Thinking about Architecture - Colin Davies 2011-10-17

In order to understand architecture in all its cultural complexity it is necessary to grasp such basic concepts as representation, form and space. The aim of this book is to provide teachers, students, practising architects and general readers with a set of ideas that will enrich their conversation, their writing, and above all their thinking about architecture. The book is divided into eight chapters, each covering a particular aspect of architecture, and introduces difficult concepts gradually.

Architectural theorists and philosophers are mentioned in passing and their works are listed in the bibliography, but they are not the subject of the book. Architecture, rather than philosophy, is at the centre of the picture. The aim is to enable the reader to understand architecture in all its aspects, rather than to learn the names of particular theorists. Written in a conversational style, Thinking about Architecture is an invaluable and accessible standard introduction to architectural theory.

Revolutionary Beauty - Sabine Kriebel
2014-02-21

"It is difficult to write brilliantly about humor, more difficult to write engagingly about humor and politics, and more difficult still to write with precision about humor, politics, and art. *Revolutionary Beauty* is indispensable for understanding the singular genius of John Heartfield, the Weimar era avant-garde virtuoso whose photomontages created a new visual language for destabilizing and ridiculing Nazism's rise and triumph." --Anson Rabinbach, Professor of History at Princeton University and author of *The Third Reich Sourcebook* "Historically precise and theoretically astute, this is by far the most wide-ranging study of John Heartfield's extraordinary project to date. Sabine Kriebel goes beyond a single oeuvre to unearth, patiently but provocatively, the complex visual imaginary of the Left in the darkest moments of its history." --Frederic J. Schwartz, author of *Blind Spots: Critical Theory and the History of Art in Twentieth-Century Germany* and *The Werkbund: Design Theory and Mass Culture Before the First World War* "This book by Sabine Kriebel fills a void in an exemplary mode of critical cultural scholarship, promising to take a major place in the fields of 20th century photography, mass media, European cultural studies and modern art. I laud the unprecedented depth of analysis in her probing of specific images and their particular relation to ever-changing events in this period. Attention to this book will radiate centripetally, engaging the interest of a new generation of avid and often extra-mural dissenters in this age of new crisis, potentially serving as historic handbook for the Occupy generation." --Sally Stein, Emerita

Kiwi Compañeros - Mark Derby 2009
"The first ever account of New Zealand's role in the civil war that tore Spain apart during 1936-39 and became a ruthless rehearsal for World War Two. From more than 50 countries, volunteers arrived in Spain to take sides. This book records the actions of the New Zealanders, including those who worked for the Spanish cause at home. It draws on recently released military documents and previously unpublished photographs to tell the all-but-forgotten story of those who chose to enter a crucial conflict on the far side of the world." --Back cover.

Live Cinema and Its Techniques -
Francis Ford Coppola 2017-09-26
From a master of cinema comes this "gold mine of a book . . . a rocket ride to the potential future" of filmmaking (Walter Murch). Celebrated as an "exhilarating account" of a revolutionary new medium (Booklist), Francis Ford Coppola's indispensable guide to live cinema is a boon for moviegoers, film students, and teachers alike. As digital movie-making, like live sports, can now be performed by one director—or by a collaborative team online—it is only a matter of time before cinema auteurs will create "live" movies to be broadcast instantly in faraway theaters. "Peppered with brilliant personal observations" (Wendy Doniger), *Live Cinema and Its Techniques* offers a behind-the-scenes look at a consummate career: from Coppola's formative boyhood obsession with live 1950s television shows and later attempts to imitate the spontaneity of live performance on set, the book usefully includes a guide to presenting state-of-the-art

techniques on everything from rehearsals to equipment. A testament to Coppola's prodigious enthusiasm for reinvigorating the form, *Live Cinema* is an indispensable guide that "reenergizes . . . the search for a new way of storytelling" (William Friedkin).

Finding Flow - Mihaly Csikszentmihalyi 2020-03-03

From one of the pioneers of the scientific study of happiness, an indispensable guide to living your best life. What makes a good life? Is it money? An important job? Leisure time? Mihaly Csikszentmihalyi believes our obsessive focus on such measures has led us astray. Work fills our days with anxiety and pressure, so that during our free time, we tend to live in boredom, watching TV or absorbed by our phones. What are we missing? To answer this question, Csikszentmihalyi studied thousands of people, and he found the key. People are happiest when they challenge themselves with tasks that demand a high degree of skill and commitment, and which are undertaken for their own sake. Instead of watching television, play the piano. Take a routine chore and figure out how to do it better, faster, more efficiently. In short, learn the hidden power of complete engagement, a psychological state the author calls flow. Though they appear simple, the lessons in *Finding Flow* are life-changing.

