin of the raw materials for the petrochemicals industry - including an overview of the coal chemicals industry

Artificial Intelligence and Inclusive Education - Jeremy Knox 2019-06-13

This book brings together the fields of artificial intelligence (often known as A.I.) and inclusive education in order to speculate on the future of teaching and learning in increasingly diverse social, cultural, emotional, and linguistic educational contexts. This book addresses a pressing need to understand how future educational practices can promote equity and equality, while at the same time adopting A.I. systems that are oriented towards automation, standardisation and efficiency. The contributions in this edited volume appeal to scholars and students with an interest in forming a critical understanding of the development of A.I. for education, as well as an interest in how the processes of inclusive education might be shaped by future technologies. Grounded in theoretical engagement, establishing key challenges for future practice, and outlining the latest research, this book offers a comprehensive overview of the complex issues arising from the convergence of A.I. technologies and the necessity of developing inclusive teaching and learning. To date, there has been little in the way of direct association between research and practice in these domains: A.I. has been a predominantly technical field of research and development, and while intelligent computer systems and 'smart' software are being increasingly applied in many areas of industry, economics, social life, and education itself, a specific engagement with the agenda of inclusion appears lacking. Although such technology offers exciting possibilities for education, including software that is designed to 'personalise' learning or adapt to learner behaviours, these developments are accompanied by growing concerns about the in-built biases involved in machine learning techniques driven by 'big data'.

India Under Ripon - Wilfrid Scawen Blunt 1909

Advances in Animal Biotechnology - Birbal Singh 2019-07-09

This book entitled, "Advances in Animal Biotechnology," is a compilation of state-of-the-art in the field of Animal Biotechnology including fishery, that are not sheltered in depth in earlier publications. It offers an

update on avant-garde technologies and advances in key aspects of genetic engineering, metagenomics, assisted reproduction, animal genomics, biotechnology in veterinary health, as well as the role of gut and marine microbial ecosystems in livestock and industrial development. The book is divided broadly into five different sections, viz., Gut Microbiome and Nutritional Biotechnology, Assisted Reproduction Biotechnology, Livestock Genomics, Health Biotechnology, and Animal Biotechnology in Global Perspective. The book covers the syllabi of Animal Biotechnology courses in various universities, academia and competitive examinations at various levels. Researchers, Continuing Graduates, and Academicians, Research Institutions, and Biotech Companies will be benefited from this valuable compilation of research. Its broad spectrum makes this work a valuable resource for professionals, researchers, academics and students in the field of veterinary and animal production as well as the biotechnology industry.

[Ethnic Fermented Foods and Beverages of India: Science History and Culture](#) - Jyoti Prakash Tamang 2020-03-02

This book provides detailed information on the various ethnic fermented foods and beverages of India. India is home to a diverse food culture comprising fermented and non-fermented ethnic foods and alcoholic beverages. More than 350 different types of familiar, less-familiar and rare ethnic fermented foods and alcoholic beverages are traditionally prepared by the country's diverse ethnic groups, and include alcoholic, milk, vegetable, bamboo, legume, meat, fish, and cereal based beverages. Most of the Indian ethnic fermented foods are naturally fermented, whereas the majority of the alcoholic beverages have been prepared using dry starter culture and the 'back-sloping' method for the past 6,000 years. A broad range of culturable and unculturable microbiomes and mycobiontes are associated with the fermentation and production of ethnic foods and alcoholic drinks in India. The book begins with detailed chapters on various aspects including food habits, dietary culture, and the history, microbiology and health benefits of fermented Indian food and beverages. Subsequent chapters describe unique and region-specific ethnic fermented foods and beverages from all 28 states and 9 union territories. In turn the classification of various ethnic fermented foods and beverages, their traditional methods of preparation, culinary practices and mode of consumption, socio-economy, ethnic values, microbiology, food safety, nutritional value, and process optimization in some foods are discussed in details with original pictures. In closing, the book addresses the medicinal properties of the fermented food products and their health benefits, together with corresponding safety regulations.

