QUANTITATIVE APTITUDE AND REASONING - R.V. PRAVEEN

2016-07-30

This book, now in its Third Edition, is revised as per the feedback received from our valuable students and readers. It is exclusively prepared for the students who wish to appear for campus recruitment screening test and graduate/post graduate students appearing for various competitive examinations in Quantitative Aptitude and Reasoning. The main objective of this volume is to guide the students to solve the problems within the stipulated time and that too with the higher degree of accuracy. Organized in two parts—Quantitative Aptitude (Part I) and Reasoning (Part II)—it helps students to apply basic mathematical and reasoning concepts to a range of quantitative and reasoning problems. The separate sections are devoted to verbal and nonverbal reasoning. It sharpens the ability to apply analytical and logical thinking while gathering and analysing information, designing and testing solutions to problems, and formulating plans. This book is a valuable resource for conducting training programmes/workshops to train students in problem solving techniques in Mathematical Aptitude. It would equally be useful to the candidates appearing for quantitative aptitude and reasoning test conducted in various competitive examinations of graduate level.

When is Separate Unequal? - Ruth Colker 2008-11-17

This book does not start from the premise that separate is inherently unequal. Writing from an 'anti-subordination perspective', Professor Colker provides a framework for the courts and society to consider what programs or policies are most likely to lead to substantive equality for individuals with disabilities. In some contexts, she argues for more tolerance of disability-specific programs and, in other contexts, she argues for more disability-integrated programs. Her highly practical investigation includes the topics of K-12 education, higher education, employment, voting, and provision of health care. At the end of the book, she applies this perspective to the racial arena, arguing that school districts should be given latitude to implement more use of racial criteria to attain integrated schools because such environments are most likely to help attain substantive equality from an anti-subordination perspective. The book measures the attainment of equality not on the basis of worn-out mantras but instead on the basis of substantive gains.

Logical Reasoning - Bradley Harris Dowden 1993

This book is designed to engage students' interest and promote their writing abilities while teaching them to think critically and creatively. Dowden takes an activist stance on critical thinking, asking students to create and revise arguments rather than simply recognizing and criticizing them. His book emphasizes inductive reasoning and the analysis of individual claims in the beginning, leaving deductive arguments for consideration later in the course.

Recent Developments in Machine Learning and Data Analytics - Jugal Kalita 2018-09-11

This book presents high-quality papers from an international forum for research on computational approaches to learning. It includes current research and findings from various research labs, universities and institutions that may lead to development of marketable products. It also provides solid support for these findings in the form of empirical studies, theoretical analysis, or comparison to psychological phenomena. Further, it features work that shows how to apply learning methods to solve important application problems as well as how machine learning research is conducted. The book is divided into two main parts: Machine Learning Techniques, which covers machine learning-related research and findings; and, Data Analytics, which introduces recent developments in this domain. Additionally, the book includes work on data analytics using machine learning techniques.
