Research Methodologies in Supply Chain

Management - Herbert Kotzab 2006-01-16

For research in all subjects and among different philosophical paradigms, research methodologies form one of the key issues to rely on. This volume

brings a series of papers together, which present different research methodologies as applied in supply chain management. This comprises review oriented papers that look at what kind of methodologies have been applied, as well as methodological papers discussing new developments needed to successfully conduct research in supply chain management. The third group is made up of applications of the respective methodologies, which serve as examples on how the different methodological approaches can be applied. All papers have undergone a review process to ensure their quality. Therefore, we hope that this book will serve as a valid source for current and future researchers in the field. Institutions - Management Association, Information Resources 2020-09-10

Though decades ago school shootings were rare events,

today they are becoming normalized. Active shooter drills have become more commonplace as pressure is placed on schools and law enforcement to prevent the next attack. Yet others argue the traumatizing effects of such exercises on the students. Additionally, violence between students continues to remain problematic as bullying pervades children's lives both at school and at home, leading to negative mental health impacts and, in extreme cases, suicide. Establishing safer school policies, promoting violence prevention programs, building healthier classroom environments, and providing better staff training are all vital for protecting students physically and mentally. The Research Anthology on School Shootings, Peer Victimization, and Solutions for Building Safer Educational Institutions examines the current sources of violence within

educational systems, and it offers solutions on how to provide a safer space for both students and educators alike. Broken into four sections, the book examines the causes and impacts that peer victimization has on students and how this can lead to further violence and investigates strategies for detecting the warning signs. The book provides solutions that range from policies and programs that can be established to strategies for teaching nonviolence and promoting coexistence in the classroom. Highlighting a range of topics such as violence prevention, school climate, and bullying, this publication is an ideal reference source for school administrators, law enforcement, teachers, government and state officials, school boards, academicians, researchers, and upper-level students who are intent on stopping the persisting and unfortunate problem that is school violence.

Media, grade: A (80 percent), University of Teesside (Teesside Business School), course: Data Management, 9 entries in the bibliography, language: English, abstract: "Over the past few years, the Employee Credit Union (ECU) has accumulated a large amount of surplus funds, which have been invested in certificates of deposit. It has also experienced a lower loan/share ratio than other credit unions of similar size. Because of these factors, the credit union's average earnings on its investments have slowly declined and its profit margins have been squeezed" (Portfolio Assessment, 2004). The market place of a company changes every few years, and therefore, it needs to be researched and analysed (Kotler, 2001). The ECU decided to conduct a research project to determine how the credit union can solve its problem. The aim of this paper is to: •

Evaluate the research objectives. • Evaluate the research design in light of the stated research objectives. • Use SPSS to obtain simple frequencies for the answers to each question. • Use SPSS to perform appropriate cross-tabulations. • Use SPSS to perform appropriate univariate and bivariate statistical tests after developing hypotheses for these particular tests. The analysis discovers several weaknesses of the research process used by the credit union. Furthermore, many mistakes are found in the research design. The analysis of the survey identifies the strengths and weaknesses of the credit union, which can partly answer the research objectives. The main strengths of the union are its helpful employees, their ability to treat information confidentially, their prompt processing of loan applications, and the way the credit union is managed

and operated. Identified weaknesses are the level of the loan rates, the usefulness of their services, and problems associated with the loan application form.
