Law, Localism, and the Constitution - John Stanton 2023-03-24

Local government affects us all. Wherever we live, in towns, cities, villages or in the smallest of communities, there are locally elected councils tasked with representing people's interests in the running of the local area. This involves, inter alia, providing public services, maintaining local spaces and acting as a level of democratic governance within the broader constitutional and executive structure of the state. To fulfil these responsibilities, though, local government must be democratically legitimate; it must have at its disposal reasonable means and resources to function; and it must enjoy a healthy and balanced relationship with central government. This book explores and analyses the extent to which local government in the different parts of the UK is able to function effectively and democratically. It draws from local councillors' views in analysing the state of local government under the current constitutional and governmental arrangements, discussing issues such as councils' relationship with central government; citizen engagement; finance and public services; and the impact of recent reforms. It contrasts and compares the

different approaches adopted in England, Scotland, Wales and Northern Ireland, also setting out and discussing possible reforms of local government in the United Kingdom. While the focus is on the UK, the work includes a comparison with other relevant jurisdictions.

Public Private Partnerships and Constitutional Law - Nikiforos Meletiadis 2018-12-10

Annually, the government commits significant expenditure to a type of public contracts which are known as Public-Private Partnerships (PPPs) or the Private Finance Initiative (PFI). These contracts bind the public purse for decades in sectors such as Health, Defence and Detention, and involve the assignment of a significant role to the private sector in the provision of public services. This book explores the controversial subject of the public accountability of these contracts, and the corresponding large sums of public money involved. It explains how public accountability works for PPPs and the PFI, and it argues that it should be provided as part of the Economic Constitution. Drawing comparative understandings from the UK and the USA constitutional legal traditions, the book investigates public accountability from the perspective of the Economic Constitution, focusing on three accountability criteria - legal, accounting and administrative. In doing so, it provides an analysis which informs both from the perspective of academic research and from that of legal and consulting practice.

Constitutional and Administrative Law - Hilaire Barnett 2002-07-29

Much of the extensive programme of constitutional reform commenced by the current government has been achieved. Devolution is now well established, reforms to the electoral process and political party funding have been addressed, a Freedom of Information Act has been enacted and the House of Lords has been partially reformed. Of the reforms the most significant and far-reaching is the introduction of the Human Rights Act 1998, the impact of which has been felt across numerous areas of domestic law. The fourth edition of Hilaire Barnett's popular textbook provides a timely and comprehensive update on the impact of these reforms. It provides a clear exposition of the major features of the UK's constitution and a comprehensive summary of recent developments. The book has been consciously designed to meet the needs of students undertaking a constitutional and administrative law course, whether full or part time, and provides comprehensive coverage of the syllabus drawn from a wide range of sources

British Politics - Bill Jones 2020-11-03

Fully updated and expanded, the second edition of this still compact text on British politics expertly analyses the major changes in British political life, placing them revealingly within the context of the evolution of British society from absolute monarchy to representative democracy. The book includes two new chapters on the EU referendum and Brexit, and the extraordinary December 2019 election, as well as coverage of events such as the coronavirus pandemic, and the respective travails of the increasingly split two major political parties. This readable and comprehensive introduction will be of key interest to A-level students, undergraduates and those new to the study of British politics.

Financial Management and Accounting in the Public Sector - Gary Bandy 2023-03-14

The importance of public financial management for the health and wellbeing of citizens became dramatically apparent as governments sought to respond to the coronavirus pandemic in 2020. Now, governments and other public sector organizations face the challenge of recovering from the pandemic whilst also seeking to achieve Sustainable Development Goals, with squeezed budgets and ever-increasing

demands for public services. Public sector managers are confronted daily with targets and demands that are often set in confusing accounting and financial language. In *Financial Management and Accounting in the Public Sector*, Gary Bandy employs a clear and concise narrative to introduce the core concepts of public financial management to help those managers to deliver programmes, projects and services that are value for money. As the author puts it, managing public money is an art, not a science. This third edition has been revised and updated throughout, offering:

- a structure that is more clearly linked to the stages of the public financial management cycle;
- greater coverage of transparency and accountability issues;
- a broader view of public procurement to include goods, works and services and effective contract management;
- and • an increased focus on public spending in the context of a post-COVID environment.

With a glossary of terms to help managers understand and be understood by accountants, as well as learning objectives, discussion questions and exercises, this practical textbook will help students of public management and administration to understand the financial and accounting aspects of managing public services.

It also looks at the possible future of administrative law in an increasingly automated and digitalised world.
