

Child Abuse Trauma Theory And Treatment Of The Lasting Effects Interpersonal Violence Practice Series

If you ally infatuation such a referred **Child Abuse Trauma Theory And Treatment Of The Lasting Effects Interpersonal Violence Practice Series** ebook that will meet the expense of you worth, get the no question best seller from us currently from several preferred authors. If you desire to humorous books, lots of novels, tale, jokes, and more fictions collections are after that launched, from best seller to one of the most current released.

You may not be perplexed to enjoy all books collections Child Abuse Trauma Theory And Treatment Of The Lasting Effects Interpersonal Violence Practice Series that we will entirely offer. It is not re the costs. Its nearly what you dependence currently. This Child Abuse Trauma Theory And Treatment Of The Lasting Effects Interpersonal Violence Practice Series, as one of the most dynamic sellers here will extremely be among the best options to review.

Attachment-Focused Trauma Treatment for Children and Adolescents - Niki Gomez-Perales 2015-06-05

Attachment-Focused Trauma Treatment for Children and Adolescents brings together two powerful treatment directions that exponentially expand the knowledge and skills available to child and adolescent trauma therapists. The book provides theoretical knowledge, clinical approaches, and specific, detailed techniques that clinicians will find indispensable in the treatment of the most challenging and high-risk young trauma victims. Also included are case studies, developed from over three decades of experience, that show the reader how to use the techniques in real-life settings. The treatment approach described here is flexible enough to adapt to real clients in the real world, regardless of trauma and attachment histories, family and living situations, or difficulties engaging in supportive therapeutic relationships. Clear and cohesive, the model presented here allows room for the individuality and approach of each therapist so that the therapeutic relationship can evolve in a genuine and unique way. An appendix of photocopiable worksheets gives interactive tools for therapists to immediately use with clients.

Cumulated Index Medicus - 1999

Working with Child Abuse and Neglect - Vernon R. Wiehe 1996-06-24

How do you intervene in abusive and neglectful families, or prevent maltreatment in families at risk? How can you find the answers you need in the overwhelming array of information now available? This volume helps readers focus by evaluating a wealth of references to current published literature and pinpointing the practical applications that put these findings into action.

Condensing the explosion of information about child maltreatment into one provoking yet accessible primer, the author first offers an historical perspective on child maltreatment and an assessment of the scope of the problem. He then discusses theoretical perspectives for understanding the problem and specific treatment and prevention techniques. Informa

Treating Sexually Abused Children and Their Nonoffending Parents - Esther Deblinger 1996

Empirical evidence increasingly indicates that cognitive-behavioural therapy techniques can be used successfully to treat clients who have been sexually abused. An ideal guide for practitioners of any theoretical orientation, this practical manual has been designed specifically for therapists who want to use this approach to treat sexually abused children and their non-offending parents. The authors illustrate theoretically sound treatment using sample therapist-client dialogue, examples and exercises. Issues explored include: gradual exposure; modelling; coping skills training; education regarding sexuality, sexual abuse and personal safety skills; and behaviour management skills. Deblinger and Heflin skilfully introduce h

Growing Up with Domestic Violence - Peter G. Jaffe 2011-01-01

This compact and easy-to-read text by leading experts shows practitioners and students how to recognize the impact of intimate partner violence (IPV) on children and youth and to provide effective clinical interventions and school-based prevention programs. Exposure to IPV is defined using examples from different ages and developmental stages. The book describes the effects of exposure to IPV and reviews epidemiology and

etiology. Its main focus is on proven assessment, intervention, and prevention strategies. Relevant and current theories regarding the impact of exposure on children and youth are reviewed, and illustrative real-life case studies from the clinical experiences of the authors are described.

