Queen of Angels - Greg Bear 2014-04-01

Hugo Award Finalist: A near-future novel of artificial intelligence, human nature, and mass murder that "succeeds on virtually every level" (The New York Times Book Review). In Los Angeles in 2047, advances in the science of psychology have made crime a rare occurrence. So it's utterly shocking when eight bodies are detected in an apartment, and not long afterward the perpetrator is revealed as well: noted poet Emmanuel Goldsmith. The LAPD's Mary Choy—who has had both her appearance and her police work enhanced by

nanotechnology—is tasked with arresting the killer, while psychotherapy pioneer Martin Burke prepares to explore his mind. Meanwhile, Goldsmith's good friend and fellow writer reels at the news—while, far from all of them, a space probe makes a startling discovery. This "excellent" novel about technology, identity, and the nature of consciousness is a thought-provoking stunner by the Nebula Award-winning author of the Eon series and the Forerunner Saga (Chicago Tribune).

Positive Psychology as Social Change - Robert Biswas-Diener 2011-02-01

In recent times there has been growing interest in positive psychology as evidenced by the swell in positive psychology graduate programs, undergraduate courses, journals related to the topic, popular book titles on the topic and scholarly publications. Within the positive psychology community there has been an increased emphasis on the socially beneficial side of positive psychological science. At the First World Congress of the International Positive Psychology Association there was a major push to look at positive psychology as a social change mechanism. This volume will bring together thoughts of leaders in positive psychology from 8 countries to capitalize on the push toward social change and flourishing. By releasing this title at a critical time Springer has the opportunity to help frame the agenda for positive psychology as a force for social change. This seminal work is meant for anyone interested in happiness, strengths, flourishing or positive institutions It introduces Positive Psychology as an unapplied science that can be used to create positive social transformation and enabling institutions. This is a must-have title for academics, especially psychologists, sociologists, economists, and professionals working in the field of Positive Psychology and Well-Being.

Cybernetic Revolutionaries - Eden Medina 2014-01-10

A historical study of Chile's twin experiments with cybernetics and socialism, and what they tell us about the relationship of technology and politics. In *Cybernetic Revolutionaries*, Eden Medina tells the history of two intersecting utopian visions, one political and one technological. The first was Chile's experiment with peaceful socialist change under Salvador Allende; the second was the simultaneous attempt to build a computer system that would manage Chile's economy. Neither vision was fully realized—Allende's government ended with a violent military coup; the system, known as Project Cybersyn, was never completely implemented—but they hold lessons for today about the relationship between technology and politics. Drawing on extensive archival material and interviews, Medina examines the cybernetic system envisioned by the Chilean government—which was to feature holistic system design, decentralized management, human-computer interaction, a national telex network, near real-time control of the growing industrial sector, and modeling the behavior of dynamic systems. She also describes, and documents with photographs, the network's Star Trek-like operations room, which featured swivel chairs with armrest control panels, a wall of screens displaying data, and flashing red lights to indicate economic emergencies. Studying project Cybersyn today helps us understand not only the technological ambitions of a government in the midst of political change but also the limitations of the Chilean revolution. This history further shows how human attempts to combine the political and the technological with the goal of creating a more just society can open new technological, intellectual, and political possibilities. Technologies, Medina writes, are historical texts; when we read them we are reading history.

The Long Shadow of Informality - Franziska Ohnsorge 2022-02-09

A large percentage of workers and firms operate in the informal economy, outside the line of sight of governments in emerging market and developing economies. This may hold back the recovery in these economies from the deep recessions caused by the COVID-19 pandemic--unless governments adopt a broad set of policies to address the challenges of widespread informality. This study is the first comprehensive analysis of the extent of informality and its implications for a durable economic recovery and for long-term development. It finds that pervasive informality is associated with significantly weaker economic outcomes--including lower government resources to combat recessions, lower per capita incomes, greater poverty, less financial development, and weaker investment and productivity.

With heart-pounding action, compelling plot twists, and a rich tapestry of characters, *The Wilkes Insurrection* is a contemporary thriller of anarchic obsession and heroic ambition. The Real Deal - Sandy Weill 2006-10-09