[The Ethics of Research Involving Animals](#) - 2005-01-01

A report of the Nuffield Council on Bioethics working party investigating the ethical issues of research involving animals.

[Properties and Management of Soils in the Tropics](#) - Pedro A. Sanchez 2019-01-10

Long-awaited second edition of classic textbook, brought completely up to date, for courses on tropical soils, and reference for scientists and professionals.

[Lost Goddesses](#) - Trudy Jacobsen 2008

In prehistoric times, Southeast Asian women enjoyed high status. When, how and why did that change? This book explores the history of gender relations through economics, politics, art and literature. This title is a

narrative and visual tour de force, of interest to scholars and the general public.

Industrial Pharmaceutical Biotechnology - Heinrich Klefenz 2002-04-22

This volume focuses on pharmaceutical biotechnology as a key area of life sciences. The complete range of concepts, processes and technologies of biotechnology is applied in modern industrial pharmaceutical research, development and production. The results of genome sequencing and studies of biological-genetic function are combined with chemical, micro-electronic and microsystem technology to produce medical devices and diagnostic biochips. A multitude of biologically active molecules is expanded by additional novel structures created with newly arranged gene clusters and bio-catalytic chemical processes. New organisational structures in the co-operation of institutes, companies and networks enable faster knowledge and product development and immediate application of the results of research and process development. This book is the ideal source of information for scientists and engineers in research and development, for decision-makers in biotech, pharma and chemical corporations, as well as for research institutes, but also for founders of biotech companies and people working for venture capital corporations.

Forever Free - Eric Foner 2013-06-26

From one of our most distinguished historians, a new examination of the vitally important years of Emancipation and Reconstruction during and immediately following the Civil War—a necessary reconsideration that emphasizes the era’s political and cultural meaning for today’s America. In *Forever Free*, Eric Foner overturns numerous assumptions growing out of the traditional understanding of the period, which is based almost exclusively on white sources and shaped by (often unconscious) racism. He presents the period as a time of determination, especially on the part of recently emancipated black Americans, to put into effect the principles of equal rights and citizenship for all. Drawing on a wide range of long-neglected documents, he places a new emphasis on the centrality of the black experience to an understanding of the era. We see African Americans as active agents in overthrowing slavery, in helping win the Civil War, and—even more actively—in shaping Reconstruction and creating a legacy long obscured and misunderstood. Foner makes clear how, by war’s end, freed slaves in the South built on networks of church and family in order to exercise their right of suffrage as well as gain access to education, land, and employment. He shows us that the birth of the Ku Klux Klan and renewed acts of racial violence were retaliation for the progress made by blacks soon after the war. He refutes lingering misconceptions about Reconstruction, including the attribution of its ills to corrupt African American politicians and “carpetbaggers,” and connects it to the movements for civil rights and racial justice. Joshua Brown’s illustrated commentary on the era’s graphic art and photographs complements the narrative. He offers a unique portrait of how Americans envisioned their world and time. *Forever Free* is an essential contribution to our understanding of the events that fundamentally reshaped American life after the Civil War—a persuasive reading of history that transforms our sense of the era from a time of failure and despair to a threshold of hope and achievement.

Immersive Theatre and Audience Experience - Rose Biggin 2017-09-06

This book is the first full-length monograph to focus on Punchdrunk, the internationally-renowned theatre company known for its pioneering approach to immersive theatre. With its promises of empowerment, freedom and experiential joy, immersive theatre continues to gain popularity - this study brings necessary critical analysis to this rapidly developing field. What exactly do we mean by audience “immersion”? How might immersion in a Punchdrunk production be described, theorised, situated or politicised? What is valued in immersive experience - and are these values explicit or implied? *Immersive Theatre and Audience Experience* draws on rehearsals, performances and archival access to Punchdrunk, providing new critical perspectives from cognitive studies, philosophical aesthetics, narrative theory and computer games. Its discussion of immersion is structured around three themes: interactivity and game; story and narrative; environment and space. Providing a rigorous theoretical toolkit to think further about the form’s capabilities, and offering a unique set of approaches, this book will be of significance to scholars, students, artists and spectators.

