Global Trends 2040 - National Intelligence Council 2021-03

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021)
Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Macroeconomics in Context - Neva Goodwin 2015-03-12

Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Microeconomics in Context, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

Poverty and Shared Prosperity 2016 - World Bank Group 2016-10-12

Poverty and Shared Prosperity 2016 is the first of an annual flagship report that will inform a global audience comprising development practitioners, policy makers, researchers, advocates, and citizens in general with the latest and most accurate estimates on trends in global poverty and shared prosperity. This edition will also document trends in inequality and identify recent country experiences that have been successful in reducing inequalities, provide key lessons from those experiences, and synthesize the rigorous evidence on public policies that can

shift inequality in a way that bolsters poverty reduction and shared prosperity in a sustainable manner. Specifically, the report will address the following questions: • What is the latest evidence on the levels and evolution of extreme poverty and shared prosperity? • Which countries and regions have been more successful in terms of progress toward the twin goals and which are lagging behind? • What does the global context of lower economic growth mean for achieving the twin goals? • How can inequality reduction contribute to achieving the twin goals? • What does the evidence show concerning global and between- and within-country inequality trends? • Which interventions and countries have used the most innovative approaches to achieving the twin goals through reductions in inequality? The report will make four main contributions. First, it will present the most recent numbers on poverty, shared prosperity, and inequality. Second, it will stress the importance of inequality reduction in ending poverty and boosting shared prosperity by 2030 in a context of weaker growth. Third, it will highlight the diversity of within-country inequality reduction experiences and will synthesize experiences of successful countries and policies, addressing the roots of inequality without compromising economic growth. In doing so, the report will shatter some myths and sharpen our knowledge of what works in reducing inequalities. Finally, it will also advocate for the need to expand and improve data collection—for example, data availability, comparability, and quality—and rigorous evidence on inequality impacts in order to deliver high-quality poverty and shared prosperity monitoring.

The Value of Everything - Mariana Mazzucato 2018-04-26

Who really creates wealth in our world? And how do we decide the value of what they do? At the heart of today's financial and economic crisis is a problem hiding in plain sight. In modern capitalism, value-extraction - the siphoning off of profits, from shareholders' dividends to bankers' bonuses - is rewarded more highly than value-creation: the productive process that drives a healthy economy and society. We misidentify takers as makers, and have lost sight of what value really means. Once a central plank of economic thought, this concept of value - what it is, why it matters to us - is simply no longer discussed. Yet, argues Mariana Mazzucato in this penetrating and passionate new book, if we are to reform capitalism - to radically transform an increasingly sick system rather than continue feeding it - we urgently need to rethink where wealth comes from. Who is creating it, who is extracting it, and who is destroying it? Answers to these questions are key if we want to replace the current parasitic system with a type of capitalism that is more sustainable, more symbiotic: that works for us all. The Value of Everything will reignite a long-needed debate about the kind of world we really want to live in.

The Economic Integration of Greater China - Yin-Wong Cheung 2007-04-01

The tremendous success of China's program of economic reform and the rapid integration of China into the global economy have prompted this study on the economic and financial integration between mainland China, Hong Kong, and Taiwan – a grouping sometimes referred to as Greater China. While there has been a plethora of analyses of China's economic interactions with other economies, this book fills the need for a thorough investigation of regional financial and real interactions – corresponding to the many exhaustive studies of such interactions between developed countries and between East Asian countries. Since real and financial integration has substantial implications for the efficiency of resource allocation and the efficacy of macroeconomics policy, Cheung, Chinn and Fujii offer clear analysis of the current state of economic integration of Greater China, thereby helping to gauge the potential role of China in the global economy. Prospects of a currency union in Greater China, an extreme form of integration, are also evaluated with respect to benefits and costs to the three parties. In addition, the authors provide complementary discussions regarding the degree of integration between China and several Pacific Rim economies, including those of Japan, Korea, Singapore, and the United States. Cheung, Chinn and Fujii provide an up-to-date assessment of mainland China's economic development and its integration with its neighboring economies, especially Hong Kong and Taiwan. This grouping is also known as Greater China. There are a number of approaches to assessing economic integration, and the authors present some standard measures – including trade flows, output movements, saving and investment correlations, and consumption comovements. They emphasize the measures based on some key parity conditions in international finance – real interest parity, uncovered interest parity, and relative purchasing power parity. While there is no perfect empirical measure of economic integration, the theoretical relationships between integration and these three parity conditions are well founded in economics. Moreover, the three parity conditions constitute a unified framework that can be used to assess the degree of real and financial integration, and thus offer a convenient way to investigate the interaction between these two types of integration. In addition, the authors evaluate the prospect of a currency union in Greater China, the most extreme form of integration. Prospects of China's continued integration with the world economy, and the implications of policies in Beijing and other Pacific Rim capitals are also discussed.

