Pulitzer Prize for Fiction, as well as seven other awards, *The Sympathizer* is one of the most acclaimed books of the twenty-first century. With the pace and suspense of a thriller and prose that has been compared to Graham Greene and Vladimir Nabokov, *The Sympathizer* is a sweeping epic of love and betrayal. The narrator, a communist double agent, is a "man of two minds," a half-French, half-Vietnamese army captain who comes to America after the Fall of Saigon, and while building a new life with other Vietnamese refugees in Los Angeles is secretly reporting back to his communist superiors in Vietnam. *The Sympathizer* is a blistering exploration of identity and America, a gripping spy novel, and a powerful story of love

and friendship.

Communism's Shadow - Grigore Pop-Eleches 2017-05-09

It has long been assumed that the historical legacy of Soviet Communism would have an important effect on post-communist states. However, prior research has focused primarily on the institutional legacy of communism.

Communism's Shadow instead turns the focus to the individuals who inhabit post-communist countries, presenting a rigorous assessment of the legacy of communism on political attitudes.

Post-communist citizens hold political, economic, and social opinions that consistently differ from individuals in other countries. Grigore Pop-Eleches and Joshua Tucker introduce two distinct frameworks to explain these differences, the first of which focuses on the effects of living in a post-communist country, and the second on living through communism. Drawing on large-scale research encompassing post-communist states and other countries around the globe, the authors demonstrate that living through communism has a clear, consistent influence on why citizens in post-communist countries are, on average, less supportive of democracy and markets and more supportive of state-provided social welfare. The longer citizens have

lived through communism, especially as adults, the greater their support for beliefs associated with communist ideology—the one exception being opinions regarding gender equality. A thorough and nuanced examination of communist legacies' lasting influence on public opinion, *Communism's Shadow* highlights the ways in which political beliefs can outlast institutional regimes.

Low-intensity Conflict in the Third World - Stephen Blank 1988

A common thread ties together the five case studies of this book: the persistence with which the bilateral relationship between the United States and the Soviet Union continues to dominate American foreign and regional policies. These essays analyze the LIC environment in Central

Asia, the Middle East, Southeast Asia, Latin America, and sub-Saharan Africa.

The Fingerprint - U. S. Department Justice
2014-08-02

The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction

ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

The Differentiated Classroom - Carol Ann Tomlinson 2014-05-25
Although much has changed in schools in recent years, the power of differentiated instruction remains the same—and the need for it has only increased. Today's classroom is more diverse, more inclusive, and more plugged into technology than ever before. And it's led by teachers under enormous pressure to help decidedly unstandardized students meet an expanding set of rigorous, standardized learning targets. In this updated second edition of her best-

selling classic work, Carol Ann Tomlinson offers these teachers a powerful and practical way to meet a challenge that is both very modern and completely timeless: how to divide their time, resources, and efforts to effectively instruct so many students of various backgrounds, readiness and skill levels, and interests. With a perspective informed by advances in research and deepened by more than 15 years of implementation feedback in all types of schools, Tomlinson explains the theoretical basis of differentiated instruction, explores the variables of curriculum and learning environment, shares dozens of instructional strategies, and then goes inside elementary and secondary classrooms in nearly all subject areas to illustrate how real teachers are

applying differentiation principles and strategies to respond to the needs of all learners. This book's insightful guidance on what to differentiate, how to differentiate, and why lays the groundwork for bringing differentiated instruction into your own classroom or refining the work you already do to help each of your wonderfully unique learners move toward greater knowledge, more advanced skills, and expanded understanding. Today more than ever, *The Differentiated Classroom* is a must-have staple for every teacher's shelf and every school's professional development collection.

Quaker Experiences in International Conciliation

- C. H.

Mike Yarrow 1978-01-01
As far back as the early 1900s, the Quakers have been engaged in a program of quiet private diplomacy that won them a Nobel Peace Prize in 1947. During the turbulent 1960s, they acted as unofficial conciliators in several tense situations. This comprehensive study of Quaker peace-making activities focuses primarily on the variety and effectiveness of their efforts in Berlin from 1960 to 1973, in India / Pakistan in 1965, and in Nigeria from 1967 to 1970.