Medical Consequences of Nuclear Warfare - 1989

Imperial Overstretch: Germany in Soviet Policy from Stalin to Gorbachev - Hannes Adomeit 2016-04-29

Das von Wolfgang Daubler herausgegebene Handbuch kommt zur rechten Zeit. Aktionen von Ärzten,

Lokführern und Piloten sowie in KITAS haben neue Akzente gesetzt. Das Bundesarbeitsgericht hat seine Rechtsprechung "liberalisiert." Ganz aktuell gibt es Bestrebungen, die Tarifeinheit gesetzlich zu verordnen. Das neue Handbuch behandelt umfassend alle aktuellen Grundsatzprobleme des Arbeitskampfrechts, wie z.B. die Zulässigkeit des "wilden" und des politischen Demonstrationsstreiks sowie die Möglichkeit des Arbeitgebers, mit Aussperrung oder der Einstellung von Streikbrechern zu reagieren. Aber auch praktisch bedeutsame Einzelfragen wie der Erlass von einstweiligen Verfügungen sind einbezogen. Auf die möglichen Auswirkungen eines Tarifeinheitgesetzes wird umfassend eingegangen. Eingehend sind die EU-rechtlichen Vorgaben für den Arbeitskampf sowie die volkerrechtlichen Streikgarantien einbezogen. Die Europäische Sozialcharta und die neuen Entscheidungen des Europäischen Gerichtshofs für Menschenrechte haben erheblichen Änderungsbedarf im deutschen Recht geschaffen - auch dies ein wichtiges Thema des Handbuchs. Besonders hilfreich wie praxisnah: Alle wichtigen atypischen Kampfformen wie der Flashmob die Lahmlegung von Servern die gebündelte Ausübung von Individualrechten oder der Dienst nach Vorschrift werden übersichtlich kommentiert. Die Darstellung lotet exakt aus, was an Massnahmen möglich, rechtlich zulässig und damit von Arbeitnehmer- wie Arbeitgeberseite zu beachten ist. Die Autoren kommen aus der Wissenschaft, der Arbeitsgerichtsbarkeit und der Anwaltschaft. Sie bringen ihre unterschiedlichen Erfahrungen ein, was der Ausgewogenheit und Akzeptanz der Losungen zugute kommt.

Bacilli in Agrobiotechnology - M. Tofazzal Islam 2022-02-10

The third volume of the series 'Bacilli and Agrobiotechnology' is comprised of 25 chapters that bring a unique perspective to the readers about Bacillus-mediated biotic and abiotic plant stress tolerance, bioremediation and bioprospecting. These chapters are prepared by the leading scientists of global repute. The negative impacts of agrochemicals such as chemical fertilizers and pesticides on human health and environment are paramount. Bacillus and allied genera of beneficial plant-associated microbes are presenting beacon of hope to the farmers, plant scientists and stewards of environment. Several chapters of this volume focus on the induction of various signaling pathways in plants by Bacillus spp. to alleviate biotic and abiotic stresses impacted by global climate change. Agricultural lands contaminated with heavy metals affect the ecological food chain starting from crop cultivation. How the toxic effects of trace metals originating from industrial effluents and agrochemicals can be remediated? This book addresses how to overcome these issues by applying elite strains of Bacillus. Bioprospecting is a systematic and organized search for conversion of bioresources to industrially important products by utilizing microbe-derived metabolites. This volume is enriched by including the bioprospecting aspects mediated by Bacillus spp. with novel insights.

