Founded in 1959 with the purpose of disseminating the most recently developed scientific information to groups in industry, government, high schools, and universities, REA has since become a successful and highly respected publisher of study aids, test preps,

handbooks, and reference works. REA's Test Preparation series includes study guides for all academic levels in almost all disciplines. Research & Education Association publishes test preps for students who have not yet completed high school, as well as high school students preparing to enter college. Students from countries around the world seeking to attend college in the United States will find the assistance they need in REA's publications. For college students seeking advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are looking for among REA's publications. While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada. PREFACE This book provides an accurate and complete representation of the Advanced Placement Examination in Chemistry.

Our six practice exams are based on the most recently administered Advanced Placement Chemistry Exams. Each exam is three hours in length and includes every type of question that can be expected on the actual exam. Following each exam is an answer key complete with detailed explanations designed to clarify and contextualize the material. By completing all six exams and studying the explanations which follow, you can discover your strengths and weaknesses and thereby become well prepared for the actual exam. The formulas and tables for the AP Chemistry Exam can be found at the back of this book, beginning on page 417. You will be provided these formulas and tables when you take the actual exam. You should also use this material when taking the practice tests in this book.

#### ABOUT THE TEST

The Advanced Placement Chemistry Examination is offered each May at participating schools and multi-school centers throughout the world. The Advanced Placement Program is designed to allow high school students to pursue college-level studies while attending high school. The participating colleges, in turn, grant credit and/or advanced placement to students who do well on the examinations. The Advanced Placement Chemistry course is designed to be the equivalent of a college introductory chemistry course, often taken by chemistry majors in their first year of college. Since the test covers a broad range of topics, no student is expected to answer all of the questions correctly. The exam is divided into two sections: 1) Multiple-choice: Composed of 75 multiple-choice questions designed to test your ability to recall and understand a broad range of chemical concepts and calculations. This section constitutes 45% of the final

grade and you are allowed 90 minutes for this portion of the exam. Calculators are not permitted for this section of the exam. 2) Free-response section: Composed of several comprehensive problems and essay topics. This section constitutes 55% of the final grade and the student is allowed 90 minutes for this portion of the exam. You may choose from the questions provided. These problems and essays are designed to test your ability to think clearly and to present ideas in a logical, coherent fashion. You can bring an electronic hand-held calculator for use on the 40-minute free-response section. Essay and chemical-reaction questions comprise the last 50 minutes of the test, during which calculators are not permitted. A final note about calculators: Most hand-held models are allowed in the test center; the only notable exceptions are those with typewriter-style (QWERTY) keypads. If you are unsure if your calculator is permitted, check with your teacher or Educational Testing Service.

#### SCORING

The multiple-choice section of the exam is scored by crediting each correct answer with one point, and deducting only partial credit (one-fourth of a point) for each incorrect answer. Omitted questions receive neither a credit nor a deduction. The essay section is scored by a group of more than 1,000 college and high school educators familiar with the AP Program. These graders evaluate the accuracy and coherence of the essays accordingly. The grades given for the essays are combined with the results of the multiple-choice section, and the total raw score is then converted to the program's five-point scale: 5 - Extremely well qualified 4 - Well qualified 3 - Qualified 2 - Possibly qualified

*Chemistry: A Very Short Introduction* - Peter Atkins 2015-02-26

Most people remember chemistry from their schooldays as largely incomprehensible, a subject that was fact-rich but understanding-poor, smelly, and so far removed from the real world of events and pleasures that there seemed little point,