The Third Wave - Alvin Toffler
2022-01-04

From the author of *Future Shock*, a striking way out of today's despair . . . a bracing, optimistic look at our new potentials. The *Third Wave* makes startling sense of the violent changes now battering our world. Its sweeping synthesis casts fresh light on our new forms of marriage and family, on today's dramatic changes in business and economics. It explains the role of cults, the new definitions of work, play, love, and success. It points toward new forms of twenty-first-century democracy. Praise for *The Third Wave*

"Magnificent . . . an astonishing array of information."—The Washington Post "Imperishably fresh."—Business Week "Will mesmerize readers, and rightly so."—Vogue "Alvin Toffler . . . has written another blockbuster . . . a powerful book."—The Guardian "Fresh ideas, clearly explained. . . . Toffler has proven again that he is a master."—United Press International "Toffler has imagination and an ability to think of various future possibilities by transcending prevailing values, assumptions and myths."—Associated Press "Once you have walked into his version of the future, you may decide never again to whitewash some of the built-in frailties of the real present."—Financial Post "Rich, stimulating and basically optimistic . . . will unquestionably aid many to a greater understanding of [today's] puzzling social changes."—The Globe & Mail "A detailed breathtakingly bold projection of the social changes required if we are to survive. . . . Toffler's vision of a democratic, self-sustaining utopia is a brave alternative to recent grim warnings."—Cosmopolitan

Very Truly Yours, Nikola Tesla - Nikola Tesla 2015-08-24

Nikola Tesla was a man of letters. He wrote many letters to the editors of the magazines and newspapers of his day. These letters give a fascinating glimpse into the mind of an eccentric genius. Collected here for the first time are more than forty of Nikola Tesla's letters. The subject matter ranges widely, as Tesla was interested in almost everything. In these letters he responds to Marconi

and Edison, gives his thoughts on the wars of his day, corrects inconsistencies in news reports, and much much more. Nikola Tesla has been called the most important man of the 20th Century. Without Tesla's ground-breaking work we'd all be sitting in the dark without even a radio to listen to.

The Problem of Increasing Human Energy - Nikola Tesla 2019-02-27

NIKOLA TESLA was a gifted electrical

and mechanical engineer, and was one of the most influential inventors of the last century. Eventually holding over 700 patents, Tesla worked in a number of fields, including electricity, robotics, radar, and the wireless transmission of energy. His discoveries laid the groundwork for many of the twentieth century's greatest technological advances. This book contains Tesla's thoughts on humanity's relationship with the universe, and also his explanation and scientific extrapolation on the technological advancements embodied in his work. This text, first published in Century Illustrated Magazine in June 1900, is yet another example of the genius of Nikola Tesla. CONTENTS Introduction • The onward movement of humanity • The energy of the movement • The three ways of increasing human energy 1 • The first problem: how to increase human mass • The burning of atmospheric nitrogen 2 • The second problem: how to reduce the force retarding the human mass • The art of telautomatics 3 • The third problem: how to increase the force accelerating the human mass • The harnessing of the Sun's energy 4 • The source of human energy • The three ways of drawing energy from the Sun 5 • Great possibilities offered by iron for increasing human performance • Enormous waste in iron manufacture 6 • Economical production of iron by a new process 7 • The coming of age of aluminium • The doom of the copper industry • The great civilizing potency of the new metal 8 • Efforts toward obtaining more energy from coal • Electric transmission • The gas engine • The cold-coal battery 9 • Energy from the medium • The windmill and the solar engine • Motive power from terrestrial heat • Electricity from natural sources 10 • A departure from known methods • The possibility of a 'self-acting' engine or machine • The ideal way of obtaining motive power 11 • First efforts to produce the self-acting engine • The mechanical oscillator • The work of Dewar and Linde • Liquid air 12 • Discovery of unexpected properties of the atmosphere • Strange experiments • Transmission of electrical energy

through one wire without return.
Transmission through the Earth
without any wire 13 • Wireless
telegraphy • The secret of tuning.
Errors in the Hertzian
investigations • A receiver of
wonderful sensitivity 14 • Development
of a new principle • The electrical
oscillator • Production of immense
electrical movements • The Earth
responds to man • Interplanetary
communication now probable 15 •
Transmission of electrical energy to
any distance without wires now
possible • The best means of
increasing the force accelerating the
human mass

A Brief History of Curating - Hans
Ulrich Obrist 2008
This bestseller is now available in
its 6th reprinted edition! This
publication, now in its 6th reprinted
edition, is dedicated to pioneering
curators and presents a unique
collection of interviews by Hans
Ulrich Obrist: Anne d'Harnoncourt,
Werner Hofman, Jean Leering, Franz
Meyer, Seth Siegelaub, Walter Zanini,
Johannes Cladders, Lucy Lippard,
Walter Hopps, Pontus Hultén, and
Harald Szeemann are gathered together
in this volume. The contributions map
the development of the curatorial
field, from early independent
curating in the 1960s and 1970s and
the experimental institutional
programs developed in Europe and in
the USA at this time, through
Documenta and the development of

biennales. This book is part of the