Incidents in the Life of a Slave Girl - Harriet Ann Jacobs 1861

Reader be assured this narrative is no fiction. I am aware that some of my adventures may seem incredible; but they are, nevertheless, strictly true. I have not exaggerated the wrongs inflicted by Slavery; on the contrary, my descriptions fall far short of the facts. I have concealed the names of places, and given persons fictitious names. I had no motive for secrecy on my own account, but I deemed it kind and considerate towards others to pursue this course. I wish I were more competent to the task I have undertaken. But I trust my readers will excuse deficiencies in consideration of circumstances. I was born and reared in Slavery; and I remained in a Slave State twenty-seven years. Since I have been at the North, it has been necessary for me to work diligently for my own support, and the education of my children. This has not left me much leisure to make up for the loss of early opportunities to improve myself; and it has compelled me to write these pages at irregular intervals, whenever I could snatch an hour from household duties.

Germans in the Civil War - Walter D. Kamphoefner 2009-09-15

German Americans were one of the largest immigrant groups in the Civil War era, and they comprised nearly 10 percent of all Union troops. Yet little attention has been paid to their daily lives--both on the battlefield and on the home front--during the war. This collection of letters, written by German immigrants to friends and family back home, provides a new angle to our understanding of the Civil War experience and challenges some long-held assumptions about the immigrant experience at this time. Originally published in Germany in 2002, this collection contains more than three hundred letters written by seventy-eight German immigrants--men and women, soldiers and civilians, from the North and South. Their missives tell of battles and boredom, privation and profiteering, motives for enlistment and desertion and for avoiding involvement altogether. Although written by people with a variety of backgrounds, these letters describe the conflict from a distinctly

German standpoint, the editors argue, casting doubt on the claim that the Civil War was the great melting pot that eradicated ethnic antagonisms.

Multiphysics Simulation by Design for Electrical Machines, Power Electronics and Drives - Dr. Marius Rosu 2017-11-20

Presents applied theory and advanced simulation techniques for electric machines and drives This book combines the knowledge of experts from both academia and the software industry to present theories of multiphysics simulation by design for electrical machines, power electronics, and drives. The comprehensive design approach described within supports new applications required by technologies sustaining high drive efficiency. The highlighted framework considers the electric machine at the heart of the entire electric drive. The book also emphasizes the simulation by design concept—a concept that frames the entire highlighted design methodology, which is described and illustrated by various advanced simulation technologies. Multiphysics Simulation by Design for Electrical Machines, Power Electronics and Drives begins with the basics of electrical machine design and manufacturing tolerances. It also discusses fundamental aspects of the state of the art design process and includes examples from industrial practice. It explains FEM-based analysis techniques for electrical machine design—providing details on how it can be employed in ANSYS Maxwell software. In addition, the book covers advanced magnetic material modeling capabilities employed in numerical computation; thermal analysis; automated optimization for electric machines; and power electronics and drive systems. This valuable resource: Delivers the multi-physics know-how based on practical electric machine design methodologies Provides an extensive overview of electric machine design optimization and its integration with power electronics and drives Incorporates case studies from industrial practice and research and development projects Multiphysics Simulation by Design for Electrical Machines, Power Electronics and Drives is an incredibly helpful book for design engineers, application and system engineers, and technical professionals. It will also benefit graduate engineering students with a strong interest in electric machines and drives.

Giants - John Stauffer 2008-11-03

Frederick Douglass and Abraham Lincoln were the preeminent self-made men of their time. In this masterful dual biography, award-winning Harvard University scholar John Stauffer describes the transformations in the lives of these two giants during a major shift in cultural history, when men rejected the status quo and embraced new ideals of personal liberty. As Douglass and Lincoln reinvented themselves and ultimately became friends, they transformed America. Lincoln was born dirt poor, had less than one year of formal schooling, and became the nation's greatest president. Douglass spent the first twenty years of his life as a slave, had no formal schooling—in fact, his masters forbade him to read or write—and became one of the nation's greatest writers and activists, as well as a spellbinding orator and messenger of audacious hope, the pioneer who blazed the path traveled by future African-American leaders. At a time when most whites would not let a black man cross their threshold, Lincoln invited Douglass into the White House. Lincoln recognized that he needed Douglass to help him destroy the Confederacy and preserve the Union; Douglass realized that Lincoln's shrewd sense of public opinion would serve his own goal of freeing the nation's blacks. Their relationship shifted in response to the country's debate over slavery, abolition, and emancipation. Both were ambitious men. They had great faith in the moral and technological progress of their nation. And they were not always consistent in their views. John Stauffer describes their personal and political struggles with a keen understanding of the dilemmas Douglass and Lincoln confronted and the social context in which they occurred. What emerges is a brilliant portrait of how two of America's greatest leaders lived.

