Larstan's the Black Book on Corporate Security - Tony Alagna 2005

The statistics are staggering: security losses in the billions, unauthorized computer usage in 50 percent of businesses, \$2 million spent per company on a single virus attack. The Black Book on Corporate Security offers a wide range of solutions to these challenging problems. Written by the brightest minds in the field, each of the essays in this book takes on a different aspect of corporate security. Individual chapters cover such topics as maintaining data safety, fighting online identity theft, managing and protecting intellectual property in a shared information environment, securing content, and much more. Written in clear, intelligible language, the book is designed around a "spy" motif that presents advanced information in a simple, entertaining format. Each spread features an "Insider Notes" sidebar, while the research conducted specifically for the book is displayed in easy-to-read charts accompanied by author analysis. Case studies, a glossary, and a resource index multiply the book's utility.

Phraseology in Foreign Language Learning and Teaching - Fanny Meunier 2008-02-06

This book addresses the key role of phraseology in second language acquisition and instruction. It is divided into three main sections: Extracting and Describing Phraseological Units investigates the role played by native and learner corpora in the extraction and description of multiword units, two initial and crucial steps in informing language pedagogy; Learning Phraseological Units deals with the learning aspect, an oft-neglected yet essential dimension of phraseology in second/foreign language pedagogy, this section also addresses issues in new literacies; and Recording and Exploiting Phraseological Units focuses on pedagogical tools, notably monolingual and bilingual dictionaries and textbooks. This stimulating collection presents cutting edge research in the field and identifies major avenues for future theoretical and applied work. It is of particular relevance to researchers and teachers

interested in the patterned nature of language.
Deep Learning for Coders with fastai and PyTorch -
Jeremy Howard 2020-06-29

Deep learning is often viewed as the exclusive domain of math PhDs and big tech companies. But as this hands-on guide demonstrates, programmers comfortable with Python can achieve impressive results in deep learning with little math background, small amounts of data, and minimal code. How? With fastai, the first library to provide a consistent interface to the most frequently used deep learning applications. Authors Jeremy Howard and Sylvain Gugger, the creators of fastai, show you how to train a model on a wide range of tasks using fastai and PyTorch. You'll also dive progressively further into deep learning theory to gain a complete understanding of the algorithms behind the scenes. Train models in computer vision, natural language processing, tabular data, and collaborative filtering Learn the latest deep learning techniques that matter most in practice Improve accuracy, speed, and reliability by understanding how deep learning models work Discover how to turn your models into web applications Implement deep learning algorithms from scratch Consider the ethical implications of your work Gain insight from the foreword by PyTorch cofounder, Soumith Chintala