Treating Survivors of Childhood Abuse and Interpersonal Trauma - Marylene Cloitre 2020-06-11

Now revised and expanded with 50% new content reflecting important clinical refinements, this manual presents a widely used evidence-based therapy approach for adult survivors of chronic trauma. Skills Training in Affective and Interpersonal Regulation (STAIR) Narrative Therapy helps clients to build crucial social and emotional resources for living in the present and to break the hold of traumatic memories. Highly clinician friendly, the book provides everything needed to implement STAIR--including 68 reproducible handouts and session plans--and explains the approach's theoretical and empirical bases. The large-size format facilitates photocopying; purchasers also get access to a Web page where they can download and print the reproducible materials. First edition title: *Treating Survivors of Childhood Abuse: Psychotherapy for the Interrupted Life*. New to This Edition *Reorganized, simplified sessions make implementation easier. *Additional session on emotion regulation, with a focus on body-based strategies. *Sessions on self-compassion and on intimacy and closeness in relationships. *Chapter on emerging applications, such as group and adolescent STAIR, and clinical contexts, such as primary care and telemental health. *Many new or revised handouts--now downloadable. *Updated for DSM-5 and ICD-11.

PTSD Research Quarterly - 1990

A Child Interviewer's Guide - Wendy Bourg 1999-02-17

The book's coverage of forensic interviewing topics is complete, from deciding which children could benefit from a forensic interview, gathering background information and preparing the room, to posing appropriate questions and using tools, to closing and documenting the interview.

Pattern Changing for Abused Women - Marilyn Shear Goodman 1995

Designed for facilitators of groups for physically, emotionally and sexually abused women, this volume examines a programme that focuses on the woman herself and her power to change the course of her life. The book is based on the accumulated experience of the authors and their continuing evaluation of groups they have facilitated over the past eight years. Both material for clients and easy-to-follow scripts for group leaders are included. Educational rather than therapeutic, the programme includes sessions on family roles, boundaries, feelings and assertiveness skills. It is designed to enable abused women to: understand the problem and reality of abuse for the entire family; set realistic goals; become aware of lifelong

The Psychosomatic Assessment - Fava 2012

Expands and refines the psychosomatic approach in clinical practice Psychosomatic medicine has developed methods to increase diagnostic accuracy and improve targeted therapeutic approaches in all fields of medicine. In this context, clinimetrics, the science of clinical measurements, provides unprecedented opportunities for psychosomatic assessment. This volume illustrates how this approach can be translated into

everyday practice complementing and improving the medical interview. The most sensitive and reliable clinical methods are presented for evaluating specific psychosocial aspects of disease, i.e. childhood adversities, life events and chronic stress, lifestyle, sexual function, subclinical and affective disturbances, personality, illness behavior, well-being and family dynamics. Each chapter provides practical illustrations as to how crucial information can be obtained with specific methods individualized according to the patients' needs. A hyperlink is provided to a website that contains many of the instruments assessed in the volume. This book enables the reader to understand the value of the psychosomatic approach in clinical practice. It is intended to expand and refine the skills of clinicians who work in general and specialized medicine and psychiatry, whether physicians, psychologists or other health professionals.

The Family-School Connection - Bruce A. Ryan 1995-05-15
Currently, only about 50% of American youths live in traditional two-parent, first-marriage families. This fact, combined with often bleak economic and social realities, creates the backdrop of interactions between families, children, and schools are examined in this probing volume. Answering a need for evaluative research in this area of increasing public interest, the contributors build a model for evaluation, focusing on the dynamics of family-school connections. How is school achievement influenced by parent-child interactions and the family environment? How do school, family, community, and peer-group connections affect early adolescents? What is the family's role in the success of learning-disabled youth or in school truancy? What effect does parental discord and divorce have on a child's learning? These questions, as well as proposals for intervention and prevention, create the crux of this book designed to inform and motivate readers to respond to one of our country's most fundamental social concerns. Vital reading for everyone who wants to better understand child-school-community interaction, this book especially warrants reading by students, researchers, and other professionals in developmental psychology, family studies, psychology, and social work. "The book should be read by professionals who have contact with schools as part of their brief; by those educators who train the new generation of social workers, psychologists, and teachers; and by researchers who seek to understand the tapestry of social influences on children's development. The book is worth buying alone for the fruits of great scholarship evident in the extensive lists of up-to-date references at the end of each chapter, and in a superb appendix that offers a tour de force of a 19-page bibliography on the topic." - Child and Family Social Work

New Directions in Child Abuse and Neglect Research - National Research Council 2014-03-25

