Understanding Mega Free Trade Agreements - Jean-Baptiste Velut 2017-08-23

The rise of cross-regional trade agreements is a defining trend of the current international trade system as shown by the signing of the Trans-

Pacific Partnership (TPP) in 2015, the negotiations for the Transatlantic Trade and Investment Partnership (TTIP) between the USA and the EU as well as the Regional Comprehensive Economic Partnership (RCEP) between countries in Asia and Oceania. These differ from previous agreements in their economic significance and large geographic scale, and the wide scope of trade-related issues.

The current rise of nationalist and isolationist ideologies across Europe and the USA has raised questions on the future of cross-regional trade deals and made the need to understand their implications for economic and political governance ever more urgent. Two main forms of governance that are central to this volume are the democratic tensions over new generation trade deals on the one hand, and their geopolitical ramifications on the other, which have come into collision to herald the advent of a highly uncertain period of world politics. Many of the questions tackled in this volume, surrounding the democratic governance of trade agreements - whether long-held debates on the inclusion of workers' voices, controversies on intrusive "behind the border" provisions undermining national sovereignty and local autonomy or new questions on digital rights - are crucial to understand the ebbing popular support for far-reaching trade agreements. This book will be a useful learning tool for students

and scholars in a wide range of fields, including Globalisation, Global Governance, International Political Economy, International Trade and Investment and International Law, and should also be of interest to EU trade negotiators, international policymakers and business associations.

The Local Impact of Globalization in South and Southeast Asia - Bart Lambregts
2015-08-27

In the past two decades, several millions of IT-enabled services jobs have been relocated or 'offshored' from the US and Europe to, in particular, low cost economies around the world. Most of these jobs so far have landed in South and South-East Asia, with India and the Philippines receiving the bulk of them. This has caused profound changes in the international division of labour, and has had correspondingly wide social and economic effects. This book examines how this 'next wave in globalization' affects people and places in South and South-

East Asia. It brings together twelve case studies from India, the Philippines, China, Hong Kong and Thailand, and explores how and for whom services offshoring creates opportunities, triggers local economic transformations and produces challenges. This book in addition compares how different countries take part in this 'second global shift', investigates service-sector driven economic development from a historical perspective, and engages with the question whether and to what extent services offer a new promising avenue of sustained economic growth for developing countries. It argues that service-led development in developing countries is not easy for all the workers involved, or a guaranteed path to sustained economic development and prosperity. This volume stands out from other books in the field in its exploration of the social and economic outcomes in the cities and countries where services have been located. Based on cutting edge empirical research and original data, the

volume offers a state-of-the-art contribution to this growing debate. The book provides valuable insights for students, scholars and professionals interested in services offshoring, socio-economic development and contemporary transformations in South and South-East Asia.

Science, Technology and Innovation in BRICS Countries - Swapan Kumar Patra 2020-06-30
The term BRICS (Brazil, Russia, India, China and South Africa) is gaining global attention both in scholarly and popular discourse. BRICS countries are crucial in terms of their vast areas, huge population and have massive economic potential. These countries are also categorized as developing countries and are aspiring to be considered as developed countries. There is commonality among these countries in that they have similar issues and problems, which may require common solutions. *Science, Technology and Innovation in BRICS Countries* examines whether more emphasis on Science Technology and Innovation (STI) capability building could be

the solution to these countries' economic upgradation and poverty reduction. This book is a collection of various Science Technology and Innovation (STI) issues of BRICS economics, and will be of interest to general readers, scholars working in this field, as well as policy makers all over the globe. The contributions come from various scholars across the globe who have published their BRICS economics research in a special issue of the African Journal of Science, Technology, Innovation and Development.

Routledge Handbook of Japanese Business and Management - Parissa Haghirian

2016-01-29

The Routledge Handbook of Japanese Business and Management provides a comprehensive overview of management and business processes and practices in Japanese companies. The contributors combine theoretical findings and research results with a practical and contemporary view on how corporations and firms are managed in Japan. The handbook is

divided into eight sections covering: historical perspectives on Japanese management; structure and theory of the Japanese firm; the corporate environment in Japan; the Japanese work environment; the Japanese market; manufacturing and logistics; interaction and communication; the future of Japanese management. This book is an essential reference resource for students and scholars working on Japanese companies, the Japanese market-place, Japanese consumers, or management processes in the Japanese firm. The book also provides an interesting and informative read for managers who need to deepen their knowledge on Japanese business processes.

