Recent Advances in Iterative Methods - Gene Golub 2012-12-06

This IMA Volume in Mathematics and its Applications RECENT ADVANCES IN ITERATIVE METHODS is based on the proceedings of a workshop that was an integral part of the 1991-92 IMA program on "Applied Linear Algebra. " Large systems of matrix equations arise frequently in applications and they have the property that they are sparse and/or structured. The purpose of this workshop was to bring together researchers in numerical analysis and various application areas to discuss where such problems arise and possible methods of solution. The last two days of the meeting were a celebration dedicated to Gene Golub on the occasion of his sixtieth birthday, with the program arranged by Jack Dongarra and Paul van Dooren. We are grateful to Richard Brualdi, George Cybenko, Alan George, Gene Golub, Mitchell Luskin, and Paul Van Dooren for planning and implementing the year-long program. We especially thank Gene Golub, Anne Greenbaum, and Mitchell Luskin for organizing this workshop and editing the proceedings. The financial support of the National Science Foundation and the Minnesota Supercomputer Institute made the workshop possible. A vner Friedman Willard Miller, Jr. xi PREFACE The solution of very large linear algebra problems is an integral part of many scientific computations.

Shilappadikaram - Iḷaṅkōvaṭikaḷ 1965

The peerless young Kovalan leaves his loyal wife Kannaki for the courtesan Madhavi, and though he returns to her, he still meets his death because of her ill-omened ankle bracelet. The Shilappadikaram has been called an epic and even a novel, but it is also a book of general education. Adigal packed his story with information: history merging into myth, religious rites, caste customs, military lore, descriptions of city and country life. And four Cantos are little anthologies of the poetry of the period (seashore and mountain songs, hunters and milkmaid s song). Thus the story gives us a vivid picture of early Indian life in all its aspects.