Each year, child protective services receive reports of child abuse and neglect involving six million children, and many more go unreported. The long-term human and fiscal consequences of child abuse and neglect are not relegated to the victims themselves -- they also impact their families, future relationships, and society. In 1993, the National Research Council (NRC) issued the report, *Understanding Child Abuse and Neglect*, which provided an overview of the research on child abuse and neglect. *New Directions in Child Abuse and Neglect Research* updates the 1993 report and provides new recommendations to respond to this public health challenge. According to this report, while there has been great progress in child abuse and neglect research, a coordinated, national research infrastructure with high-level federal support needs to be established and implemented immediately. *New Directions in Child Abuse and Neglect Research* recommends an actionable framework to guide and support future child abuse and neglect research. This report calls for a comprehensive, multidisciplinary approach to child abuse and neglect research that examines factors related to both children and adults across physical, mental, and behavioral health domains--including those in child welfare, economic support, criminal justice, education, and health care systems--and assesses the needs of a variety of subpopulations. It should also clarify the causal pathways related to child abuse and neglect and, more importantly, assess efforts to interrupt these pathways. *New Directions in Child Abuse and Neglect Research* identifies four areas to look to in developing a

coordinated research enterprise: a national strategic plan, a national surveillance system, a new generation of researchers, and changes in the federal and state programmatic and policy response.

Assessing Dangerousness - Jacquelyn C. Campbell 1995
Using a firm research and theoretical approach, this volume brings together experts in the fields of health, mental health, and criminal justice to predict future violence. In language accessible to clinicians, *Assessing Dangerousness* discusses the prediction of homicide in spouse abuse, of child abuse using the Child Abuse Potential Inventory, of further violence by sexual offenders, and of further assault by batterers. The contributors, wellknown in their areas of expertise, discuss accurate measurement using tested instruments as well as the role of clinical observations. The introductory chapter presents the theoretical and clinical issues involved in predicting violence in general, and the final chapter summarizes the major points and presents the health and judicial implications of the findings. "Learning how to predict violence is an important skill. This book is the equivalent of a university course on the subject." --Ron MacIssac, review in *What's Happening*, Victoria, B.C. "This text addresses one of the most difficult issues in the assessment and treatment of violent individuals-- assessing their degree of dangerousness and risk of recidivism. *Assessing Dangerousness* takes the reader through an educated discussion of the different models for assessing dangerousness that have appeared since the 1950s and 1960s up until the present and, most significantly, presents up-to-date approaches to tackling such assessment areas as physical and sexual abuse, sexual assault, and wife assault. Drawing on the research and clinical expertise of prominent individuals, the text accomplishes its task of describing the importance and the limitations to assessing risk of dangerousness. The volume should appeal to professionals in law, criminal justice, psychology, social work, psychiatry, and many related disciplines." --David A. Wolfe, University of Western Ontario "Highly recommended." --Family Violence & Sexual Assault Bulletin Book Club

Recording for the Blind & Dyslexic, ... Catalog of Books - 1996

Team Investigation of Child Sexual Abuse - Donna Pence 1994-09-13

As child sexual abuse investigation and intervention in the United States has evolved over the past decade, it has become clear that no single discipline or agency can meet the needs of abused children and their families. Coordinated investigative teams, involving an alliance between a wide range of professionals - such as criminal justice professionals, social workers, medical practitioners and mental health clinicians - are needed for fact-finding, child protection and criminal prosecution. This practical book focuses on how to design, develop, operate and maintain effective teams. It begins with examinations of how to build teams and the roles and responsibilities of the professionals involved. Investigative interviewing

Child Abuse Trauma - John Briere 1992-09-21

This book describes a treatment approach for adult abuse survivors that considers the overlapping long-term effects of all major forms of child abuse and neglect. It outlines the complex ways in which abuse impacts on later psychosocial functioning, and describes treatment approaches to abuse-related post traumatic stress, interpersonal dysfunction, self-destructive behaviour, impaired self-reference, and borderline personality disorder.

Homicide: The Hidden Victims - Deborah Spungen 1998

Social scientist, victim advocate, and the mother of a murder victim - Deborah Spungen is well acquainted with all facets of what she defines as "the blackest hell accompanied by a pain so intense that even breathing becomes an unendurable labor." In *Homicide: The Hidden Victims*, Spungen illustrates just how and why family members become co-victims when a loved one is murdered, and she poignantly addresses the emotional, physical, spiritual, and psychological effects of such traumatic events. The timely information and innovative modalities discussed in this book make it ideal for mental health and criminal justice professionals, pastoral counselors, social workers, and victim advocates.

