It's Our Turn to Eat - Michela Wrong 2009-06-16

"A fast-paced political thriller.... Wrong's gripping, thoughtful book stands as both a tribute to Githongo's courage and a cautionary tale." —New York Times Book Review "On one level, It's Our Turn to Eat reads like a John Le Carré novel.... On a deeper and much richer level, the book is an analysis of how and why Kenya descended into political violence." — Washington Post Called "urgent and important" by Harper's magazine, It's Our Turn to Eat is a nonfiction political thriller of modern Kenya—an eye-opening account of tribal rivalries, pervasive graft, and the rising anger of a prospect-less youth that exemplifies an African dilemma.

**The Qu'ran as Text** - Stefan Wild 1996

This book contains the updated papers of an international symposium The Qur'an as Text which was held at the University of Bonn in November 1993. This collection intends to break away from the 19th-century paradigm of influences, which seems largely exhausted but still dominates Qur'anic studies. Instead, this collection focuses on the literary, the intertextual and the receptional aspects of the Qur'anic text. A new approach to the

holy book of Islam in the light of modern hermeneutics which is based on modern methods of literary history, text-linguistics, and aesthetics can open the door for a new and more adequate understanding of the Qur'an, its role for Islamic religion, and its unique place in the history of world religions today.

**Beginning to Read the Fathers** - Boniface Ramsey 2012

Now revised, *Beginning to Read the Fathers* is an introduction to the church's earliest writers, preachers and theologians. It presupposes no more knowledge on the part of the reader than that the fathers existed and that their ideas might be important and perhaps even interesting. The book does not restrict itself to such topics as Christology and ecclesiology but includes other areas like martyrdom and prayer, which were highly important in shaping the mind and heart of the early church. The material in this book is arranged thematically and follows a natural progression. Each chapter attempts to give a real taste of the subject in question by providing numerous selections from the writings of the fathers, some of them classic statements and some relatively obscure. Fathers from nearly all periods and traditions are cited. The author's opinions, although not nonexistent, are subordinate to the presentation of the fathers themselves. The work was written in a nontechnical style to be read both by beginners and by people with some expertise in the field. It concludes with suggestions for a patristics reading program for those who wish to pursue a study of the fathers in more depth. +

*My Faith as an African* - Jean-Marc Ela 2009-05-01

At a time when Africans, like other peoples, are facing the shock of technological and cultural modernity, liberation of the oppressed must be the primary condition for an authentic inculturation of the Christian message. This is the central axis of the papers in this book, which begins with the questions of faith posed by cultural variables, an internal dimension of the African's condition. In order to understand what is at stake, we need to place these matters in the overall context of a society and a history marked by conflicts-which lead to a rereading of our African memory. The basic issue of the Credibility of Christianity is being raised from within the dynamic which allows Africans to escape from the inhumanity of the destiny to which certain factors would condemn them. So critical reflection on the relevance of an African Christianity requires us to identify the structures or strategies of exploitation and impoverishment against which Africans have always struggled, finding their own specific forms of resistance within their cultures.

*The GoPs in the 22nd Century* - Jim Scarano 2020-05-29

The *GoPs in the 22nd Century* attempts to show how a typical young couple go about their life at work and at leisure after the successful implementation of 'Project Minus Four', a system which

has done away with 'money' as the economic unit that used to allow unspeakable crimes; 'borders', which used to separate countries; 'organised religions', which used to create conflicts; and 'marriage' as a means of owning people. Ray and Gwen typify how life in the 22nd century can be free of anxiety, fear, poverty, violence and conflict, and Ray, as a way of thanking their great-grandparents for being instrumental in the implementation of Project Minus Four, also writes a book to expose the futility of the arguments for and against the so-called 'creation vs evolution' hypothesis, and offers the 'Third Alternative' as the solution to the problem.

