[Blowing Up Iberia: British, German and Italian Sabotage in Spain and Portugal](#) - Bernard O'Connor 2020-01-05

During the Second World War, the British military and intelligence agencies had plans in case Germany invaded Spain and Portugal. This involved training British and Spanish agents to be secretly infiltrated to undertake sabotage operations on important lines of communication and liaising with pro-British locals. At the same time the Abwehr, Germany's military intelligence agency, paid young Spanish and Portuguese collaborators to undertake sabotage missions against Allied military and economic targets in Iberia but they had limited success. Italian saboteurs from the Decima Flotiglia MAS were more successful using underwater divers to attack Allied shipping. Using declassified files from Britain's National Archives, autobiographies, biographies and newspaper articles, this documentary history sheds new light on an unusual aspect of Iberian history telling a human story of international diplomacy, political intrigue, secret agents, clandestine warfare, military strategy, nationalism, and deception.

[The Dot On the I In History: Of Gentiles and Jews—a Hebrew Odyssey Scrolling the Internet](#) - Michael B.

Hammer 2017-12-14

The inspiration author Michael B. Hammer received when speaking with others about the Israeli-Palestinian problem led to The Dot on the I in History: On Gentiles and Jews—Scrolling the Internet with the goal of helping others better understand the problem. When the issues involve intertribal, interracial, interreligious, and international human relationships lasting over several generations, they often become so complex one does not see the forest for trees, unless one knows where and when the seeds were planted. That is what history is all about. This book aspires to explain what Judaism, Christianity, and Islam have in common, how they differ, and how they have evolved. You'll also learn how the Internet has affected and changed those involved in the Middle East conflict. With this information, you will have a better understanding of the real reasons for such world-changing events as what took place on 9/11.

Just like today, with high-specification computers being used to design even higher specification models for the next generation, the making of machines to make machines was one of the most important aspects of the Industrial Revolution. The lathe, for example, is the oldest known machine tool and dates back to antiquity, but it wasn't until the late 17th century that such industries as clock making, the building of scientific instruments, furniture and gun makers, began to convert from woodworking lathes to ones that were capable of machining metal. Craftsmen needed precise machines that could shape metal gears, cut metal screws and stamp shapes out of metal, thus enabling others to assemble their products.

This book is Part A of a sequel to my first book published by Pen & Sword at the end of February 2017 entitled 'A Biography of British Train Travel'. In a varied summary of my lifetime of steam locomotive photography and travel it epitomises my love of steam and contains chapters on steam in Great Britain and Europe, including an extensive travel log of my journey to seek out the last of Spanish and Portuguese steam in the 1970s. This book has 90 pages and is profusely illustrated throughout with high quality colour and black and white photographs

**Beyond Business Analytics** - Eliezer Geisler 2022-09-02

This book explores the role that data analysis plays in the managerial decision-making process. The author presents the notion of "beyond analytics," which proposes that through data collection managers evaluate patterns in business processes through models of cognitive representation, framing and modeling, and knowledge creation in businesses. The book focuses on how the massive amounts of business data can be reduced to manageable volumes, thus allowing managers to make informed decisions. Further, it relates beyond analytics to HR aspects of the business and succession planning. This book will inform organizational behavioral theorists how the management of data impacts the decision-making process in organizations.

**Great Continental Railway Journeys** - Michael Portillo 2015-10-22

Great Continental Railway Journeys is now a firmly established series on BBC2, following in the illustrious tracks of its predecessor - Great British Railway Journeys. Both series are fronted by ex-politician Michael Portillo and in this European odyssey he travels around continental Europe, using George Bradshaw's 1913 Continental Railway Guide. Now coming up for its fourth instalment this autumn, Portillo guides the train-travelling fan across Europe arriving at a myriad of magical and historically fascinating cities we all dream of travelling to by train. From London, to Paris, Bordeaux, Lyon, Copenhagen, Oslo, Lisbon, Madrid, Berlin, Monte Carlo, Prague, Munich, Zurich, Rome, Budapest, St Petersburg; all the way down to Constantinople, Haifa and Jerusalem - Portillo describes the great feats of engineering that built the various railway lines connecting Europe and further afield and the men and women who made these journeys famous through their deeds and words. The new series (6x1-hour) will transmit in early November 2015, and this book will be the official, lavishly illustrated tie-in covering every single journey Portillo has undertaken across Europe. Capturing all the colour, beauty, excitement and fervour of journeying across this historic continent can muster. A must-have purchase for any armchair fan of unique and award-winning travel programming.

People and Industries - W.H. Chaloner 2018-01-10

Dr Chaloner considers economic history to be a branch of what the French call the historical sciences and believes that it is impossible to treat usefully of the rise, decline and metamorphosis of industries and economics without some consideration of the part played by the efforts of individual men and women in these processes. In this collection of essays, first published in 1963, he provides biographies of certain entrepreneurs, inventors and engineers together with historical surveys of some vital industries.