Routledge Handbook of the Contemporary

Philippines - Mark R. Thompson 2018-02-19

The Philippines is a fascinating example of a "poor country democracy" where issues of economic development and poverty, political participation and stability, as well as ethnicity and migration are crucial. The Routledge

Handbook of the Contemporary Philippines provides a comprehensive overview of the current political, economic, social, and cultural issues of the country. The Handbook is divided into the following four sections concentrating on a different aspect of the Philippines: domestic politics; foreign relations; economics and social policy; cultures and movements. In terms of domestic politics, chapters discuss clientelism, bossism, dynasties, pork barrel and corruption as well as institutions - the presidency, congress, the judiciary, the civil service, political parties, and civilian-military relations. The Philippines is confronted with many overseas challenges, with the foreign relations section focused on the country's relationship with China, Japan, and the USA as well as assessing the impact of the Filipino diaspora community around the world. Regarding economics and social policy, authors examine industrial policy, capital flight, microfinance, technocracy, economic nationalism, poverty, social welfare programs,

and livelihoods. The final section on Philippine cultures and movements highlights issues of customs, gender, religion, and nationalism while also examining various social and political forces - the peasantry, the middle class, indigenous peoples, NGOs, the left, trade unionism, the women's movement, and major insurgencies. Written by leading experts in the field, the Handbook provides students, scholars, and policymakers of Southeast Asia with an interdisciplinary resource on the evolving politics, society, and economics of the Philippines.

Understanding the Development of Small Business Policy - Thomas M. Cooney

2020-04-29

It is not widely understood that the importance of small businesses only became apparent with the publication of David Birch's book The Job Generation Process in 1979. Over the past four decades, governments across the globe have struggled to design, implement and evaluate policies that benefit the development of small firms. Deciding whether macro or micro policies are more appropriate for a given context has usually created an initial challenge for policy-makers. However, a cause for even greater dispute has been determining and agreeing what might be the preferred outcomes of such policies (e.g. more firms, better performing firms, fewer

firm failures, job creation, greater productivity, higher levels of innovation, inclusivity of disadvantaged groups). Furthermore, evaluating the impact of specific policies presents a wide range of difficulties since it is impossible to isolate a simple cause-and-effect relationship between policy and its stated goal. This book explores the development of small business policy in five countries across five continents and seeks to develop a deeper understanding regarding how small business policy has evolved in these countries and what we might learn from their experiences. This book was originally published as a special issue of Small Enterprise Research.

The Origins of the Common Core - D. Owens
2015-01-22

Owens provides a historical analysis of the ideological movements and reform efforts leading to the Common Core State Standards, beginning with conservative criticism of public schools in the 1930s and culminating in a

convergence of the political right and left in efforts to systemically reform education based on free market principles.

Political and Economic Dynamics of the Eurozone Crisis - James A. Caporaso
2016-02-25

This is the first book to provide a full and dispassionate account of the politics and

economics of the Eurozone crisis, focusing on the interlinked origins and impacts of the Euro-Zone crisis and the policy responses to it. The book is distinguished from existing research by its avoidance (and rejection) of the too-often simplistic analysis that has characterized political, media and regrettably some academic coverage, and by its attempt to escape from the tyranny of day-to-day events and short-term developments. Each of the contributors identifies an important question and undertakes a careful empirical, theoretically-informed analysis that produces novel perspectives. Together they seek to balance many of the existing accounts that have rushed to sometimes unwarranted conclusions, concerning, for example, the locus of institutional power in European crisis-management; the power and centrality of particular member states, notably Germany which has been attributed with 'hegemonic' status; the supposed entrapment of EU policy makers by an 'austerity ideology'; and

the deep flaws that apparently afflict the solutions to the crisis put painstakingly in place, such as Banking Union. While it will be some time before the EU can put the crisis behind it, and the dust finally settles on the revised institutional system that emerges, *The Political and Economic Dynamics of the Eurozone Crisis* marks an important step towards a considered, reflective analysis of the tumultuous events and developments of the crisis period.