Hard Times and New Deal in Kentucky - George T. Blakey 2014-07-15

The Great Depression and the New Deal touched the lives of almost every Kentuckian during the 1930s. Fifty years later the Commonwealth is still affected by the legacies of that era and the policies of the Roosevelt administration. George T. Blakey has written the first full study of this turbulent decade in Kentucky, and he offers a fresh perspective on the New Deal programs by viewing them from the local and state level rather

than from Washington. Thousands of Kentuckians worked for New Deal programs such as the Civilian Conservation Corps and the Works Projects Administration; thousands more kept their homes through loans from the Home Owners Loan Corporation. Tobacco growers adopted new production techniques and rural farms received their first electricity because of the Agricultural Adjustment and Rural Electrification administrations. The New Deal stretched from the Harlan County coal mines to a TVA dam near Paducah, and it encompassed subjects as small as Social Security pension checks and as large as revived Bourbon distilleries. The impact of these phenomena on Kentucky was both beneficial and disruptive, temporary and enduring. Blakey analyzes the economic effects of this unprecedented and massive government spending to end the depression. He also discusses the political arena in which Governors Laffoon, Chandler, and Johnson had to wrestle with new federal rules. And he highlights social changes the New Deal brought to the Commonwealth: accelerated urbanization, enlightened land use, a lessening of state power and individualism, and a greater awareness of Kentucky history. *Hard Times and New Deal* weaves together private memories of older Kentuckians and public statements of contemporary politicians; it includes legislative debates and newspaper accounts, government statistics and personal reminiscences. The result is a balanced and fresh look at the patchwork of emergency and reform activities which many people loved, many others hated, but no one could ignore.

[Arsenic Contamination in the World](#) - Susan Murcott 2012-09-30

Arsenic Contamination in the World: an International Sourcebook provides a global compendium of cited arsenic occurrences in the world as they affect public health. This book details arsenic contamination by source, region and arsenic-affected country. Arsenic is identified in 105 countries and territories, representing a larger database than any previous published work. Sources of arsenic contamination are categorized as Anthropogenic, Geogenic, Volcanogenic, Coal, Mining and Petroleum-related. National, regional and international maps locate the affected areas and populations. A synthesis of critical country information includes an estimate of the exposed population of 226 million people worldwide. This reference work is an indispensable tool for medical doctors, public health workers, scientists, water experts, governments, industries, non-profit organizations and communities in identifying site-specific arsenic contamination. An extensive bibliography of peer-reviewed literature gives the reader important arsenic contamination locations as the first step towards remediation. This Sourcebook is updatable via an on-line annex which provides up-to-date information on new arsenic occurrences and developments. We invite readers to participate in updating this database at:

<http://www.iwawaterwiki.org/xwiki/bin/view/Articles/ExecutiveSummaryofArsenicContaminationintheWorld> By synthesizing the known occurrences of arsenic world-wide, this reference book offers an essential tool for understanding and addressing the global arsenic geological-public health interface. Discounted ebook price available for customers from Developing Countries. Please contact mlygizou@iwap.co.uk if you wish to purchase an ebook from a developing country @ £50.00 (PDF format). Author: Susan Murcott, Senior Lecturer, Civil and Environmental Engineering Department, Massachusetts Institute of Technology, USA Table of Contents: Executive Summary, African Region, Region of the Americas, Asia Region, European Region, Region of Australia and Oceania.