except for the most introverted, in coming to terms with its grubby concepts, spells, recipes, and rules. Peter Atkins wants to change all that. In this Very Short Introduction to Chemistry, he encourages us to look at chemistry anew, through a chemist's eyes, in order to understand its central concepts and to see how it contributes not only towards our material comfort, but also to human culture. Atkins shows how chemistry provides the infrastructure of our world, through the chemical industry, the fuels of heating, power generation, and transport, as well as the fabrics of our clothing and furnishings. By considering the remarkable achievements that chemistry has made, and examining its place between both physics and biology, Atkins presents a fascinating, clear, and rigorous exploration of the world of chemistry - its structure, core concepts, and exciting contributions to new cutting-edge technologies. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area.  About Research & Education Association  
 Research & Education Association (REA) is an organization of educators, scientists, and engineers specializing in various academic fields. Founded in 1959 with the purpose of disseminating the most recently developed scientific information to groups in industry, government, high schools, and universities, REA has since become a successful and highly respected publisher of study aids, test preps, handbooks, and reference works. REA's Test Preparation series includes study guides for all academic levels in almost all disciplines. Research & Education Association publishes test preps for students who have not yet completed high school, as well as high school students preparing to enter college. Students from countries around the world seeking to attend college in the United States will find the assistance they need in REA's publications. For college students seeking advanced degrees, REA publishes test preps for many major graduate school admission examinations in a wide variety of disciplines, including engineering, law, and medicine. Students at every level, in every field, with every ambition can find what they are looking for among REA's publications.

While most test preparation books present practice tests that bear little resemblance to the actual exams, REA's series presents tests that accurately depict the official exams in both degree of difficulty and types of questions. REA's practice tests are always based upon the most recently administered exams, and include every type of question that can be expected on the actual exams. REA's publications and educational materials are highly regarded and continually receive an unprecedented amount of praise from professionals, instructors, librarians, parents, and students. Our authors are as diverse as the fields represented in the books we publish. They are well-known in their respective disciplines and serve on the faculties of prestigious high schools, colleges, and universities throughout the United States and Canada.

CHAPTER 1 - PASSING THE CLEP GENERAL CBTs ABOUT THIS BOOK This book, part of REA's two-volume set for the most thorough preparation for the CLEP General Examinations available, provides you with an accurate and complete review for the five CLEP General Computer-Based Tests, or CBTs. Inside you will find reviews - all based on the official CLEP exams - for each of the following subjects: English Composition (with and without Essay), Humanities, Mathematics, Natural Sciences, and Social Sciences and History. You will also find drill questions that will help you prepare for the actual exam. For each drill, we provide an answer key with detailed explanations designed to help you better grasp and retain the test material. "This volume contains extensive topical reviews and drills prepared expressly to help you get ready for the CLEP General CBTs. Full length practice tests paralleling the actual exams are presented in our

companion volume, REA's The Best Test Preparation for the CLEP General Exams." ABOUT THE CLEP GENERAL CBTs Who takes the CLEP General CBTs and what are they used for? CLEP examinations are usually taken by people who have acquired knowledge outside the classroom and wish to bypass certain college courses and earn college credit. The College-Level Examination Program is designed to reward students for learning - no matter where or how that knowledge was acquired. More than 2,900 colleges grant credit and/or advanced standing for CLEP exams. This makes CLEP the most widely accepted credit-by-examination program in the country. Although most CLEP examinees are adults returning to college, many graduating high school seniors, enrolled college students, and international students also take the exams to earn college credit or to demonstrate their ability to perform at the college level. There are no prerequisites, such as age or educational status, for taking CLEP examinations. However, you must meet specific requirements of the particular institution from which you wish to receive CLEP credit. Most CLEP examinations include material usually covered in an undergraduate course with a similar title to that of the exam (e. g., History of the United States I). However, the five exams covered in this book do not deal with subject matter covered in any particular course but rather with material taken as general requirements during the first two years of college. These general exams are English Composition (with or without essay), Humanities, College Mathematics, Natural Sciences, and Social Sciences and History. Who administers the exams? The CLEP is developed by the College Board, administered by Educational Testing Service (ETS), and involves the

assistance of educators throughout the country. The test development process is designed and implemented to ensure that the content and difficulty level of the test are appropriate. When and where are the exams given? The CLEP General Examinations are offered year-round at some 1,400 test centers in the United States and abroad. To find the test center nearest you and to register for the exam, you should obtain a copy of the free booklets CLEP Colleges and CLEP Information for Candidates and Registration Form, which are available at most colleges where CLEP credit is granted, or by contacting: CLEP Services P.O. Box 6600 Princeton, NJ 08541-6600 Phone: (609) 771-7865 Website: <http://www.collegeboard.com>

