Maritime Technology and Engineering III - Carlos Guedes Soares 2016-12-01
Maritime Technology and Engineering 3 is a collection of papers presented at the 3rd International Conference on Maritime Technology and Engineering (MARTECH 2016, Lisbon, Portugal, 4-6 July 2016). The MARTECH Conferences series evolved from biannual national conferences in Portugal, thus reflecting the internationalization of the maritime sector. The keynote lectures and the papers, making up nearly 150 contributions, came from an international group of authors focused on different subjects in a variety of fields: Maritime Transportation, Energy Efficiency, Ships in Ports, Ship Hydrodynamics, Ship Structures, Ship Design, Ship Machinery, Shipyard Technology,afety & Reliability, Fisheries, Oil & Gas, Marine Environment, Renewable Energy and Coastal Structures. This book will appeal to academics, engineers and professionals interested or involved in these fields.

Tornado - Kimble D. McCutcheon 2001
"In the 1930s, when gas turbines were practically unknown, engine designers worldwide struggled to create a new and more powerful generation of aircraft engines. It was hoped these engines would push aircraft to speeds of more than 500 miles per hour. One such engine, the Tornado, was a remarkable 42-cylinder liquid-cooled radial conceived by the Wright Aeronautical Corporation."--Page 4 of cover.

Implementing the Circular Economy for Sustainable Development - Hans Wiesmeth 2020-11-13

Implementing the Circular Economy for Sustainable Development presents the concept of the circular economy with the goal of understanding its present status and how to better implement it, particularly through environmental policies. It first tackles the definition of a circular economy in the context of sustainability and the differences in defining the concept across disciplines, including its fallibilities and practical examples. It then goes on to discuss the implementation of a circular economy, including the increasing variety of technological, mechanical, and chemical procedures to contend with and the need for stakeholder support in addition to improved business models. The second half of the book, therefore, presents tools, approaches, and practical examples of how to shape environmental policy to successfully implement a circular economy. It analyzes deficiencies of current regulations and lays the groundwork for the design of integrated environmental policies for a circular economy. Authored by an expert in environmental economics with decades of experience, Implementing the Circular Economy for Sustainable Development is a timely, practical guide for sustainability researchers and policymakers alike to move more efficiently toward a circular economy and sustainable

development. Presents a clear view of the critical components, features, and issues of a circular economy. Discusses a variety of practical examples from current policies in the context of a circular economy to better understand the challenges associated with its implementation. Analyzes strengths and weaknesses of

current environmental policies and their interactions with innovations in engineering and science