[Petroleum Science and Technology](#) - Chang Samuel Hsu 2019-07-02

Aimed at students and professionals, this book covers every major aspect of petroleum: the origin of fossil hydrocarbons and their chemical/physical properties; discovering hydrocarbon reserves; recovering oil, gas, and bitumen; purifying gas; the chemical and physical characterization of crude oil; refining crudes into fuels and lubricants; and converting simple chemicals into solvents, polymers, fibers, rubbers, coatings, and myriad other products, including pharmaceuticals. Readers will learn how the industry operates, from "upstream" exploration and production, "midstream" transportation to "downstream" refining, and manufacturing of finished products. The book also contains unique chapters on midstream operations, learnings from major accidents, and safety/environmental laws and regulations. It builds on the authors' previous books and teaching material from a highly rated course that is taught at the Florida A&M University/Florida State University (USA).

Benchmarking Higher Education System Performance - ORGANISATION FOR ECONOMIC CO-OPERATION AND DEVELOPMENT. 2019-06-11

The scope of contemporary higher education is wide, and concerns about the performance of higher education systems are widespread. The number of young people with a higher education qualification is expected to surpass 300 million in OECD and G20 countries by 2030. Higher education systems are faced with challenges that include expanding access, containing costs, and ensuring the quality and relevance of provision. The project on benchmarking higher education system performance provides a comprehensive and empirically rich review of the higher education landscape across OECD countries, taking stock of how well they are performing in meeting their education, research and engagement responsibilities.

African Genesis - Sally C. Reynolds 2012-03-29

This book reviews key themes and developments in palaeoanthropology, exploring their impact on our understanding of human origins in Africa.

The Formation of Islam - Jonathan P. Berkey 2003

Jonathan Berkey's 2003 book surveys the religious history of the peoples of the Near East from roughly 600 to 1800 CE. The opening chapter examines the religious scene in the Near East in late antiquity, and the religious traditions which preceded Islam. Subsequent chapters investigate Islam's first century and the beginnings of its own traditions, the 'classical' period from the accession of the Abbasids to the rise of the Buyid amirs, and thereafter the emergence of new forms of Islam in the middle period. Throughout, close attention is paid to the experiences of Jews and Christians, as well as Muslims. The book stresses that Islam did not appear all at once, but emerged slowly, as part of a prolonged process whereby it was differentiated from other religious traditions and, indeed, that much that we take as characteristic of Islam is in fact the product of the medieval period.

Shaping History - Helen Geracimos Chapin 1996-07-01

Just a decade after the first printing press arrived in Honolulu in 1820, American Protestant missionaries produced the first newspaper in the islands. More than a thousand daily, weekly, or monthly papers in nine different languages have appeared since then. Today they are often considered a secondary source of information, but in their heyday Hawai'i's newspapers formed one of the most diversified, vigorous, and influential presses in the world. In this original and timely work, Helen Geracimos Chapin charts the role Hawai'i's newspapers played in shaping major historic events in the islands and how the rise of the newspaper abetted the rise of American influence in Hawai'i. *Shaping History* is based on a wide selection of written and oral sources, including extensive interviews with journalists and others working in the newspaper industry. Students of journalism and Hawaiian history will find this comprehensive history of Hawai'i's newspapers especially valuable.

The Discovery, Settlement and Present State of Kentucke - John Filson 1996

Fragmentation in Semi-Arid and Arid Landscapes - Kathleen A. Galvin 2007-10-12

With detailed data from nine sites around the world, the authors examine how the so-called 'fragmentation' of these fragile landscapes occurs and the consequences of this break-up for ecosystems and the people who depend on them. 'Rangelands' make up a quarter of the world's landscape, and here, the case is developed that while fragmentation arises from different natural, social and economic conditions worldwide, it creates similar outcomes for human and natural systems.