Legal Issues in Child Abuse and Neglect Practice - John

E. B. Myers 1998-07-09

This expanded and updated Second Edition of *Legal Issues in Child Abuse and Neglect Practice* offers a state-of-the-art exploration of what role the law can play in bettering the lives of victimized children. While all who work with abused children share the same goals, there often exists a gap in communication between legal and helping professionals that reduces efficacy of cooperative efforts. This new edition continues to provide vital information to non-lawyers on how the legal system in the United States works in child abuse cases.

Assessing Allegations of Sexual Abuse in Preschool Children - Sandra K. Hewitt 1999

'It was a pleasure to read Sandra Hewitt's book because she obviously writes from an in-depth experience of working with young children. Her book also communicates a passionate concern that professionals need to understand and listen properly to children and avoid viewing the stressful area of child protection mainly from an adult perspective' - *Children and Society* Written to help frontline practitioners assess and manage cases with children aged 18 months to six years who present with allegations of child abuse, this book provides concrete and easily understood information about basic child development, interview procedures and case management theory. Extensive experience is integrated with the research literature to provide: an overview of child development information as it applies to interviewing young children; a protocol for assessment of preverbal children that is grounded in theory and research; a format for assessment of children aged three to five; a review of the strengths and weaknesses of some current interview formats; a technique for structured interviewing; and a procedure for structured reunification of a child with an alleged abuser after unproven allegations. Case examples are used throughout the book.

Choice - 1993

Intervention for Men Who Batter - Jeffery L. Edleson 1992

This volume provides practitioners with a concise overview of current theory and intervention for men who batter their female partners. It will help fill a gap for professionals who often have to work without a comprehensive and integrated understanding of how their work enhances that of others - an.

How to Interview Sexual Abuse Victims - Marcia Morgan 1995

The appropriate and sensitive use of anatomical dolls is one of the topics explored in this comprehensive introduction to the process of interviewing child sexual abuse victims. Co-creator of the dolls, Marcia Morgan, takes readers through an interview from beginning to end. She provides guidelines on how to create an environment intended both to minimize a child's trauma and to enhance the amount, quality and validity of information obtained. She examines problems practitioners might encounter with young children and provides material on pre-interview preparation, training exercises and a listing of audio-visual resources.

Child Abuse and Neglect - Narviar Cathcart Barker 1998

Social Work, Marriage, and Ethnicity - Colita Fairfax 2017-10-02

By looking at a variety of racial and ethnic groups in society, *Social Work, Marriage and Ethnicity* examines the conventional knowledge, theories and best practices relating to marriages. Contributors address marriage interventions, female empowerment, parenting, and cohabitation, as well as the variables which impact these situations, such as employment, housing, domestic violence and HIV/AIDS, within appropriate and meaningful cultural contexts. This book will be particularly useful for social workers working in many settings: clinical, community, research, policy implementation, faith-based, and other arenas that are available to couples in need of marital support. Marriage issues need to be addressed by social workers, given its status as a vital element in family strengthening and relationship stability. This book emboldens the case manager, community organizer, or immigration officer to address marital stresses and the demands faced by those couples most impacted by systemic inequality and barriers to cultural interventions. This book was originally published as a special issue of the *Journal of Human Behavior in the Social Environment*.

Trauma-Informed Healthcare Approaches - Megan R. Gerber 2019-04-12

Interpersonal trauma is ubiquitous and its impact on health has long been understood. Recently, however, the critical importance of this issue has been magnified in the public eye. A burgeoning literature has demonstrated the impact of traumatic experiences on mental and physical health, and many potential interventions have been proposed. This volume serves as a detailed, practical guide to trauma-informed care. Chapters provide guidance to both healthcare providers and organizations on strategies for adopting, implementing and sustaining principles of trauma-informed care. The first section maps out the scope of the problem and defines specific types of interpersonal trauma. The authors then turn to discussion of adaptations to care for special populations, including sexual and gender minority persons, immigrants, male survivors and Veterans as these groups often require more nuanced approaches. Caring for trauma-exposed patients can place a strain on clinicians, and approaches for fostering resilience and promoting wellness among staff are presented next. Finally, the book covers concrete trauma-informed clinical strategies in adult and pediatric primary care, and women's health/maternity care settings. Using a case-based approach, the expert authors provide real-world front line examples of the impact trauma-informed clinical approaches have on patients' quality of life, sense of comfort, and trust. Case examples are discussed along with evidence based approaches that demonstrate improved health outcomes. Written by experts in the field, *Trauma-Informed Healthcare Approaches* is the definitive resource for improving quality care for patients who have experienced trauma.