Stakeholder Capitalism - Klaus Schwab 2021-01-27

Reimagining our global economy so it becomes more sustainable and prosperous for all Our global economic system is broken. But we can replace the current picture of global upheaval, unsustainability, and uncertainty with one of an economy that works for all people, and the planet. First, we must eliminate rising income inequality within societies where productivity and wage growth has slowed. Second, we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains. And finally, the short-sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end. The debate over the causes of the broken

economy–laissez-faire government, poorly managed globalization, the rise of technology in favor of the few, or yet another reason–is wide open. Stakeholder Capitalism: A Global Economy that Works for Progress, People and Planet argues convincingly that if we don't start with recognizing the true shape of our problems, our current system will continue to fail us. To help us see our challenges more clearly, Schwab–the Founder and Executive Chairman of the World Economic Forum–looks for the real causes of our system's shortcomings, and for solutions in best practices from around the world in places as diverse as China, Denmark, Ethiopia, Germany, Indonesia, New Zealand, and Singapore. And in doing so, Schwab finds emerging examples of new ways of doing things that provide grounds for hope, including: Individual agency: how countries and policies can make a difference against large external forces A clearly defined social contract: agreement on shared values and goals allows government, business, and individuals to produce the most optimal outcomes Planning for future generations: short-sighted presentism harms our shared future, and that of those yet to be born Better measures of economic success: move beyond a myopic focus on GDP to more complete, human-scaled measures of societal flourishing By accurately describing our real situation, Stakeholder Capitalism is able to pinpoint achievable ways to deal with our problems. Chapter by chapter, Professor Schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and–country by country, company by company, and citizen by citizen–glue them back together in a way that benefits us all.

World Economic Situation and Prospects 2022 - Department of Economic and Social Affairs 2022-01-13

This is the United Nations definitive report on the state of the world economy, providing global and regional economic outlook for 2022 and 2023. COVID-19 and global food security - Swinnen, Johan, ed. 2020-07-27

The coronavirus pandemic has sparked not only a health crisis but also an economic crisis, which together pose a serious threat to food security, particularly in poorer countries. COVID-19 & Global Food Security brings together a groundbreaking series of IFPRI blog posts looking at the impacts of COVID-19 and the policy responses. IFPRI researchers and guest bloggers provide key insights and analysis on how the global pandemic is affecting global poverty and food security and nutrition, food trade and supply chains, gender, employment, and a variety of policy interventions, as well as reflections on how we can use these lessons to better prepare for future pandemics. These pieces draw on a combination of conceptual arguments, global and country-level simulation models, in-country surveys, case studies, and expert opinions. Together, they present a comprehensive picture of the current and potential impact of COVID-19 and the world's policy

responses on global food and nutrition security.

New Frontiers in Free Trade - Razeen Sally 2008

Author Razeen Sally explores the spread of protectionist reactions to globalization and their increasingly negative impact on trade and commerce.

Our Common Agenda - Report of the Secretary-General - United Nations 2021-09-10

On the seventy-fifth anniversary of the United Nations, the world has faced its biggest shared test since the Second World War in the coronavirus disease (COVID-19) pandemic. Yet while our welfare, and indeed the permanence of human life, depend on us working together, international cooperation has never been harder to achieve. This report answers a call from UN Member States to provide recommendations to advance our common agenda and to respond to current and future challenges. Its proposals are grounded in a renewal of the social contract, adapted to the challenges of this century, taking into account younger and future generations, complemented by a new global deal to better protect the global commons and deliver global public goods. Through a deepening of solidarity—at the national level, between generations, and in the multilateral system—Our Common Agenda provides a path forward to a greener, safer and better future.

Model Rules of Professional Conduct - American Bar Association. House of Delegates 2007

The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Democratic Decay and Authoritarian Resurgence - Lindstaedt, Natasha 2021-05-28

Why do democracies fall apart, and what can be done about it? This book introduces students to the concept and causes of democratic decay in the modern world.

Illustrating the integral link between public commitment to democratic norms and the maintenance of healthy democracies, it examines the key factors in decaying democracies, including: • Economic inequality; • Corruption; • Populist and authoritarian discourse; • Declining belief in political institutions and processes. Drawing on real-world developments, and including international case

studies, the book outlines the extent to which there is a 'democratic recession' in contemporary politics and shows how transnational networks and technology are impacting on this development.

