Defense Management: Better Guidance Needed in Selecting Operating Methods for Name-Brand, Fast-Food Restaurants - 2001

The military exchange services operate a wide range of retail activities such as department stores, florist shops, barber and beauty shops, gasoline stations, and restaurants. Profits from these activities provide funds for the Department of Defense's (DOD) morale, welfare, and recreation programs. In recent years, the exchange services annual sales exceeded \$9 billion in fiscal year 1999 about \$734 million involved food operations. About 50 percent of the food sales came from about 615 name-brand, fast-food restaurants (e.g., McDonald's, Burger King, Subway, and Pizza Hut) operating on military installations around the world. Name-brand, fast-food restaurant operations, particularly hamburger restaurants, are the topic of this report. It focuses on hamburger restaurants because they represent a major segment of the exchange services name-brand, fast-food sales and because exchange services contracts with two large companies, Burger King and McDonald's, will expire in 2004.

You will need to purchase a new print book to get access to the full experience, including: lifetime access to the online ebook with highlight, annotation, and search capabilities; practice questions from your favorite study aids; an outline tool and other helpful resources. Buy a new version of this textbook and receive access to the Connected eBook with Study Center on CasebookConnect, including: lifetime access to the online ebook with highlight, annotation, and search capabilities; practice questions from your favorite study aids; an outline tool and other helpful resources. Connected eBooks provide what you need most to be successful in your law school classes. The Ninth Edition of Cases, Problems, and Materials on Contracts by Douglas J. Whaley and David Horton features classic cases, new developments, and thought-provoking problems to help students master contract law. Cases, Problems, and Materials on Contracts is known for pioneering the problem method of law school teaching. A staple in classrooms for decades, it stands out from other texts in the scope of coverage and its use of short, carefully constructed Problems to expose students to new concepts, reinforce what they have just learned, and stimulate thought. The Ninth Edition is more accessible than ever. It introduces complicated issues with a clear narrative summary or explicit statement of black-letter law. The cases have been tightly edited for the best effect. And as always, answers to the Problems appear in the Teacher's Manual. The book can also be easily adapted to fit various pedagogical needs. Although it starts with "Agreement" and moves to "Consideration," it is also designed for teachers who prefer to begin with "Consideration" or "Remedies." It can be used in courses that both include and exclude sales. Finally, because it is shorter than most of its rivals, it works in 4-unit, 5-unit, and 6-unit courses. New to the 9th Edition: Cases have been further streamlined and edited for clarity. Expanded use of student-friendly introductions to complex material. Greater emphasis on recent decisions that involve issues to which students can relate. Professors and students will benefit from: The book covers the basics of Contracts Law in a format that allows greater exposure to the legal concepts through the many problems that fill each chapter alongside the most illustrative cases on point. The Assessment multiple-choice questions at the end of each chapter are meatier than such questions in most books, focusing not on the "right answer" so much as on what real attorneys must consider when confronted with the issues presented. Indeed, the whole book is written not just to teach the rules of law but to train the students to be lawyers faced with commercial issues. For example, Problems sometimes ask students whether they would be committing malpractice if they took a certain course of conduct, an issue very much on the mind of actual attorneys but seldom mentioned in law school classrooms.

Making Fast Food - Ester Reiter 1996

Some say the adventurous days of grueling and dangerous scientific exploration are long gone, but Reiter (sociology, Brock U.) undertook a 10-month trek--without pay!--into the uncharted wilds of a Burger King kitchen to bring us first-hand accounts of the strange and marvellous customs of the natives. The illustrations are hilarious. Annotation copyrighted by Book News, Inc., Portland, OR