Legal Issues in Child Abuse and Neglect - John E. B. Myers 1992-09-30

Professionals from social work, psychology, nursing, medicine and related disciplines are increasingly being confronted by issues of law in their interaction with abused and neglected children. Serving to familiarize these practitioners with the innumerable legal implications of their day-to-day work, this volume delineates American legal aspects of interviewing children who may be abused or neglected. The author discusses expert testimony, focusing on the question of who is qualified to provide such testimony, what professionals may and may not say as expert witnesses, and explores how to cope with cross-examination in court cases.

Domestic Violence in Hollywood Film - Diane L. Shoos 2017-12-19

This is the first book to critically examine Hollywood films that focus on male partner violence against women. These films include *Gaslight*, *Sleeping with the Enemy*, *What's Love Got to Do with It*, *Dolores Claiborne*, *Enough*, and *Safe Haven*. Shaped by the contexts of postfeminism, domestic abuse post-awareness, and familiar genre conventions, these films engage in ideological "gaslighting" that reaffirms our preconceived ideas about men as abusers, women as victims, and the racial and class politics of domestic violence. While the films purport to condemn abuse and empower abused women, this study proposes that they tacitly reinforce the very attitudes that we believe we no longer tolerate. Shoos argues that films like these limit not only popular understanding but also social and institutional interventions.

Preparing and Presenting Expert Testimony in Child Abuse Litigation - Paul Stern 1997-01-16

The testimony of expert witnesses to inform courtroom decisions is critical if intelligent and just verdicts are to be reached. Few judges, jurors or lay witnesses possess the necessary knowledge to adequately understand the complexities of human behaviour as they relate to acts of interpersonal violence. While lay witnesses can testify to actual incidents or observations, it is the expert witness who can provide forensic significance to such evidence. This volume clearly defines the need for and role of expert witnesses in litigation. The author demystifies the process, and provides practical guidance on preparing and presenting expert testimony. In so doing, he will assist courts to more accurately assess and weigh evidence.

Bibliographic Index - 1997

Psychotherapy with Sexually Abused Boys - William N.

Friedrich 1995-05-02

A groundbreaking therapeutic model to assist practitioners treat sexually abused children effectively is presented in this pragmatic volume. While the model is applicable to both male and female children, the author focuses on boys. In so doing, Friedrich cites pertinent gender and sociocultural issues that are critical to understanding boys, an understanding which is in turn essential for the provision of adequate and effective individual, group and family therapy.

Book Review Digest - 1995

Techniques and Issues in Abuse-Focused Therapy with Children & Adolescents - Sandra Wieland 1998-09-22

This text presents the many challenges for the therapists working with children and adolescents who have suffered abuse. It covers the reluctance of victims to talk about the abuse, helping victims to work through resistance, and more.

Brothers and Sisters in Adoption - Arleta James 2012-02-15

What about the kids already there? How do they do when a child with a challenging past joins a family by adoption? When experienced parents decide to adopt an older child or a sibling group, they jump through all kinds of bureaucratic hoops - background checks, interviews, group meetings, reading assignments, classes, etc. But most often the typically developing children these adults are already parenting (whether through birth or adoption) are left out of the process, informed that a new kid is coming, and simply expected to "adjust" to the addition of another sibling. The addition of a child with a history of neglect or trauma cannot be a seamless transition. The expectations of everyone involved - parents, new siblings, and, yes, professionals facilitating the adoption - must be realistic, taking into account that the new child will need special attention that may take away time and attention from the already resident kids, that family life is likely to be turned topsy turvy until appropriate counseling and support are in place, that relationships will change. Therapist Arleta James is certainly not the first person to recognize this, but she is the first to do something about it. *Brothers and Sisters in Adoption* offers insights and examples and sturdy, practical, proven tools for helping newly configured families prepare, accept, react, and mobilize to become a new and different family meeting the practical, physical and emotional needs of all its members. These well prepared and supported families are the ones who thrive!

