Rockets and People Volume I (NASA History Series. NASA Sp-2005-4110) - Boris Chertok 2005-01-01

Much has been written in the West on the history of the Soviet space program, but few Westerners have read direct first-hand accounts of the men and women who were behind the many Russian accomplishments in exploring space. The memoir of academician Boris Chertok, translated from the original Russian, fills that gap. Chertok began his career as an electrician in 1930 at an aviation factory near Moscow. Thirty years later, he was

deputy to the founding figure of the Soviet space program, the mysterious "Chief Designer" Sergey Korolev. Chertok's 60-year-long career and the many successes and failures of the Soviet space program constitute the core of his memoirs, *Rockets and People*. In these writings, spread over four volumes (volumes two through four are forthcoming), academician Chertok not only describes and remembers, but also elicits and extracts profound insights from an epic story about a society's quest to explore the cosmos. This book was edited by Asif Siddiqi, a historian of Russian space exploration, and General Tom Stafford contributed a foreword touching upon his significant work with the Russians on the Apollo-Soyuz Test Project. Overall, this book is an engaging read while also contributing much new material to the literature about the Soviet space program.

FIRE WEATHER: Agriculture Handbook 360 - U.S. Department

of Agriculture □ Forest Service 2019-07-03

Weather is never static. It is always dynamic. Its interpretation is an art. The environment is in control in wildland firefighting. Free-burning fires are literally nourished by weather elements, atmospheric components, and atmospheric motion. Outguessing Mother Nature in order to win control is an extremely difficult task. We need to soothe her with understanding. We have attempted to present information in such a way that your daily and seasonal awareness of fire weather can begin with reliable basic knowledge. We have kept the use of technical terms to a minimum, but where it was necessary for clear and accurate presentation, we have introduced and defined the proper terms. Growing awareness of fire weather, when combined with related experience on fires, can develop into increasingly intuitive, rapid, and accurate applications. Toward this end, we have preceded each chapter with a paragraph or two on important points to look for in relating weather factors to fire control planning and action.

Chief of Staff: Prewar Plans and Preparations - Mark Skinner Watson 1950

Operation Overflight - Francis Gary Powers 2011-03

In this new edition of his classic 1970 memoir about the notorious U-2 incident, pilot Francis Gary Powers reveals the full story of what actually happened in the most sensational espionage case in Cold War history. After surviving the shoot-down of his reconnaissance plane and his capture on May 1, 1960, Powers endured sixty-one days of rigorous interrogation by the KGB, a public trial, a conviction for espionage, and the start of a ten-year sentence. After nearly two years, the U.S. government obtained his release from prison in a dramatic exchange for convicted Soviet spy Rudolph Abel. The narrative is a tremendously exciting suspense story about a man who was labeled a traitor by many of his countrymen but who emerged a Cold War hero.

Global Trends 2040 - National Intelligence Council 2021-03

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." - *Global Trends 2040* (2021) *Global Trends 2040-A More Contested World* (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future

and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

Investigating Iwo - Breanne Robertson 2019

"Investigating Iwo encourages us to explore the connection between American visual culture and World War II, particularly how the image inspired Marines, servicemembers, and civilians to carry on with the war and to remember those who made the ultimate sacrifice to ensure victory over the Axis Powers. Chapters shed light on the processes through which history becomes memory

and gains meaning over time. The contributors ask only that we be willing to take a closer look, to remain open to new perspectives that can deepen our understanding of familiar topics related to the flag raising, including Rosenthal's famous picture, that continue to mean so much to us today"--

The People's Liberation Army and Contingency Planning in China - Arthur S. Ding 2019-02-17

All militaries have a responsibility to plan for contingencies, and China's military, the People's Liberation Army (PLA), is no exception. PLA contingency planning takes place primarily within the General Staff Department's (GSD's) First Department, also known as the GSD Operations Department. China's seven military regions participate in drafting and reviewing the plans relevant to their areas of responsibility, albeit under heavy supervision from the GSD. U.S. joint doctrine defines a contingency as "a situation that likely would involve military forces in response to natural and manmade disasters, terrorists, subversives, military

operations by foreign powers, or other situations." U.S. doctrine distinguishes between deliberate planning (advance preparation of campaign and contingency plans in non-crisis situations) and crisis action planning (rapid planning in response to a developing incident or situation). Deliberate planning is typically used to develop campaign and contingency plans for a broad range of activities based on requirements identified in strategic guidance for military commanders. Crisis action planning is conducted with less advance warning (hours, days, or up to 12 months) and focuses on developing alternative courses of action or refining existing campaign or contingency plans to adapt to current circumstances. Balloon Flying Handbook - United States. Flight Standards Service 2001