Civil Procedure in Focus - W. Jeremy Counsellor 2020-02-02

Civil Procedure in Focus by Jeremy Counsellor and Eric Porterfield uses a combination of accessible explanatory text, cases, and other primary legal sources to teach civil procedure, and then provides opportunities for students to apply the law to multiple sets of facts in every chapter. Selected cases illustrate key changes in the law and show how courts have developed and apply doctrine. The unintimidating approach of this casebook provides a hands-on, experiential learning environment that can be essential to many students' success. Through practice-based exercises, students learn to apply legal principles and concepts to real-world scenarios. Simply knowing the facts of a benchmark case is not enough; knowing how to apply the doctrine from one case to a different set of facts enhances a student's ability to succeed in and after law school. New to the Second Edition: Multiple-choice questions at the end of each chapter Discussion of "Snap Removal," a hot topic currently percolating through the federal court system Updates regarding recent US Supreme Court cases regarding personal jurisdiction Professors and students will benefit from: Applying the Concepts and Civil Procedure in Practice exercises. These end-of-chapter exercises encourage students to synthesize the chapter material and apply relevant legal doctrine and code to real-world scenarios. Students can use these exercises for self-assessment or the professor can use them to promote class interaction. Real Life Applications. Every case in a chapter is followed by Real Life Applications, which present a series of questions based on a scenario similar to the facts in the case. Real Life Applications challenge students to apply what they have learned and help prepare them for real-world practice. Professors can use Real Life Applications to spark class discussions or provide them as individual short-answer

assignments. Case Previews and Post-Case Follow-Ups. To succeed, law students must know how to deconstruct and analyze cases. Case Previews highlight the legal concepts in a case before the student reads it. Post-Case Follow-Ups summarize the important points and go one step further—noting the significance of a case to current law as well as its later ramifications. Clear exposition of key concepts in the text that means professors can spend less class time lecturing students on the basics and more time discussing different perspectives on the law, current issues, etc. Essay, short-answer, and multiple-choice questions in every chapter Practice-based hypotheticals that challenge students to apply doctrine to different fact scenarios Exhibits that highlight the relevant rule of law and corresponding legal authority

Labour Relations in the Global Fast-Food Industry - Tony Royle 2004-08-02

The fast-food industry is one of the few industries that can be described as truly global, not least in terms of employment, which is estimated at around ten million people worldwide. This edited volume is the first of its kind, providing an analysis of labour relations in this significant industry focusing on multinational corporations and large national companies in ten countries: the USA, Canada, the UK, the Netherlands, Germany, Australia, New Zealand, Singapore, and Russia. The extent to which multinational enterprises impose or adapt their employment practices in differing national industrial relations systems is analysed, Results reveal

that the global fast-food industry is typified by trade union exclusion, high labour turnover, unskilled work, paternalistic management regimes and work organization that allows little scope for developing workers' participation in decision-making, let alone advocating widely accepted concepts of social justice and workers' rights.

Data Analytics - Subhashish Samaddar 2019-02-18

If you are a manager who receives the results of any data analyst's work to help with your decision-making, this book is for you. Anyone playing a role in the field of analytics can benefit from this book as well. In the two decades the editors of this book spent teaching and consulting in the field of analytics, they noticed a critical shortcoming in the communication abilities of many analytics professionals. Specifically, analysts have difficulty in articulating in business terms what their analyses showed and what actionable recommendations were made. When analysts made presentations, they tended to lapse into the technicalities of mathematical procedures, rather than focusing on the strategic and tactical impact and meaning of their work. As analytics has become more mainstream and widespread in organizations, this problem has grown more acute. Data Analytics: Effective Methods for Presenting Results tackles this issue. The editors have used their experience as presenters and audience members who have become lost during presentation. Over the years, they experimented with different ways of presenting analytics work to make a more compelling case to top managers. They have discovered tried and true methods for improving presentations, which they share. The book also presents insights from other analysts and managers who share their own experiences. It is truly a collection of experiences and insight from academics and professionals involved with analytics. The book is not a primer on how to draw the most beautiful charts and graphs or about how to perform any specific kind of analysis. Rather, it shares the experiences of professionals in various industries about how they present their analytics results effectively. They tell their stories on how to win over audiences. The book spans multiple functional areas within a business, and in some cases, it discusses how to adapt presentations to the needs of audiences at different levels of management.