The Case for Peace -

Alan Dershowitz

2005-08-17

In The Case for Peace, Dershowitz identifies twelve geopolitical barriers to peace between Israel and Palestine—and explains

how to move around them and push the process forward. From the division of Jerusalem and Israeli counterterrorism measures to the security fence and the Iranian nuclear threat, his analyses are clear-headed, well-argued, and sure to be controversial. According to Dershowitz, achieving a lasting peace will require more than tough-minded negotiations between Israelis and Palestinians. In academia, Europe, the UN, and the Arab world, Israel-bashing and anti-Semitism have reached new heights, despite the recent Israeli-Palestinian movement toward peace. Surveying this outpouring of vilification, Dershowitz deconstructs the smear tactics used by Israel-haters and shows how this kind of anti-Israel McCarthyism is aimed at

Deciphering Race - Laura Callanan 2006

Deciphering Race engages with the complex and contested world of Victorian racial discourse. In the five central texts under consideration in this study--Harriet

Martineau's *The Hour and the Man*, Robert Knox's

The Races of Men, Charles Dickens and

Wilkie Collins's "The Perils of Certain

English Prisoners," the transcript of the

Controversy, and James Grant's *First Love* and

Last Love--a white English author or

character turns to the aesthetic in order to assuage a sense of anxiety produced by a confrontation with racial otherness. White characters or narrators confront the limitations of preconceived ideologies or the interlacing of oppressions, and subsequently falter. In this manner these narratives confront the complexity, indeterminacy, and irrationality of both racial difference and the systems put in place to understand that difference. *Deciphering Race* unpacks this narrative turn to the aesthetic in writings by white English individuals and thus reveals the instability at the heart of cultural understanding of race and racial tropes at mid-century. This series of readings will help to see how figurative

structures, while providing a bridge between different cultures and epistemologies, also reinforce a distance that keeps groups separate. Only by disentangling these structures, by addressing and unpacking our assumptions and narratives about those different from ourselves, and by understanding our deep cultural anxiety and investment in these ways of talking about one another, can we begin to create the conditions for productive, local understanding between different cultures, races, and communities.

one. But if you are queer or gender non-conforming, life stresses may also include discrimination in housing and health care, employment barriers, homelessness, family rejection, physical attacks or threats, and general unfair treatment and oppression—all of which lead to overwhelming feelings of hopelessness and powerlessness. So, how can you gain resilience in a society that is so often toxic and unwelcoming? In this important workbook, you'll discover how to cultivate the key components of resilience: holding a positive view of yourself and your abilities; knowing your worth and cultivating a strong sense of self-esteem; effectively utilizing resources; being assertive and creating a support

community; fostering hope and growth within yourself, and finding the strength to help others. Once you know how to tap into your personal resilience, you'll have an unlimited well you can draw from to navigate everyday challenges. By learning to challenge internalized negative messages and remove obstacles from your life, you can build the resilience you need to embrace your truest self in an imperfect world.

The Overcoming of History in War and Peace

- Jeff Love 2004

The Overcoming of History in "War and Peace" marks a radical departure from the critical tradition dominated by Sir Isaiah Berlin's view that the novel is deeply divided against itself, a majestically flawed contest of brilliant art and clumsy thought. To

the contrary, Jeff Love argues that the apparently divided nature of the text, its multi-leveled negotiation between different kinds of representation, expresses the rich variety of the novel's very deliberate striving to capture the fluidity of change and becoming in the fixed forms of language. The inevitable failure of this striving, revealing the irreducible conflict between infinite desire and finite capacity, is at once the source of new beginnings and the repetition of old ones, a wellspring of continually renewed promises to achieve a synoptic vision of the whole that the novel cannot fulfill. This repetitive struggle between essentially comic and tragic conceptions of human action, far from being a

pervasive flaw in the texture of the novel, in fact constitutes its dynamic center and principal trope as well as the productive origin of the unusual features that distinguish it as an uncommonly bold narrative experiment.