Family Violence in the United States - Denise A. Hines 2012-12-04

"Thought-provoking and insightful, this book encourages readers to question assumptions, evaluate information, formulate hypotheses, and design solutions to problems of family violence in the United States. Using an ecological framework, the authors engage readers in an informative discussion on the most well recognized forms of maltreatment in families, as well as on less understood and more controversial forms, such as maltreatment of male partners, of parents, and within LGBT relationships. Rich in useful scholarly references and practical case materials, the book also reviews and evaluates major efforts at intervention and prevention."

Groupwork with Children of Battered Women - Einat Peled 1995

With the belief that intervention should be available to all members of families experiencing domestic violence, the authors of this book provide practitioners with the necessary knowledge base to operate successfully a group programme for children of battered women. The programme, aimed at children aged from four to 12 years, provides a framework for healing and education. Peled and Davis guide readers through an initial child assessment, with sample intake forms provided in an appendix. They then describe both group sessions for the children that take

place over a 10-week period and concurrently run parenting skills groups. The authors go on to detail a family session which marks the conclusion of the programme.

Preparing Children for Court - Lynn M. Copen 2000-07-18
Preparing Children for Court and its accompanying workbooks will aid social workers, court educators, victim/witness specialists, law enforcement, therapists, and attorneys help children enter the justice system, understand the necessary elements of court rules and structure, and feel confident enough to testify truthfully. *Finding Your Way* This brief-easy-to-understand book explains what happens when a child discloses abuse and how various systems may respond to this disclosure, from investigation through prosecution or juvenile court involvement to therapy. *Getting Ready for Court: Criminal Court Edition* A fun, friendly first step in helping prepare primary-aged children to testify in criminal cases involving abuse. *Getting Ready for Court: Civil Court Edition* This child-friendly book is a first step in helping prepare primary aged children to testify in civil cases involving abuse.

Working with Children, Families and Young People - Jim Dobson 2020-07-20

Bridging the gap between learning and the application of knowledge and skills in Early Years settings, this book addresses the nuanced complexities and challenges which students may face as they progress into professional practice. Built around the experiences of undergraduate students, solution-focussed chapters tackle contemporary issues such as safeguarding, new materialism, reflective practice, and working with refugee children, linking these to theoretical and philosophical models and drawing on undergraduate and practitioner insights. Providing contextualised examples, insight into key issues, and application of theory to practice, this book offers incisive solutions to support the undergraduate journey into a career, with chapters covering topics such as: Best practice as a practitioner creating a caring environment Reflecting on practice to cultivate professional development Working with and for marginalised children Reflective practice Working with Children, Families and Young People is perfect for undergraduate students on Early Years and Childhood Studies courses, as well as other courses pertaining to working with children and young families, social work, and young communities.

Psychological Assessment of Sexually Abused Children and Their Families - William N Friedrich 2002

Designed for professionals in the field of child maltreatment, this authoritative book presents a compelling theoretical framework that guide's assessment of children and adolescents who have been sexually abused and their parents. The book is designed to make it easier for clinicians to select a number of measures or procedures across three dimensions that have considerable clinical relevance - attachment, dysregulations, and self-perception. *Psychological Assessment of Sexually Abused Children and Their Families* features in particular the assessment of sexually aggressive children and an extensive set of interview formats, checklists, and other forms that clinicians will find especially useful in evaluating children and their families. The book is also richly illustrated with case studies.

National Library of Medicine Current Catalog - National Library of Medicine (U.S.) 1993

Cognitive Processing Therapy for Rape Victims - Patricia A. Resick 1993-06-02

Sexual assault is a traumatic event from which many survivors never fully recover. They may develop a range of disorders, including post-traumatic stress disorder, depression, poor self-esteem, interpersonal difficulties and sexual dysfunction. This volume provides insight into the effects of rape and explores a treatment approach that assists in the healing process.