Scenes from an Unfinished War - Daniel P. Bolger
2011-01-01

Low-intensity conflict (LIC) often has been viewed as the wrong kind of warfare for the American military, dating back to the war in Vietnam and extending to the present conflicts in Iraq and Afghanistan. From the American perspective, LIC occurs when the U.S. military must seek limited aims with a relatively modest number of available regular forces, as opposed to the larger commitments that bring into play the full panoply of advanced technology and massive commitments of troops. Yet despite the conventional view, U.S. forces have achieved success in LIC, albeit "under the radar" and with credit largely assigned to allied forces, in a number of counterinsurgency wars in the 1960s. "Scenes from an Unfinished War: Low-Intensity Conflict in Korea, 1966-1969" focuses on what the author calls the Second Korean conflict, which flared up in November 1966 and sputtered to an ill-defined halt more than three years later. During that time, North Korean special operations teams had challenged the U.S. and its South Korean

allies in every category of low-intensity conflict - small-scale skirmishes along the Demilitarized Zone between the two Koreas, spectacular terrorist strikes, attempts to foment a viable insurgency in the South, and even the seizure of the USS Pueblo - and failed. This book offers a case study in how an operational-level commander, General Charles H. Bonesteel III, met the challenge of LIC. He and his Korean subordinates crafted a series of shrewd, pragmatic measures that defanged North Korea's aggressive campaign. According to the convincing argument made by "Scenes from an Unfinished War," because the U.S. successfully fought the "wrong kind" of war, it likely blocked another kind of wrong war - a land war in Asia. The Second Korean Conflict serves as a corrective to assumptions about the American military's abilities to formulate and execute a winning counterinsurgency strategy. Originally published in 1991. 180 pages. maps. ill.

Chinese Military Reform in the Age of Xi Jinping: Drivers, Challenges, and Implications - Joel Wuthnow
China's People's Liberation Army (PLA) has embarked on its most wide-ranging and ambitious restructuring since 1949, including major changes to most of its key organizations. The restructuring reflects the desire to strengthen PLA joint operation capabilities- on land, sea, in the air, and in the space and cyber domains. The reforms could result in a more adept joint warfighting force, though the PLA will continue to face a number of key hurdles to effective joint operations. Several potential actions would indicate that the PLA is overcoming obstacles to a stronger joint operations capability. The reforms are also intended to increase Chairman Xi Jinping's control over the PLA and to reinvigorate Chinese Communist Party (CCP) organs within

the military. Xi Jinping's ability to push through reforms indicates that he has more authority over the PLA than his recent predecessors. The restructuring could create new opportunities for U.S.-China military contacts.

Low-intensity Conflict in the Third World - Stephen Blank 1988

A common thread ties together the five case studies of this book: the persistence with which the bilateral relationship between the United States and the Soviet Union continues to dominate American foreign and regional policies. These essays analyze the LIC environment in Central Asia, the Middle East, Southeast Asia, Latin America, and sub-Saharan Africa.

Strengthening Forensic Science in the United States - National Research Council 2009-07-29

Scores of talented and dedicated people serve the

forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application.

Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Army and Reconstruction, 1865-1877 - United States Army 2019-05-15

Within two months of Confederate General Robert E. Lee's surrender at Appomattox Court House on 9 April 1865, the Confederacy had collapsed, and its armed forces had ceased to exist. In the spring of 1865, the U.S. Army

faced the unprecedented task of occupying eleven conquered Southern states and administering "Reconstruction"-the process by which the former rebellious states would be restored to the Union. But a rapid demobilization of the Army placed the remaining occupation troops at a disadvantage almost from the start. This brochure traces the Army's law enforcement, stability, and peacekeeping roles in the South from May 1865 to the end of Reconstruction in 1877, marking a unique period in American history. During that time, the Southern states remained under military occupation, and for several years, they were also ruled by military government. Veteran Army commanders such as Philip H. Sheridan, John M. Schofield, Daniel E. Sickles, Edward R. S. Canby, and Winfield S. Hancock may have found the work of Reconstruction less dangerous than fighting the Civil War had been, but they also found it no less challenging.