The Regulation of Financial Planning in Australia - Angelique Nadia Sweetman McInnes 2019-08-20

This book investigates the legitimacy of the current Australian Financial Services

Licensee-Authorised Representative (AFSL-AR) licensing model, as specified in the Commonwealth Corporations Act 2001. The book rectifies the deficiency in scholarly attention to this matter by developing a new conceptualised framework for the financial planning discipline. It takes into account theories in agency, legislation, legitimacy and the independent individual regulatory regimes in other professions; thereafter integrating this framework with the financial planning theory to examine the legitimacy, or what was found to be the illegitimacy of licensing advisers via multiple third party conflicted commercially oriented licensees. This book makes a very useful reference to understanding financial planning licencing model in Australia.

India and the Global Game of Gas Pipelines - Gulshan Dietl 2016-11-03

Gas pipelines constitute an important, yet unexplored, aspect of strategic geography. As one of the fastest growing economies in the world, India's need for energy is paramount. Though surrounded by gas-rich regions - Myanmar and Bangladesh to the east, the Gulf to the west and Central Asia

to the north - India does not have a single gas pipeline coming in, going out or traversing through its territory to date. This book highlights the global competition over gas pipelines and its implications for India's energy security in a comprehensive manner. The author leads us through a labyrinthine world comprising numerous actors - the states, energy firms, scientists, engineers, investors and bankers - engaged in competition over these pipelines leading to a continuous game of checkmating rivals, instigating conflicts, causing damage and destruction and threatening military action to persuade or dissuade states from joining specific projects. Pulsating, rigorous, grounded in hard facts and solid research, this book will be indispensable for scholars and researchers of international relations, strategic affairs, defence studies and politics, as well as think tanks, government agencies and the informed general reader.

***Complex Political Decision-Making* - Peter Bursens 2016-11-18**

Political and societal elites are increasingly confronted with complex environments in which they need to take collective decisions. Decision-makers are faced with policy issues situated at different intertwined levels which need to be negotiated with different actors. The negotiation and decision-making processes raise issues of legitimacy, leadership and communication. Modern societal systems are not only affected by horizontal specialization and diversity but also by a vertical expansion of governance layers. The national level is no longer the sole, or even the most important, level of governance. In these complex environments, cognitive abilities and personalities of political and societal elites have gained importance. This book

addresses the impact of an increasingly complex environment on the legitimacy and transparency of politics, on the role of leadership and political personality and on motivated images, rhetoric and communication. Examining how these issues interact at the macro and theoretical level, the types of problems decision-makers face and how they communicate ideas with their audiences, it brings together leading experts in political psychology, law and political science to bridge the gap in the way these disciplines explore the issue of complex decision-making.

***Europeanization in Sweden* - Anna Meeuwisse 2018-12-17**

Notwithstanding its many successes since 1945, the project of European integration currently faces major difficulties, from financial crises and mass immigration to the impending departure of the UK from the European Union. At the same time, these

challenges have spurred civil society organizations within and across Europe, revealing a shared public sphere in which citizens can mobilize around refugee rights, opposition to austerity policies, and other issues. Europeanization in Sweden assembles new empirical research on how these processes have played out in one of the continent's wealthiest nations, providing insights into whether, and how, the "Swedish model" can guide European integration.

**India-China Relations - Jagannath P. Panda
2016-10-04**

The rise of India and China as two major economic and political actors in both regional and global politics necessitates an analysis of not only their bilateral ties but also the significance of their regional and global pursuits. This book looks at the nuances and politics that the two countries attach to multilateral institutions and

examines how they receive, react to and approach each other's presence and upsurge. The driving theme of this book is to highlight the enduring and emerging complexities in India-China relations, which are multi-layered and polygonal in nature, and both a result and reflection of a multipolar world order. The book argues that coexistence between India and China in this multipolar world order is possible, but that it is limited to a medium-term perspective, given the constraints of identity complexities and global aspirations these two rising powers are pursuing. It goes on to discuss how their search for energy resources, quest to uphold their own identity as developing powers, and engagement in balance-of-power politics to exert authority on each other's presence, are some elements that guide their non-cooperative relationship. By explaining the foreign policy approaches of Asia's two

major powers towards the growing Asian and global multilateralism, and highlighting the policies they carry towards each other, the book is a useful contribution to students and scholars of Asian Politics, Foreign Policy and International Relations.