The American Yawp - Joseph L. Locke 2019-01-22

"I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world."—Walt Whitman, "Song of Myself," Leaves of Grass The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans. The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

God's Endgame for Planet Earth - Derek Mailhiot 2019-12-02

The Second Coming of Jesus Christ will be the most spectacular event in human history! In God's Endgame for Planet Earth, the events which precede, accompany, and come after the Second Coming are thoroughly examined in easy to understand plain language. Learn what the Bible actually says about the end-time events. Who are the Antichrist, the False Prophet, and the Kings from the East? Who are the Two Witnesses and the 144,000? What happens during the Great Tribulation? When does the Rapture happen? In the aftermath of the Battle of Armageddon, Jesus returns as the "Warrior Messiah" to rule the nations for 1,000 years. Jesus finds a world which has been devastated by war, famine, and disease -- in utter economic and environmental chaos. He literally returns to save mankind from extinction, and will rule by force to end war, injustice, and poverty. But the nations ultimately reject Christ's rule, and wage war against Him in the infamous Battle of Gog and Magog. So, is the Millennium really a time of peace and prosperity predicted by so many? What really happens during the Millennium? What is the purpose of the Millennium? And do God's people really spend eternity in Heaven, or do they spend eternity on earth in New Jerusalem as the book of Revelation predicts? CONTENTS Chapter 1: The Greatest Event in Human History! Financial Crises and Recession in the Global Economy - Roy E. Allen 1994
Explains the rise and fall of economies in Asia, Central America, and Europe since 1980, and discusses these crises in the context of continuing economic globalization. Examines the impact of new uses and forms of money, and new financial flows such as electronic moneys and offshore financial markets, showing how the US economy has benefited from money-mercantilism at the expense of other regions of the world. Provides a taxonomy of common patterns of current crises, and provides policy recommendations for global financial actors. This second edition details changes in the global situation since the first edition was published in 1994. The author is professor of economics at St. Mary's College of California. Global Economic Prospects, June 2021 - World Bank 2021-08-03
The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development. Prominent among the necessary policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.

The Fourth Industrial Revolution - Klaus Schwab 2017-01-03

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab

argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

Development and Social Change - Philip McMichael 2000-02-15

The Second Edition of this popular textbook has been conceptually reworked to take account of the instabilities underlying the project of global development. While the conceptual framework of viewing development as shifting from a national, to a global, project remains, new issues such as the active engagement in the development project by Third World elites and peoples are considered. The first four chapters cover the rise and fall of the "development project" around the world. The next three cover the period of globalization, from the mid 1980s onwards. The final two chapters rethink globalization and development for the 21st century. Throughout, extensive use is made of case studies.

Poverty and Shared Prosperity 2020 - World Bank 2020-12-23

This edition of the biennial Poverty and Shared Prosperity report brings sobering news. The COVID-19 (coronavirus) pandemic and its associated economic crisis, compounded by the effects of armed conflict and climate change, are reversing hard-won gains in poverty reduction and shared prosperity. The fight to end poverty has suffered its worst setback in decades after more than 20 years of progress. The goal of ending extreme poverty by 2030, already at risk before the pandemic, is now beyond reach in the absence of swift, significant, and sustained action, and the objective of advancing shared prosperity—raising the incomes of the poorest 40 percent in each country—will be much more difficult. Poverty and Shared Prosperity 2020: Reversals of Fortune presents new estimates of COVID-19's impacts on global poverty and shared prosperity. Harnessing fresh data from frontline surveys and economic simulations, it shows that pandemic-related job losses and deprivation worldwide are hitting already poor and vulnerable people hard, while also shifting the profile of global poverty to include millions of

'new poor.' Original analysis included in the report shows that the new poor are more urban, better educated, and less likely to work in agriculture than those living in extreme poverty before COVID-19. It also gives new estimates of the impact of conflict and climate change, and how they overlap. These results are important for targeting policies to safeguard lives and livelihoods. It shows how some countries are acting to reverse the crisis, protect those most vulnerable, and promote a resilient recovery. These findings call for urgent action. If the global response fails the world's poorest and most vulnerable people now, the losses they have experienced to date will be minimal compared with what lies ahead. Success over the long term will require much more than stopping COVID-19. As efforts to curb the disease and its economic fallout intensify, the interrupted development agenda in low- and middle-income countries must be put back on track. Recovering from today's reversals of fortune requires tackling the economic crisis unleashed by COVID-19 with a commitment proportional to the crisis itself. In doing so, countries can also plant the seeds for dealing with the long-term development challenges of promoting inclusive growth, capital accumulation, and risk prevention—particularly the risks of conflict and climate change.