cultures where the identity of the nation-state is in a considerable state of flux This book also suggests that the 'commemorative fever' that is sweeping Vietnam is about more than Vietnam's history. It also has a great deal to do with the problems premodern cultures presented to those who promoted the creation of contemporary states. Conflict, Culture, and History - Stephen J. Blank 2002-06-01

Five specialists examine the historical relationship of culture and conflict in various

regional societies. The authors use Adda B. Bozeman's theories on conflict and culture as the basis for their analyses of the causes, nature, and conduct of war and conflict in the Soviet Union, the Middle East, Sinic Asia (China, Japan, and Vietnam), Latin America, and Africa. Drs. Blank, Lawrence Grinter, Karl P. Magyar, Lewis B. Ware, and Bynum E. Weathers conclude that non-Western cultures and societies do not reject war but look at violence and conflict as a normal and legitimate aspect of sociopolitical behavior. It also examines the campaign from the perspective of the military thought contained in the ancient Chinese military classic, *The Art of War*, and the Communist operational doctrine in effect at the time of

the campaign. What emerges is a picture of what operational art can contribute to warfare. Communist commanders consistently maintained an awareness of the war situation as a whole and continually ensured that the objectives of their military operations were linked to strategic goals. The study shows that Su Yu, the acting commander of the East China Field Army, was an excellent practitioner of operational art and a general who was willing to speak out against military operations that would not contribute to achieving political, social, or economic goals. The study contains background material on the Communist military forces that fought the campaign and the commanders who led them in the field. Using messages sent between various Communist

headquarters, the study describes and analyzes the operational decisions that were made. Much of this material has not appeared before in English. This enables readers to gain a fresh appreciation for the professional competence of military men who were among the founding generation of the People's Liberation Army and later played significant roles in building the military strength of the People's Republic of China.

Transforming the Workforce for Children Birth Through Age 8 - National Research Council 2015-07-23

and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings

in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with

adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Biowarrior - Igor' Valerianovich

Domaradskii 2003

This extraordinary memoir by a leading Russian scientist who worked for decades at the nerve center of the top-secret "Biopreparat" offers a chilling look into the biological weapons program of the former Soviet Union, vestiges of which still exist today in the Russian Federal Republic. Igor Domaradskij calls himself an "inconvenient man": a dedicated scientist but a nonconformist who was often in conflict with government and military apparatchiks. In this

book he reveals the deadly nature of the research he participated in for almost fifteen years. Domaradskij goes into great detail about the secrecy, intrigue, and the bureaucratic maze that enveloped the Biopreparat scientists, making them feel like helpless pawns. What stands out in his account is the hasty, patchwork nature of the Soviet effort in bioweaponry. Far from being a smooth-running, terrifying monolith, this was an enterprise cobbled together out of the conflicts and contrempts of squabbling party bureaucrats, military know-nothings, and restless, ambitious scientists. In some ways the inefficiency and lack of accountability in this system make it all the more frightening as a worldwide threat. For today its dimensions

are still not fully known, nor is it certain that any one group is completely in control of the proliferation of this lethal weaponry. "Biowarrior" is disturbing but necessary reading for anyone wishing to understand the nature and dimensions of the biological threat in an era of international terrorism.

Street Without Joy - Bernard B. Fall
2018-02-16

First published in 1961 by Stackpole Books, *Street without Joy* is a classic of military history. Journalist and scholar Bernard Fall vividly captured the sights, sounds, and smells of the brutal—and politically complicated—conflict between the French and the Communist-led Vietnamese nationalists in Indochina. The French fought to the bitter end, but even with the lethal advantages of a modern military, they could not stave off the Viet Minh insurgency of hit-and-run tactics, ambushes, booby traps,

and nighttime raids. The final French defeat came at Dien Bien Phu in 1954, setting the stage for American involvement and a far bloodier chapter in Vietnam's history. Fall combined graphic reporting with deep scholarly knowledge of Vietnam and its colonial history in a book memorable in its descriptions of jungle fighting and insightful in its arguments. After

more than a half a century in print, Street without Joy remains required reading.