Businessmen, Clientelism, and Authoritarianism in Egypt - Safinaz El Tarouty 2016-04-29

After the ousting of former Egyptian President Hosni Mubarak in February 2011, much debate surrounded the reasons for the former regime's longevity and its collapse. Here, Safinaz El Tarouty provides an original contribution to the study of authoritarianism in Egypt by focusing on the role of businessmen in authoritarian survival. As the regime intensified neoliberal economic reforms that led to social deprivation and frustration among increasing numbers of Egyptian citizens, they co-opted businessmen in order to

defuse challenges and buttress the regime, constructing a new political economy of authoritarianism. Extending the existing literature on clientelism, El Tarouty creates a typology of regime-businessmen relations to describe the multiple mechanisms of co-optation in the context of economic liberalization. Ultimately, though, these businessmen proved too narrow a constituency to provide legitimacy to the regime and, in fact, formed one of the reasons for its collapse.

Sustainable Development Goals in the Asian Context - Jan Servaes 2016-11-04

This book presents research that focuses on Sustainable Development in Asia. Chapters are extended works of papers presented at Communication/Culture and The Sustainable Development Goals (CCSDG): Challenges for a New Generation, an international conference held in Chiang Mai University in December 2015. The chapters

address assessments of Millennium Development Goals in several Asian countries and the region as a whole. The book also identifies and discusses the changes and potential improvements in the transition from Millennium Development Goals (2000-2015) to Sustainable Development Goals (2015-2030). Areas that are covered in the book, which are illustrated with case studies, include Corporate Social Accountability, Information and Communications Technologies, and Small Medium Enterprises (SMEs). The book serves as a useful resource for academics, scholars, students, and policymakers, interested in Development Studies.

**Green Economic Structures in Modern Business and Society - Jean-Vasile, Andrei
2015-03-31**

Environmental and sustainable development concerns permeate numerous aspects of

society, including economic activity. Many countries now run their economies based on such sustainable economic structures to improve production models and overall living conditions. Green Economic Structures in Modern Business and Society discusses the implementation of environmentally friendly models in contemporary economies, as well as the development and evolution of such strategies in recent years. Focusing on theoretical frameworks, empirical research findings, and key methodologies, this book is a pivotal reference source for academicians, advanced-level students, and professionals within the growing field of green economics.

World Scientific Reference On Entrepreneurship, The (In 4 Volumes) - 2016-12-28

This book examines an important economic development in East Asia during the first decade of the 21st century. Whereas regional arrangements were, with the sole significant exception of ASEAN, conspicuously absent before 2000, they have proliferated since 2000 in both the monetary and trade areas. The book places this political development in the changing nature of the national economies, especially their increasing integration into regional and global value chains with the

fragmentation of production processes. This is a freshly written, coherent analysis of the topic, drawing upon (updated) material from a series of articles that the author has published on the subject over the years. Although the book is based on theoretical and, especially, empirical analysis of regionalism, it is written in a non-technical style accessible to a wide range of readers. The book is likely to be adopted as supplementary reading for university courses on Asian economies, whether be it in area studies or economics/political economy disciplines.

Corporate Governance, Responsibility and Sustainability - Arindam Banik 2016-04-29
Corporate Governance, Responsibility and Sustainability investigates various dimensions of corporate governance issues in key emerging economies such as China, India, Brazil, South Africa and Russia. The book explores a number of issues in the

areas of corporate governance framework, market discipline and building an efficient, competitive market.

Risky business: Uptake and implementation of sustainability standards and certification schemes in the Indonesian palm oil sector -

Sophia M Gnych 2015-11-12

Evolving international sustainability norms demand greater environmental and social responsibility from business across global commodity chains - from countries of origin to countries of consumption. Conventional command-and-control regulation has had limited success in addressing negative environmental and social impacts. As a

result, advocacy groups and NGOs have championed a diversity of market-based and multi-stakeholder governance approaches aimed at shifting the private sector towards delivering more sustainable business models. Multiple non-state, market-driven social and environmental standards have emerged for palm oil. Through interviews with growers and key stakeholders in the Indonesian palm oil industry this occasional paper explores the motivations driving the uptake of sustainability standards, as well as the factors supporting and preventing implementation of sustainability standards, and asks, what model of "sustainable" oil palm agriculture is ultimately being built?