European Union Law - Alina Kaczorowska 2013

Fully revised and updated, the third edition of EU Law provides an exhaustive, yet easily readable, account of the complex and ever changing subject of EU law. The author gives thorough, authoritative, and up-to-the-minute treatment to the institutional, constitutional and substantive elements of EU Law. The book is unique in that it successfully combines depth of coverage with an excellent selection of supporting case law, making this challenging subject accessible and easy to follow. Case summaries and judgments are highlighted in colour-tinted boxes for ease of reference, and are accompanied by key facts and analysis, often in the light of subsequent developments. The student-friendly approach is enhanced by market-driven pedagogical features, including: *;* Concise outlines, at the beginning of each chapter describing its content; *;* An aide-mèire, often presented in diagrammatic form, at the end of each chapter to highlight and reinforce key points; *;* End of chapter recommended reading lists to facilitate further research; *;* End of chapter problem and essay questions testing the students' ability to apply what they have learnt; and, *;* A map identifying EU Member States, and their accession dates; acceding States; candidate States; and, potential candidate States. The book's companion website offers a range of teaching and learning resources including an interactive timeline of the EU, useful web links, self-test questions and much more. This book is essential reading for those studying EU law on both undergraduate and postgraduate courses and will be of interest to students of political science, social science and business studies. It also provides comprehensive coverage of substantive and procedural EU competition law and thus has its place as a textbook for introductory courses on EU competition law.

OECD Economic Surveys: Switzerland 2013 - OECD 2013-11-21

Handbook of Agricultural Economics - Robert E. Evenson 2009-10-20

Advances in agriculture offer many countries the best and only chance of reducing poverty. Yet economic growth and population increases are driving higher demand for food and rising real prices. What solutions have successfully promoted agriculture? This volume examines national and international food agriculture policies and how they enhance agricultural productivity growth. It provides unique historical reviews on policies and their effects, and it clearly articulates both positive and negative lessons for promoting agriculture lead growth. With chapters written by international authorities, this book recognizes that agriculture is not just about providing food for today, but about growing it in an environmentally sustainable way that can help people work their ways out of poverty. Chapters cover international macro-economic policies and trade, farm structure in developing countries, regional experiences in agriculture, and regional studies on agricultural productivity policies.

Global Trends 2030 - National Intelligence Council 2012-12-01

FULL COLOR PUBLICATION. Global megatrends for the next 20 years and how they will affect the United States. This is the fifth installment in the National Intelligence Council's series aimed at providing a framework for thinking about possible futures and their implications. The report is intended to stimulate strategic thinking about the rapid and vast geopolitical changes characterizing the world today and possible global trajectories during the next 15-20 years by identifying critical trends and potential discontinuities. The authors distinguish between megatrends, those factors that will likely occur under any scenario, and game-changers, critical variables whose trajectories are far less certain. Appropriate for anyone, from business to banks, government to start-ups, technology to teachers and more, this publication helps anticipate where the world will be socially, politically, technically and culturally over the next few decades.

Institutions, Institutional Change and Economic Performance - Douglass C. North 1990-10-26

Continuing his groundbreaking analysis of economic structures, Douglass North develops an analytical framework for explaining the ways in which institutions and institutional change affect the performance of economies, both at a given time and over time. Institutions exist, he argues, due to the uncertainties involved in human interaction; they are the constraints devised to structure that interaction. Yet, institutions vary widely in their consequences for economic performance; some economies develop institutions that produce growth and development, while others develop institutions that produce stagnation. North first explores the nature of institutions and explains the role of transaction and production costs in their development. The second part of the book deals with institutional change. Institutions create the incentive structure in an economy, and organisations will be created to take advantage of the opportunities provided within a given institutional framework. North argues that the kinds of skills and knowledge fostered by the structure of an economy will shape the direction of change and gradually alter the institutional framework. He then explains how institutional development may lead to a path-dependent pattern of development. In the final part of the book, North explains the implications of this analysis for economic theory and economic history. He indicates how institutional analysis must be incorporated into neo-classical theory and explores the potential for the construction of a dynamic theory of long-term economic change. Douglass C. North is Director of the Center of Political Economy and Professor of Economics and History at Washington

University in St. Louis. He is a past president of the Economic History Association and Western Economics Association and a Fellow, American Academy of Arts and Sciences. He has written over sixty articles for a variety of journals and is the author of *The Rise of the Western World: A New Economic History* (CUP, 1973, with R.P. Thomas) and *Structure and Change in Economic History* (Norton, 1981). Professor North is included in *Great Economists Since Keynes* edited by M. Blaug (CUP, 1988 paperback ed.)

The Box - Marc Levinson 2016-04-05

In April 1956, a refitted oil tanker carried fifty-eight shipping containers from Newark to Houston. From that modest beginning, container shipping developed into a huge industry that reshaped manufacturing. But the container didn't just happen. Its adoption required huge sums of money, years of high-stakes bargaining, and delicate negotiation on standards. Now with a new chapter, *The Box* tells the dramatic story of how the drive and imagination of an iconoclastic entrepreneur turned containerization from an impractical idea into a phenomenon that transformed economic geography, slashed transportation costs, and made the boom in global trade possible. -- from back cover.