Plain Roots - Becki Willis 2018-11

Taryn Clark thought she'd outgrown the need to find her birth mother. She thought that a successful career and a comfortable life in the city were enough to be happy. Did she really need to know about the woman who had given her away? Adopted at birth, her first few years were happy. It hadn't mattered that she didn't know her heritage; she had parents who loved her and wanted her. But divorce, and then death, ripped their tiny family apart, and at the tender age of six, she entered the foster care system. Over the next dozen years, she shuffled from home to home. Finding her roots seemed an impossible dream. But dreams are resilient. An unexpected discovery awakens old yearnings of belonging to a family, of being part of something bigger than herself. Finding the brief, ambiguous note from her birth mother is

enough to unfurl the ribbons of hope still binding her heart. Her quest takes her to Lancaster County, Pennsylvania and the heart of the Plain community. Aided by her unique eye color, a healthy dose of luck, and the private investigator she hires, Taryn finds her birth family easily enough, but finding the truth is another matter. In all her musings, she never imagined a scenario where her mother might be Amish. She never imagined that the fabric of her life might be a patchwork of faith and fear, stitched together with a dark family secret. Taryn is determined to trace her roots, even if it means digging in the mud to do so. Now she's caught in the quicksand of a shocking discovery and the consequences of choices made, almost forty years ago. She'll risk everything to uncover the truth and to claim the family--and the roots--she so desperately craves.

Saints and Their Cults - Stephen Wilson 1985

This is a paperback edition of a collection of ten papers by different authors on the cult of saints, first published in hard covers in 1983. Six have been translated from French including a pioneering study by Robert Hertz, one of Durkheim's most eminent pupils. The editor provides a wide-ranging general and historical introduction, and a 100- page annotated bibliography covering material on the subject in all disciplines and in four main languages.

**Skyward Vol. 1: My Low-G Life** - Joe Henderson 2018

One day, gravity on Earth suddenly became a fraction of what it is now. Twenty years later, humanity has adapted to its new low-gravity reality. And to Willa Fowler, who was born just after G-day, it's pretty awesome. You can fly through the air! I mean, sure, you can also die if you jump too high. So you just don't jump too high. And maybe don't get mixed up in your dad's secret plan to bring gravity back that could get you killed! From writer JOE HENDERSON (showrunner of Fox's Lucifer) and artist LEE GARBETT (Lucifer, Loki: Agent of Asgard) comes the story of a young woman's journey to find her place in a world turned upside down.

*How to sink a business* - Nell Hessa 2020-05-24

How about an expert consulting to sink a business? In this book, Nell Hessa takes us behind the scenes of a micro family business going from the purchase of the business to its wreck, while weaving a light and fun narrative with principles of ethics and management. If it takes talent and persistence to create a successful business, it also takes to sink it. Failure, Hessa says, is not synonymous with closure, in the case of "lowering the doors". Failures can last for years before their fateful end, such as worn-

out relationships and jobs that we hate.

*The Koran: A Very Short Introduction* - Michael Cook 2000-02-25

The Koran has constituted a remarkably strong core of identity and continuity for a religious tradition that is now in its fifteenth century. This Very Short Introduction explores the significance of the Koran both in the modern world and in traditional Muslim culture. Michael Cook provides a lucid and direct account of the Koran as codex, as scripture, as liturgy, and as the embodiment of truth, and examines its means of formation and dissemination. He also discusses issues of interpretation for certain key verses, demonstrating that fecundity of the text for readers throughout the world. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Distributions in the Physical and Engineering Sciences - Alexander I. Saichev 2019-02-11

Distributions in the Physical and Engineering Sciences is a comprehensive exposition on analytic methods for solving science and engineering problems which is written from the unifying viewpoint of distribution theory and enriched with many modern topics which are important to practioners and researchers. The

goal of the books is to give the reader, specialist and non-specialist usable and modern mathematical tools in their research and analysis. Volume 1 provides detailed coverage of asymptotic methods, including the stationary phase and steepest descent methods, for Fourier and other integral transforms from an application perspective. Other topics covered include fractional calculus, the uncertainty principle, wavelets, and multiresolution analysis. Volume 2 contains an analysis of the three basic types of linear PDEs - elliptic, parabolic, and hyperbolic - as well as chapters on first-order nonlinear PDEs and conservation laws. Nonlinear waves, Burger's equations, KdV equations, and the equations of gas dynamics and porous media are also covered. Volume 3 extends the scope to the use of distributional tools in

the theory of generalized stochastic processes and fields, and in anomalous fractional random dynamics. Chapters cover topics such as probability distributions; generalized stochastic processes, Brownian motion, and the white noise; stochastic differential equations and generalized random fields; Burgers turbulence and passive tracer transport in Burgers flows; and linear, nonlinear, and multiscale anomalous fractional dynamics in continuous media. The careful explanations, accessible writing style, many illustrations/examples and solutions also make it suitable for use as a self-study reference by anyone seeking greater understanding and proficiency in the problem solving methods presented. The book is ideal for a general scientific and engineering audience, yet it is mathematically precise.