Shortly after we set up shop, the four of us and our wives convened at Arthur's home on Long Island to celebrate. It was a festive occasion, and we all openly shared our aspirations. To this day, I remember the others stressing over and over their desire to become wealthy. Given that Joanie and I were raising two toddlers and lived nearly hand-to-mouth, the talk was certainly seductive. Still, what I remember most from that dinner was my declaration that the money should be secondary--what mattered more to me was to build a great firm: one that would lead the industry, employ lots of people, endure over many years, and, importantly, command respect. Over the next forty-three years, I never altered my priorities."--from *THE REAL DEAL* The Sandy Weill story is truly one for the ages. Starting with \$30,000 in borrowed cash in 1960, and relying on uncanny entrepreneurial instincts, Sandy created one of the leading securities firms in the U.S. and became one of the best known businessmen in the world. After selling his company to American Express and becoming its president, he experienced a professional setback. Undaunted, he cannily parlayed it into a second career, starting over with a sleepy consumer loan company called Commercial Credit, which over the next seventeen years he transformed into the leading global bank, Citigroup. During this span, Weill as chairman and CEO delivered an astounding 2,600 percent return to investors--better than legendary CEO Jack Welch or investor Warren Buffett during that same period. Yet success is never an easy path, and Weill divulges the highs and lows. His ascent to power has been documented by the media over the years, but never before has Weill revealed the brutally honest and unvarnished side of an astonishing life and career. And Weill goes further, sharing his love of philanthropy, a journey that took him "from a mediocre bass drummer in my high-school marching band to the chairmanship of Carnegie Hall." He brings readers into his personal life, introducing them to his wife, Joan, his daily inspiration, and discussing his relationships with competitors and colleagues alike, including proteges like Peter Cohen and Jamie Dimon. Along the way, he shares the most important lessons he learned in business and in life. From a middle-class Brooklyn childhood to corporate legend, philanthropist, financier, and chairman emeritus of Citigroup Inc., *THE REAL DEAL* tells a remarkable story--that of a financial superstar who always loved the game more than the gold.

Agriculture in the City - María Caridad Cruz 2003

During the 1990s, several national economies saw their urban food markets collapse. Like Zambia, Mozambique, and Armenia, Cuba responded to this crisis with a food program that included support to urban agriculture: farming in the city. As a result, food prices are increasing, free markets have been reinstated, production cooperatives have been linked with markets, land has been redistributed, and areas under export crops have been converted to domestic food crops. The Cuban government is now calling upon its cities to become more self-reliant for food OCo a focus that is dramatically modifying the landscape, lifestyle, and food supply of Havana residents."

A Little Lumpen Novelita - Roberto Bolaño 2016-03-21

Published in Spain just before Bolano's death, A Little Lumpen Novelita percolates with a fierce and tender love of women "Now I am a mother and a married woman, but not long ago I led a life of crime": so Bianca begins her tale of growing up the hard way in Rome. Orphaned overnight as a teenager—"our parents died in a car crash on their first vacation without us"—she drops out of school, gets a crappy job, and drifts into bad company. Her younger brother brings home two petty criminals who need a place to stay. As the four of them share the family apartment and plot a strange crime, Bianca learns how low she can fall. Electric, tense with foreboding, and written in jagged, propulsive chapters, A Little Lumpen Novelita delivers a surprising, fractured fable of seizing control of one's fate.

The Oxford Handbook of Borderlands of the Iberian World - Danna A. Levin Rojo 2019-12-04

This collaborative multi-authored volume integrates interdisciplinary approaches to ethnic, imperial, and national borderlands in the Iberian World (16th to early 19th centuries). It illustrates the historical processes that produced borderlands in the Americas and connected them to global circuits of exchange and migration in the early modern world. The book offers a balanced state-of-the-art educational tool representing innovative research for teaching and scholarship. Its geographical scope encompasses imperial borderlands in what today is northern Mexico and southern United States; the greater Caribbean basin, including cross-imperial borderlands among the island archipelagos and Central America; the greater Paraguayan river basin, including the Gran Chaco, lowland Brazil, Paraguay, and Bolivia; the Amazonian borderlands; the grasslands and steppes of southern Argentina and Chile; and Iberian trade and religious networks connecting the Americas to Africa and Asia. The volume is structured around the following broad themes: environmental change and humanly crafted landscapes; the role of indigenous allies in the Spanish and Portuguese military expeditions; negotiations of power across imperial lines and indigenous chiefdoms; the parallel development of subsistence and commercial economies across terrestrial and maritime trade routes; labor and the corridors of forced and free migration that led to changing social and ethnic identities; histories of science and cartography; Christian missions, music, and visual arts; gender and sexuality, emphasizing distinct roles and experiences documented for men and women in the borderlands. While centered in the colonial era, it is framed by pre-contact Mesoamerican borderlands and nineteenth-century national developments for those regions where the continuity of inter-ethnic relations and economic networks between the colonial and national periods is particularly salient, like the central Andes, lowland Bolivia, central Brazil, and the Mapuche/Pehuenche captaincies in South America. All the contributors are highly recognized scholars, representing different disciplines and academic traditions in North America, Latin America and Europe.
