Equal Educational Opportunity Project Series - United States Commission on Civil Rights 1996

The Standard Periodical Directory - 1966

The U.S. Army/Marine Corps Counterinsurgency Field Manual - John A. United States Army 2008-09-15

When the U.S. military invaded Iraq, it lacked a common understanding of the problems inherent in counterinsurgency campaigns. It had neither studied them, nor developed doctrine and tactics to deal with them. It is fair to say that in 2003, most Army officers knew more about the U.S. Civil War than they did about counterinsurgency. The U.S. Army / Marine Corps Counterinsurgency Field Manual was written to fill that void. The result of unprecedented collaboration among top U.S. military experts, scholars, and practitioners in the field, the manual espouses an approach to combat that emphasizes constant adaptation and learning, the importance of decentralized decision-making, the need to understand local politics and customs, and the key role of intelligence in winning the support of the population. The manual also emphasizes the paradoxical and often counterintuitive nature of counterinsurgency operations: sometimes the more you protect your forces, the less secure you are; sometimes the more force you use, the less effective it is; sometimes doing nothing is the best reaction. An new introduction by Sarah Sewall, director of the Carr Center for Human Rights Policy at Harvard's Kennedy School of Government, places the manual in critical and historical perspective, explaining the significance and potential impact of this revolutionary challenge to conventional U.S. military doctrine. An attempt by our military to redefine itself in the aftermath of 9/11 and the new world of international terrorism, The U.S. Army / Marine Corps Counterinsurgency Field Manual will play a vital role in American military campaigns for years to come. The University of Chicago Press will donate a portion of the proceeds from this book to the Fisher House Foundation, a private-public partnership that supports the families of America's injured servicemen. Electronics Buying Guide - Consumer Reports 2007-09-18

This new edition is sure to help consumers select the right electronics product for their needs. Experts provide hundreds of smart ways to save money and find the best values in computers, plasma televisions, cell phones and service, cameras, DVD players, and more.

Wound Care - Carrie Sussman 2007

Designed for health care professionals in multiple disciplines and clinical settings, this comprehensive, evidence-based wound care text provides basic and advanced information on wound healing and therapies and emphasizes clinical decision-making. The text integrates the latest scientific findings with principles of good wound care and provides a complete set of current, evidence-based practices. This edition features a new chapter on wound pain management and a chapter showing how to use negative pressure therapy on many types of hard-to-heal wounds. Technological advances covered include ultrasound for wound debridement, laser treatments, and a single-patient-use disposable device for delivering pulsed radio frequency.

Guidelines Manual - United States Sentencing Commission 1988-10

InfoWorld - 1984-06-25

InfoWorld is targeted to Senior IT professionals. Content is segmented into Channels and Topic Centers. InfoWorld also celebrates people, companies, and projects.

PC Mag - 1987-03-31

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

The Litigation Manual - John G. Koeltl 1999

Military Occupational Classification and Structure - 1994

Therapeutic Plasma Exchange - H.-J. Gurland 2012-12-06

This volume contains papers and discussions of the VIth Dialyse-Arzte Workshop, which was held in Bernried at Lake Starnberg near Munich the 5th and 6th of March 1980. Generously sponsored by Travenol, Munich, the Dialyse-Arzte meetings now have a tradition spanning 16 years. According to the constitution of these meetings, the topics of earlier years had to cover dialysis and related fields. Thus the sponsor requested that this year also one lecture - incorporated here as part - should deal with the state of art of dialysis, thereby hopefully linking this Workshop to the previous meetings. Dialysis techniques of the 1960s, pioneered by many of attending speakers and panelists (see List of Contributors), have never come to a standstill. Indeed, vascular access and extra corporeal circulation have become routine for the nephrologist and have made possible the introduction of new approaches, such as hemofiltration and hemoperfusion. Also today new membrane technologies provide us with a potentially even more effective therapeutic tool, namely plasma separation.

Bookseller - 1891

Vols. for 1871-76, 1913-14 include an extra number, The Christmas bookseller, separately paged and not included in the consecutive numbering of the regular series.

Hip and Knee Pain Disorders - Various 2022-06-21

Hip and Knee Pain Disorders has been written to provide a state-of-the-art, evidence-informed and clinically-informed overview of the examination and conservative management of hip/knee pain conditions. Under the current predominantly evidence-based practice paradigm, clinician expertise, patient preference, and best available research determine examination, and prognostic and clinical management decisions. However, this paradigm has been understood by many to place greater value and emphasis on the research component, thereby devaluing the other two. Evidence-informed practice is a term that has been suggested to honor the original intent of evidence-based practice, while also acknowledging the value of clinician experience and expertise. In essence, evidence-informed practice combines clinical reasoning, based on current best evidence, with authority-based knowledge and a pathophysiological rationale derived from extrapolation of basic science knowledge. Unlike other published textbooks that overemphasize the research component in decision-making, this book aims to address the clinical reality of having to make decisions on the management of a patient with hip/knee pain, in the absence of a comprehensive scientific rationale, using other sources of knowledge. It offers an evidence-informed textbook that values equally research evidence, clinician expertise and patient preference. The book is edited by three recognised world leaders in clinical research into manual therapy and chronic pain. Their research activities are concentrated on the evidence-based management of musculoskeletal pain conditions using conservative interventions. For this book they have combined their knowledge and clinical expertise with that of 38 additional contributors, all specialists in the field. The contributors include a mix of clinicians and clinician-researchers. Hip and Knee Pain Disorders is unique in bringing together manual therapies and exercise programs in a multimodal approach to the management of these pain conditions from both a clinical, but also evidence-based, perspective. It acknowledges the expanding direct access role of the physical therapy profession. The book provides an important reference source for clinicians of all professions interested in conservative management of the hip and knee regions. It will also be useful as a textbook for students at both entry and post-graduate level.