HOW TO USE THIS BOOK What do I study first? Read over this introduction and our suggestions for test-taking, take the first practice test in your subject to determine your area(s) of weakness, and then go back and focus your studying on those specific problems. Make copies of the appropriate answer sheets each time you take a practice test (answer sheets are located at the back of this book). Studying each subject thoroughly will reinforce the basic skills you will need to do well on the exam. Be sure to take the practice tests to become familiar with the format and procedures involved with taking the actual exam - and, of course, to make yourself completely comfortable with the material. To best utilize your study time, follow our CLEP General Examinations Independent Study Schedule located in the front of this book. This schedule is designed to guide you through one General Examination at a time. You should repeat the schedule for each exam for which you're preparing. The schedule is based on a six-week program but

can be condensed to three weeks, if necessary, by collapsing each two-week period into one. When should I start studying? It is never too early to start studying for the CLEP General Examinations. The earlier you begin, the more time you will have to sharpen your skills. Do not procrastinate! Cramming is not an effective way to study, since it does not allow you the time needed to learn the test material. The sooner you learn the format of the exam, the more time you will have to familiarize yourself with it.

FORMAT OF THE CLEP GENERAL CBTs The five computer-based CLEP General Examinations cover material taught in classes that most students take as requirements in the first two years of college. The General CBT in English Composition gauges the skills you would need to complete most first-year college composition courses. There are two versions of the English Composition exam - with essay and without essay. (Credit-granting policies differ among colleges. Check with your prospective school to find out which version is accepted.) The first version has approximately 90 multiple-choice questions, each with five possible answer choices, to be answered in 90 minutes. The second version has one section with approximately 50 multiple-choice questions, each with five answer choices, and a second section with one essay. The student has 45 minutes to complete each of the two sections. The approximate breakdown of topics is as follows:

All-Multiple-Choice Version "Skills at the Sentence Level (55%)" -  
Sentence boundaries - Economy and clarity of expression -  
Concord/Agreement: subject-verb; verb tense; pronoun reference, shift, number - Active/passive voice -

### SCORING THE CLEP GENERAL CBTs

The CLEP General Examinations are scored on a scale of 200 to 800. This does not apply, however, to the English Composition with Essay Questions Exam. The essays on this exam are scored on a scale of 2 to 8. There is a drill question in the writing skills section of the English Composition review that asks you to write an essay on a given topic. To score your essay, we suggest you give it to two English teachers or professors to grade. Refer to the completed essays in the detailed explanations of answers section of the review for scoring criteria. The completed essays will show you what the judges will be looking for, and the essay score from the English teachers will help you judge your progress. When will I receive my score report? Right after you finish (except for the English Composition essay, which requires human graders and whose score will be mailed to you), the computer will generate a printout of your score report, which the administrator will hand you. If you want your scores reported to a college or other institution, you must fill in the correct code number on your answer sheet at the time you take the examination. Since your scores are kept on file for 20 years, you may

also request transcripts from ETS at a later date.

### STUDYING FOR THE CLEP GENERAL CBTs

It is crucial for you to choose the time and place for studying that works best for you. Some students set aside a certain number of hours every morning, while others choose to study at night before going to sleep. Only you can determine when and where your study time will be most effective. But be consistent and use your time wisely. Work out a study routine and stick to it! When you take our practice tests, try to make your testing conditions as much like the actual test as possible. Turn off the television or radio, and sit down at a quiet table or desk free from distraction. Use a timer to ensure that each section is accurately clocked. As you complete each practice test, score it and thoroughly review the explanations for the questions you answered incorrectly; however, do not review too much at one sitting. Concentrate on one problem area at a time by reviewing the question and explanation, and by studying our review until you are confident that you completely understand the material. Keep track of your scores and mark them on the scoring worksheet. By doing so, you will be able to gauge your progress and discover general weaknesses in particular sections. You should carefully study the review sections that cover your areas of difficulty, as this will build your skills in those areas. If you do poorly on a section, do not develop a negative attitude - it only means you need to further review the material. You should carefully study the reviews that cover your areas of difficulty, as this will build your skills in those areas. A negative attitude could prove to be your biggest stumbling block. It is important that you get a good start and that you are

