The Big Green Tent -

Ludmila Ulitskaya

2015-11-10

The Big Green Tent epitomizes what we think of when we imagine the classic Russian novel. With epic breadth and intimate detail, Ludmila Ulitskaya's remarkable work tells the story of three school friends who meet in Moscow in the 1950s and go on to embody the heroism, folly, compromise, and hope of the Soviet dissident experience. These three boys—an orphaned poet; a gifted, fragile pianist; and a budding photographer with a talent for collecting secrets—struggle to reach adulthood in a society where their heroes have been censored and exiled. Rich with love stories, intrigue, and a cast of dissenters and spies, *The Big Green Tent*

offers a panoramic survey of life after Stalin and a dramatic investigation into the prospects for individual integrity in a society defined by the KGB. Each of the central characters seeks to transcend an oppressive regime through art, a love of Russian literature, and activism. And each of them ends up face-to-face with a secret police that is highly skilled at fomenting paranoia, division, and self-betrayal. A man and his wife each become collaborators, without the other knowing; an artist is chased into the woods, where he remains in hiding for four years; a researcher is forced to deem a patient insane, damning him to torture in a psychiatric ward. Ludmila Ulitskaya's novel belongs to the tradition of Dostoevsky, Tolstoy, and Pasternak: it is a work consumed with politics, love, and belief—and a revelation of life in dark times.

This New York Times bestseller has been translated into more than thirty languages, has sold nearly a million copies between editions, and has most recently inspired a romantic comedy starring Whitney Cummings and Sofia Vergara. And its profound scientific understanding of the nature and experience of the female brain continues to guide women as they pass through life stages, to help men better understand the girls and women in their lives, and to illuminate the delicate emotional machinery of a love

relationship. Why are women more verbal than men? Why do women remember details of fights that men can't remember at all? Why do women tend to form deeper bonds with their female friends than men do with their male counterparts? These and other questions have stumped both sexes throughout the ages. Now, pioneering neuropsychiatrist Louann Brizendine, M.D., brings together the latest findings to show how the unique structure of the female brain determines how women think, what they value, how they communicate, and who they love. While doing research as a medical student at Yale and then as a resident and faculty member at Harvard, Louann Brizendine discovered that almost all of the clinical data in existence on neurology, psychology, and neurobiology focused exclusively on males. In response to the overwhelming need for information on the

female mind, Brizendine established the first clinic in the country to study and treat women's brain function. In *The Female Brain*, Dr. Brizendine distills all her findings and the latest information from the scientific community in a highly accessible book that educates women about their unique brain/body/behavior. The result: women will come away from this book knowing that they have a lean, mean, communicating machine. Men will develop a serious case of brain envy.

Goble 1997

Since the Brit Chadasha in Yirmeyeh 31:31-34 was given to Orthodox Jews (the passage is found in the Hebrew Bible, is it not?), and since most Orthodox Jews are in New York City, particularly Brooklyn it seems, then it surely must also be appropriate to make available a translation of the Brit Chadasha from the best original manuscripts in language devoid of goyishe (and non-frum) style. The following is a passage from this new translation, specifically from "The Besuras haGeulah According to Mattityahu (Matthew)" chp 28:19-20, and is illustrative of what we at AFII are doing and what we believe:
