**THiNK** - Judith Boss 2011-01-07

All critical thinking texts aim to make their students critical thinkers for life,

but unlike other texts, THiNK was written from the framework of understanding that students approach their worlds from a place of opinions and feelings. Judith Boss begins by proposing three stages of critical thinking development: Dualism: thinking things are either right or wrong; Relativism: accepting that not everything is right/wrong, and subsequently thinking all opinions are equally valid, and finally, Commitment: choosing a position based on careful reasoning. Judith Boss has found that the majority of her students come to class in the relativism stage. THiNK guides students to the final stage of critical thinking development by showing students the importance of overcoming their feelings and opinions to commit to positions based on reason and logic. In the process, students learn to apply critical thinking to their every day lives. This innovative program provides instructors with scholarly yet succinct content on critical thinking and logical argumentation in a format that is portable, current, and captivating. With extensive opportunity for application and practice, and groundbreaking digital content (Connect Critical Thinking), THiNK directs students to make connections between skill development and application to their college studies, careers, and personal lives. Connect Critical Thinking is a first: a learning program with pedagogical tools that are anchored in research on critical thinking. Connect actively and personally engages students in thinking critically while also showing students how to apply those thinking skills in everyday life. Connect provides assignable and assessable exercises including real-life simulations that are tied to learning objectives, providing students with immediate feedback and allowing instructors to track student progress.

**A-Level Mathematics** - Tom Bennison 2017

Contemporary, comprehensive text A new syllabus in the UK, without a history of questions to drill students on, is an opportunity for a fresh approach. We start with the assumption that mathematics at A Level should deliver good students for higher level studies - in mathematics and science. Contributions from mathematicians in industry provide real world links that will help with understanding and motivation. Our approach is therefore practical and inspirational. Our student text for Year 1 provides an excellent and fresh look at how mathematics is taught - designed to prepare students for examinations by going through the curriculum thoroughly and expertly. But more than that, by making the first class problem solvers.

**Your Professional Qualification** - 2002

What is the difference between an academic and professional qualification? Who should get a professional qualification? Did you know that some professions can not be legally practised with a degree alone? Why get a UK qualification? Is it expensive to gain a British qualification? What is a chartered institute or society, and is it better than a non-chartered body? What is the difference between a professional body and a trade union? These are all questions answered in this book which is designed to help individuals choose a career path and the right professional organisation. In today's world it isn't enough to have a qualification, you need to be able to meet with peers and use the valuable networks that are already in place to foster your profession. Your Professional Qualification provides a comprehensive survey of the qualifications available in the UK along with guidance on where they lead, entry requirements, where to apply and where to study. Derived from the vast and authoritative British Qualifications database, this important publication provides the first easily accessible guide to qualifications and how to get them in the UK. Built around a comprehensive directory of professional qualifying bodies each professional area is described in depth and its qualifications identified and explained. The book is supported by a simple website, which ensures purchasers of the book are kept up-to-speed with new developments.

**A-level Chemistry** - E. N. Ramsden 2000

Each topic is treated from the beginning, without assuming prior knowledge. Each chapter starts with an opening section covering an application. These help students to understand the relevance of the topic: they are motivational and they make the text more accessible to the majority of students. Concept Maps have been added, which together with Summaries throughout, aid understanding of main ideas and connections between topics. Margin points highlight key points, making the text more accessible for learning and

revision. Checkpoints in each chapter test students' understanding and support their private study.
