When Wolf Lost Moon - Allison Danger 2019

Lost - James Patterson 2020-01-13

In this action-packed thriller, Miami just got a lot more dangerous—especially for one innocent young woman running for her life. The city of Miami is Detective Tom Moon's back yard. He's always kept it local, attending University of Miami on a football scholarship, and, as a Miami PD officer, protecting the city's most vulnerable. Now, as the new leader of an FBI task force called "Operation Guardian," it's his mission to combat international crime. Moon's investigative team discovers that the opportunistic "Blood Brothers"—Russian nationals Roman and Emile Rostoff—have evaded authorities while building a vast, powerful, and deadly crime syndicate throughout Europe and metropolitan Miami. Moon played offense for U of M, but he's on the other side of the field this time. And as the Rostoffs zero in on a target dear to Tom, they're not playing by anyone's rules.

The Book of the Moon - Steven Forrest 2013-04

Taking care of the Moon (the heart) in ourselves is the secret of happiness, but unravelling its messages requires that we learn its mysterious, non-linear, trans-logical language. "Being in touch with our feelings" is only part of it. To follow the Moon down into our hearts is a journey into another reality, the interior psychic world, where our souls collide with ghosts from our past. Intuition, the Mother, Family, Healing and being healed -- these are all lunar topics. The story unfolds against a shifting backdrop of epochal changes in our cultural relationship to what we were foolishly taught to call "the Feminine", forgetting that men have Moons too! This book takes a fresh look at the moon, including new insight into the moon's phases, the moon's declination and the "out of bounds" moon.

Pioneers of Space - George Adamski 2013-02-15

Now with an Historical Afterword by Ron Miller Featured in Ron Miller's *The Conquest of Space Book Series*. *Pioneers of Space* (1949) was later reincarnated almost word-for-word as the "non-fiction" *Inside the Space Ships*, one of the books largely responsible for the UFO craze of the 1950s and 60s. Ghost-written by Adamski acolyte Lucy McGinnis, this novel contains some of the most inept scientific ideas imaginable. In the early 1950s, "Professor" George Adamski laid the groundwork for all subsequent UFO contactees. In *Pioneers of Space* he created many of the incidents and qualities he later attributed to the "actual" inhabitants of Venus, Mars and Saturn he later claimed to have met. In addition, we get a look at some of the strange "science" this self-proclaimed astronomer believed in. "Facts" such as there must be oxygen in space otherwise the sun could not burn... Bad Moon Rising - Arthur M. Eckstein 2016-10-25

A startling history of the forlorn war between the Weather Underground and the FBI, based on interviews and 30,000 pages of previously unreleased FBI documents

In the summer of 1970 and for years after, photos of Bill Ayers, Bernadine Dohrn, Jeff Jones, and other members of the Weather Underground were emblazoned on FBI wanted posters. In *Bad Moon Rising*, Arthur Eckstein details how Weather began to engage in serious, ideologically driven, nationally coordinated political violence and how the FBI attempted to monitor, block, and capture its members—and failed. Eckstein further shows that the FBI ordered its informants inside Students for a Democratic Society (SDS) to support the faction that became Weather during the tumultuous June 1969 SDS convention, helping to destroy the organization; and that the FBI first underestimated Weather's seriousness, then overestimated its effectiveness, and how Weather outwitted them. Eckstein reveals how an obsessed and panicked President Nixon and his inner circle sought to bypass a cautious J. Edgar Hoover, contributing to the creation of the rogue Plumbers Unit that eventually led to Watergate.

You Are Here - Colin Ellard 2009-07-07

An eye-opening exploration of the intriguing and often counter-intuitive science of human navigation and experience of place. In the age of GPS and iPhones, human beings it would seem have mastered the art of direction, but does the need for these devices signal something else—that as a species we are actually hopelessly lost. In fact we've filled our world with signs and arrows. We still get lost in the mall, or a maze of cubicles. What does this say about us? Drawing on his exhaustive research, Professor Collin Ellard illuminates how humans are disconnected from our world and what this means, not just for how we get from A to B, but also for how we construct our cities, our workplaces, our homes, and even our lives.

The Lost Moon - Wilson Rao 2014-09-19

Dr. Nicholas Foster, a once promising linguist, has now been relegated to a teaching position, due to an unfortunate incident in his past. He is approached by a covert group within NASA for work of "national importance". They interest him in some artifacts and snippets of text that haven't been seen for thousands of years. What's even more intriguing is that these were not terrestrial in origin, but were found around a structure on the moon! The shadow group led by Dwight tells him of a structure unlike any they had seen previously was found during the last Apollo mission. The structure was "activated" by actions unknown, and it began transmitting symbols directly into anyone who ventured close to it. The group had spent enormously to construct a base around the structure; to study it, find its purpose and exploit it. But Operations are being threatened because these transmissions are affecting personnel and Foster is asked to help out. Foster is initially skeptical, but reluctantly agrees to help them out to break out of the monotony of his own existence. From there on, his life takes on an unexpected turn, meeting with the beautiful Commander of the mission, falling in love with her, and journeying with an assortment of people, to the harsh vastness of space, and onto a secret base on the moon. Meanwhile the group's covert interests that extend overseas into China, find out about a secret mission that will land Chinese astronauts close to their own base. They will do anything to protect the base, and the secret that the group has been holding for the last twenty years, before the other side can get to it. They are willing to risk everything to find out. The two groups collide on the moon with disastrous consequences. Foster eventually manages to enter the structure, only to realize that it had been a warning, something they had ignored and it changes everything. Some doors weren't meant to be opened....

Apollo 13 - William Broyles (Jr.) 199?