positive as you review and study the material. TEST-TAKING TIPS You may never have taken a standardized computer-based test, but it's not hard to learn the things you need to know to be comfortable on test day. Know the format of the CBT. CLEP CBTs are not adaptive but rather fixed-length tests. In a sense, this makes them kin to the familiar pen-and-paper exam in that you have the same flexibility to back and review your work in each section. Moreover, the format hasn't changed a great deal from the paper-and-pencil CLEP. You are likely to see some so-called pretest questions as well, but you won't know which they are and they won't be scored. Use the process of elimination. If you don't immediately see the correct answer among the choices, go down the list and eliminate as many as you can. Confidently casting aside choices will help you isolate the correct response, or at least knock your choices down to just a few strong contenders. This approach has the added benefit of keeping you from getting sidetracked and distracted by what in fact may be just an occasional tricky question. Importantly, your score is based only on the number of questions you answer correctly. Read all of the possible answers. Just because you think you have found the correct response, do not automatically assume that it is the best answer. Read through each choice to be sure that you are not making a mistake by jumping to conclusions. Work quickly and steadily. You will have only 45 minutes to work on an average of 50 questions in each section, so work quickly and steadily to avoid focusing on any one question too long. Taking our practice tests will help you learn to budget your time. Acquaint yourself with the CBT screen. Familiarize yourself with the

CLEP CBT screen beforehand by logging onto the College Board Website. Waiting until test day to see what it looks like in the pretest tutorial risks injecting needless anxiety into your testing experience. Be sure that your answer registers before you go to the next item. Look at the screen to see that your mouse-click causes the pointer to darken the proper oval. This takes far less effort than darkening an oval on paper, but don't lull yourself into taking less care! THE DAY OF THE EXAM Preparing to Take the CLEP CBT On the day of the test, you should wake up early (after a decent night's rest, one would hope) and have a good breakfast. Dress comfortably so that you are not distracted by being too hot or too cold while taking the test. Plan to arrive at the test center early. This will allow you to collect your thoughts and relax before the test, and will also spare you the anxiety that comes with being late. No one will be allowed into the test session after the test has begun. Before you set out for the test center, make sure that you have your admission form, Social Security number, and a photo ID with your signature (e.g., driver's license, student identification card, or current alien registration card). The test center administrator will ask you for photo ID when you arrive. After your test center fee is collected and registration is completed, you will be assigned to a computer. You will then key in the standard personal information, including credit card information. Next, you'll take the tutorial. During the Test Finally the exam will be upon you. Here's what to expect: - Since it's built right into the CLEP testing software, an on-screen non-graphing scientific calculator will pop up for the College Mathematics CBT. You should take into account, however, that a

calculator is not deemed necessary to answer any of the test's questions. - Scrap paper will be provided to you for all CLEP CBT examinations. - At times your computer may seem to slow down. Don't worry: the built-in timer will not advance until your next question is fully loaded and visible on screen. - Just as you can on a paper-and-pencil test, you'll be able to move freely between questions within a section. - You'll have the option to mark questions and review them. - You may wear a wristwatch to the test center, but it cannot make any noise which could disturb your fellow test-takers. - No computers, dictionaries, textbooks, notebooks, scrap paper, briefcases, or packages will be permitted into the test center; drinking, smoking, and eating are prohibited. You may, however, bring your own nonprogrammable calculator if you're sitting for the CLEP College Mathematics CBT. Consult College Board publications (including the Collegeboard.com website) for details. After the Test Once you have informed the test center administrator that you're done, you will end your session on the computer, which in turn will generate the printout of a score report (except for the English Composition essay, which requires human graders and whose score will be mailed to you) that the administrator will hand you. Then, go home and relax - you deserve it!