Sago Palm - Hiroshi Ehara 2018-01-15

This open access book addresses a wide variety of events and technologies concerning the sago palm, ranging from its botanical characteristics, culture and use to social conditions in the places where it is grown, in order to provide a record of research findings and to benefit society. It discusses various subjects, including the sago palm and related species; differentiation of species of starch-producing palm; habitat, morphological, physiological and growth characteristics; culture and management; productivity of carbon dioxide; starch extraction and manufacture; characteristics and utilization of starch; and cultural

anthropological and folkloristic aspects. Problems such as food shortages due to increasing populations, global warming and climate change, and decreasing reserves of oil and other underground resources, have become more pressing in recent years. In the context of these problems, the book examines the role of the sago palm in sustainable food production, in the manufacture of other foodstuffs, as a raw material for ethanol and in the manufacture of biodegradable plastics. In addition to academics, this book will be useful to researchers and government officials working for international agencies, national governments, municipalities, and other research organizations; technicians, researchers, managers, entrepreneurs, and others working in industries such as agriculture, plant production, food production, manufacturing, chemical engineering, energy production, and distribution.

Meet the Philosophers of Ancient Greece - Dr Patricia F O'Grady 2012-10-01

Ancient Greece was the cradle of philosophy in the Western tradition. *Meet the Philosophers of Ancient Greece* brings the thoughts and lives of the pioneers of Western philosophy down from their sometimes remote heights and introduces them to a modern audience. Comprising seventy essays, written by internationally distinguished scholars in a lively and accessible style, this book presents the values, ideas, wisdom and arguments of the most significant thinkers from the world of Ancient Greece. Commencing with Thales of Miletus and continuing to the end of the Ancient Period of philosophy by way of Heraclitus, Parmenides, Protagoras, Socrates, Plato, Aristotle, Archimedes, Epictetus this book explores the major contributions of each philosopher as well as looking at archaeological and historical sites where they lived, worked and thought. This book is an outstanding introduction to the world of the philosophers of Ancient Greece.

History of Civilizations of Central Asia: Development in contrast : from the sixteenth to the mid-nineteenth century - Ahmad Hasan Dani 2003-01-01

The period treated in this volume is highlighted by the slow retreat of nomadism and the progressive increase of sedentary polities owing to a fundamental change in military technology: Furthermore, this period certainly saw a growing contrast in the pace of economic and cultural progress between Central Asia and Europe. The internal growth of the European economies and the influx of silver from the New World gave Atlantic Europe an increasingly important position in world trade and caused a major shift in inland Asian trade. Thus, 1850 marks the end of the total sway of pre-modern culture as the extension of colonial dominance was accompanied by the influx of modern ideas.

Fish Locomotion - Paolo Domenici 2010-01-01

Fish accomplish most of their basic behaviors by swimming. Swimming is fundamental in a vast majority of fish species for avoiding predation, feeding, finding food, mating, migrating and finding optimal physical environments. Fish exhibit a wide variety of swimming patterns and behaviors. This treatise looks at fish swimming from the behavioral and

Killers of the Flower Moon - David Grann 2017-04-18

NATIONAL BESTSELLER • A twisting, haunting true-life murder mystery about one of the most monstrous crimes in American history, from the author of *The Lost City of Z*. • NATIONAL BOOK AWARD FINALIST In the 1920s, the richest people per capita in the world were members of the Osage Nation in Oklahoma. After oil was discovered beneath their land, the Osage rode in chauffeured automobiles, built mansions, and sent their children to study in Europe. Then, one by one, the Osage began to be killed off. The family of an Osage woman, Mollie Burkhart, became a prime target. One of her relatives was shot. Another was poisoned. And it was just the beginning, as more and more Osage were dying under mysterious circumstances, and many of those who dared to investigate the killings were themselves murdered. As the death toll rose, the newly created FBI took up the case, and the young director, J. Edgar Hoover, turned to a former Texas Ranger named Tom White to try to unravel the mystery. White put together an undercover team, including a Native American agent who infiltrated the region, and together with the Osage began to expose one of the most chilling conspiracies in American history. Look for David Grann's latest book, *The Wager*, coming soon!