The Global Cold War - Odd Arne Westad 2007-03-01

The Cold War shaped the world we live in today - its politics, economics, and military affairs. This book shows how the globalization of the Cold War during the

last century created the foundations for most of the key conflicts we see today, including the War on Terror. It focuses on how the Third World policies of the two twentieth-century superpowers - the United States and the Soviet Union - gave rise to resentments and resistance that in the end helped topple one superpower and still seriously challenge the other. Ranging from China to Indonesia, Iran, Ethiopia, Angola, Cuba, and Nicaragua, it provides a truly global perspective on the Cold War. And by exploring both the development of interventionist ideologies and the revolutionary movements that confronted interventions, the book links the past with the present in ways that no other major work on the Cold War era has succeeded in doing.

From 1920 to 1940, the Harlem Renaissance produced a bright beacon of light that paved the way for African-Americans all over the country. The unapologetic writings of W. E. B. Du Bois and Marcus Garvey, the fervent fiction and poetry of Zora Neale Hurston and Langston Hughes, the groundbreaking art of Aaron Douglas and William H. Johnson, and the triumphant music of Duke Ellington and Louis Armstrong gave voice and expression to the thoughts and emotions that Jim Crow segregation laws had long sought to stifle. In *On the Shoulders of Giants*, indomitable basketball star and bestselling author and historian Kareem Abdul-Jabbar invites the reader on an extraordinarily personal journey back to his birthplace, through one of the greatest political, cultural, literary, and artistic movements in our history, revealing the tremendous impact the Harlem

Renaissance had on both American culture and his own life. Beginning with the rise of the Harlem Renaissance as pioneers of professional basketball, Kareem traces the many streams of historical influence that converged to create the man he is today -- the NBA's all-time leading scorer and a veritable African-American icon. Travel deep into the soul of the Renaissance -- to the night clubs, restaurants, basketball games, and fabulous parties that have made footprints in Harlem's history. Meet the athletes, jazz musicians, comedians, actors, politicians, entrepreneurs, and writers who not only inspired Kareem's rise to greatness but an entire nation's. Kareem Abdul-Jabbar was born in the midst of a cultural reawakening, carried on the shoulders of athletes trying to prove there was a lot more at stake than a ball game, men and women who made music that could break your heart, and writers and intellectuals who gave voice to not just the ideals of a movement but the raw emotions. Kareem tells what it took to get these revolutionaries to Harlem and how they changed the world. A world that is still riding on the shoulders of giants.

(NASA) involvement, construction and materials challenges faced by designers and builders, releasable performance characteristics and capabilities, use of U-2 and ER-2 airplanes as research platforms, and technical and programmatic lessons learned.

The Cold War - Odd Arne Westad 2017-09-05

The definitive history of the Cold War and its impact around the world We tend to think of the Cold War as a bounded conflict: a clash of two superpowers, the United States and the Soviet Union, born out of the ashes of World War II and coming to a dramatic end with the collapse of the Soviet Union. But in this major new work, Bancroft Prize-winning scholar Odd Arne Westad argues that the Cold War must be understood as a global ideological confrontation, with early roots in the Industrial Revolution and ongoing repercussions around the world. In *The Cold War*, Westad offers a new perspective on a century when great power rivalry and ideological battle transformed every corner of our globe. From Soweto to Hollywood, Hanoi, and Hamburg, young men and women felt they were fighting for the future of the world. The Cold War may have begun on the perimeters of Europe, but it had its deepest

reverberations in Asia, Africa, and the Middle East, where nearly every community had to choose sides. And these choices continue to define economies and regimes across the world. Today, many regions are plagued with environmental threats, social divides, and ethnic conflicts that stem from this era. Its ideologies influence China, Russia, and the United States; Iraq and Afghanistan have been destroyed by the faith in purely military solutions that emerged from the Cold War. Stunning in its breadth and revelatory in its

perspective, this book expands our understanding of the Cold War both geographically and chronologically, and offers an engaging new history of how today's world was created.