Apollo 13 - James Lovell 2006-02-20

In April 1970, during the glory days of the Apollo space program, NASA sent Navy Captain Jim Lovell and two other astronauts on America's fifth mission to the moon. Only fifty-five hours into the flight of Apollo 13, disaster struck: a mysterious explosion rocked the ship, and soon its oxygen and power began draining away. Written with all the color and drama of the best fiction, *APOLLO 13* (previously published as *Lost Moon*) tells the full story of the moon shot that almost ended in catastrophe. Minutes after the explosion, the three astronauts are forced to abandon the main ship for the lunar module, a tiny craft designed to keep two men alive for just two days. As the hours tick away, the narrative shifts from the crippled spacecraft to Mission Control, from engineers searching desperately for a way to fix the ship to Lovell's wife and children praying for his safe return. The entire nation watches as one crisis after another is met and overcome. By the time the ship splashes down in the Pacific, we understand why the heroic effort to rescue Lovell and his crew is considered by many to be NASA's finest hour. Now, thirty years after the launch of the mission, Jim Lovell and coauthor Jeffrey Kluger add a new preface and never-before-seen photographs to *Apollo 13*. In their preface, they offer an incisive look at America's waxing and waning love affair with space exploration during the past three decades, culminating only recently when the Apollo 13 spacecraft itself, long consigned to an aviation museum outside Paris, was at last returned to its rightful home in the United States. As inspiring today as it was thirty years ago, the story of Apollo 13 is a timeless tribute to the enduring American spirit and sparkling individual heroism.

[Apollo 8](#) - Jeffrey Kluger 2017-05-16

The untold story of the historic voyage to the moon that closed out one of our darkest years with a nearly unimaginable triumph In August 1968, NASA made a bold decision: in just sixteen weeks, the United States would launch humankind's first

flight to the moon. Only the year before, three astronauts had burned to death in their spacecraft, and since then the Apollo program had suffered one setback after another. Meanwhile, the Russians were winning the space race, the Cold War was getting hotter by the month, and President Kennedy's promise to put a man on the moon by the end of the decade seemed sure to be broken. But when Frank Borman, Jim Lovell and Bill Anders were summoned to a secret meeting and told of the dangerous mission, they instantly signed on. Written with all the color and verve of the best narrative non-fiction, Apollo 8 takes us from Mission Control to the astronaut's homes, from the test labs to the launch pad. The race to prepare an untested rocket for an unprecedented journey paves the way for the hair-raising trip to the moon. Then, on Christmas Eve, a nation that has suffered a horrendous year of assassinations and war is heartened by an inspiring message from the trio of astronauts in lunar orbit. And when the mission is over—after the first view of the far side of the moon, the first earth-rise, and the first re-entry through the earth's atmosphere following a flight to deep space—the impossible dream of walking on the moon suddenly seems within reach. The full story of Apollo 8 has never been told, and only Jeffrey Kluger—Jim Lovell's co-author on their bestselling book about Apollo 13—can do it justice. Here is the tale of a mission that was both a calculated risk and a wild crapshoot, a stirring account of how three American heroes forever changed our view of the home planet.

Lost on the Moon - Roy Rockwood 2014-04-11

Roy Rockwood was a house pseudonym used by the Stratemeyer Syndicate for boy's adventure books. The name is mostly well-remembered for the *Bomba*, the *Jungle Boy* (1926-1937) and *Great Marvel* series (1906-1935). The Stratemeyer Syndicate was the producer of a number of series for children and adults including the *Nancy Drew* mysteries, the *Hardy Boys*, and others. The Stratemeyer Syndicate was the creation of Edward Stratemeyer, whose ambition was to be a writer à la Horatio Alger. He succeeded in this ambition (eventually even writing eleven books under the pseudonym "Horatio Alger"), turning out inspirational, up-by-the-bootstraps tales. In Stratemeyer's view, it was not the promise of sex or violence that made such reading attractive to boys; it was the thrill of feeling "grown-up" and the desire for a series of stories, an "I want some more" syndrome. Works written under that name include: *Five Thousand Miles Underground*; or, *The Mystery of the Centre of the Earth* (1908), *Jack North's Treasure Hunt* (1907) and *Lost on the Moon*; or, *In Quest of the Field of Diamonds* (1911).

Team Moon - Catherine Thimmesh 2006-06-26

"This behind-the-scenes look at the first Apollo moon landing has the feel of a public television documentary in its breadth and detail" (Publishers Weekly, starred review). Here is a rare perspective on a story we only thought we knew. For *Apollo 11*, the first moon landing, is a story that belongs to many, not just the few and famous. It belongs to the seamstress who put together twenty-two layers of fabric for each space suit. To the engineers who created a special heat shield to protect the capsule during its fiery reentry. It belongs to the flight directors, camera designers, software experts, suit testers, telescope crew, aerospace technicians, photo developers, engineers, and navigators. Gathering direct quotes from some of these folks who worked behind the scenes, Catherine Thimmesh reveals their very human worries and concerns. Culling NASA transcripts, national archives, and stunning NASA photos from *Apollo 11*, she captures not only the sheer magnitude of this feat but also the dedication, ingenuity, and perseverance of the greatest team ever—the team that worked to first put man on that great gray rock in the sky. Winner of the Robert F. Sibert Informational Book

Award "An edge-of-your-seat adventure . . . Lavishly illustrated . . . This exhilarating book . . . will captivate." -Chicago Sun-Times "Thimmesh gives names and voices to the army that got Neil Armstrong and company to the moon and back. The result is a spectacular and highly original addition to the literature of space exploration." -The Horn Book "This beautiful and well-documented tribute will introduce a new generation to that triumphant time." -Kirkus Reviews (starred review)
