Short-term Empires in World History -

Robert Rollinger 2020-06-04

The volume will focus on a comparative level on a specific group of states that are commonly labelled as “empires” and that we encounter through all historical periods. Although they are very successful at the very beginning, like most empires are, this success is very ephemeral and transient. The era of conquest is never followed by a period of consolidation. Collapse and/or reduction to much smaller dimension run as fast as the process of wide-ranging conquest and expansion. The volume singles out a series of such “short-term empires” and aims to provide a methodologically clearly structured as well as a uniform and consistent approach by developing a general set of questions that guarantee the possibility to compare and distinguish. This way it intends to examine not only already well established empires but also to illuminate forgotten ones.

Urban Living Labs - Simon Marvin

2018-05-03

All cities face a pressing challenge – how can they provide economic prosperity and social cohesion while achieving environmental sustainability? In response, new collaborations are emerging in the form of urban living labs – sites devised to design, test and learn from social and technical innovation in real time. The aim of this volume is to examine, inform and advance the governance of sustainability transitions through urban living labs.

Notably, urban living labs are proliferating rapidly across the globe as a means through which public and private actors are testing innovations in buildings, transport and energy systems. Yet despite the experimentation taking place on the ground, we lack systematic learning and international comparison across urban and national contexts about their impacts and effectiveness. We have limited knowledge on how good practice can be scaled up to achieve the transformative change required. This book brings together leading international researchers within a systematic comparative framework for evaluating the design, practices and processes of urban living labs to enable the comparative analysis of their potential and limits. It provides new insights into the governance of urban sustainability and how to improve the design and implementation of urban living labs in order to realise their potential.

The Right in Latin America - Barry Cannon
2016-04-14

Most current analysis on Latin American politics has been directed at examining the shift to the left in the region. Very little attention, however, has been paid to the reactions of the right to this phenomenon. What kind of discursive, policy, and strategic responses have emerged among the right in Latin America as a result of this historic turn to the left? Have there been any shifts in attitudes to inequality and poverty as a result of the successes of the left in those areas? How has the right responded strategically to regain the political initiative from the left? And what implications might such responses have for democracy in the region? *The Right in Latin America* seeks to provide answers to these questions while helping to fill a gap in the literature on contemporary Latin American politics. Unlike previous studies, Barry Cannon's book does not simply concentrate on party political responses to the contemporary challenges for the right in the region. Rather he uses a wider, more comprehensive theoretical framework, grounded in political sociology, in recognition of the deep social roots of the right among Latin America's elites, in a region known for its startling inequalities. Using Michael Mann's pioneering work on power, he shows how elite dominance in the key areas of the economy, ideology, the

military, and in transnational relations, has had a profound influence on the political strategies of the Latin American right. He shows how left governments, especially the more radical ones, have threatened elite power in these areas, influencing right-wing strategic responses as a result. These responses, he persuasively argues, can vary from elections, through street protests and media campaigns, to military coups, depending on the level of perceived threat felt by elites from the left. In this way, Cannon uncovers the dialectical nature of the left/right relationship in contemporary Latin American politics, while simultaneously providing pointers as to how the left can respond to the challenge of the right's resurgence in the current context of left retrenchment. Cannon's multi-faceted inter-disciplinary approach, including original research among right-leaning actors in the region makes the book an essential reference not only for those interested in the contemporary Latin American right but for anyone interested in the region's politics at a critical juncture in its history.

The End of Privacy - Reg Whitaker
2010-10

Now in paperback, a sobering look at the threats to privacy posed by the new information technologies. Called "one of the best books yet written on the new information age" by Kirkus Reviews and now available in paperback, *The End of Privacy* shows how vast amounts of personal information are moving into corporate hands. Once there, this data can be combined and used to develop electronic profiles of individuals and groups that are potentially far more detailed, and far more intrusive, than the files built up in the past by state police and security agencies. Reg Whitaker shows that private e-mail can be read; employers can monitor workers' every move throughout the work day; and the U.S. Treasury can track every detail of personal and business finances. He goes on to demonstrate that we are even more vulnerable as consumers. From the familiar - bar-coding, credit and debit cards, online

purchases - to the seemingly sci - "smart cards" that encode medical and criminal records, and security scans that read DNA - *The End of Privacy* reveals how ordinary citizens are losing control of the information about them that is available to anyone who can pay for it.

Santiago de Guatemala, 1541-1773 - Christopher H. Lutz 1994

Santiago de Guatemala was the colonial capital and most important urban center of Spanish Central America from its establishment in 1541 until the earthquakes of 1773. Christopher H. Lutz traces the demographic and social history of the city during this period, focusing on the rise of groups of mixed descent. During these two centuries the city evolved from a segmented society of Indians, Spaniards, and African slaves to an increasingly mixed population as the formerly all-Indian barrios became home to a large intermediate group of ladinos. The history of the evolution of a multiethnic society in Santiago also sheds light on the present-day struggle of Guatemalan ladinos and Indians and the problems that continue to divide the country today.

The Old Law of Bizkaia (1452) - Gregorio Monreal Zia 2005

In 1452, Bizkaians assembled at the Oak of Gernika and approved the *Fuero Viejo de Bizkaia* (the Old Law of Bizkaia) one of Europe's most important yet little known medieval legal codes. Its laws encompassed an extraordinary range of individual and collective liberties, anticipating the 18th-century Declarations of Rights contained in the constitutions of the U.S. and France. It was extraordinarily modern in both spirit and letter and attracted the attention and admiration of John Adams and William Wordsworth. Its influence survives to the present day, underpinning Bizkaian and Basque claims to their own political identity within the Spanish state. Distributed for the Center for Basque Studies.

In Hock - Wendy A. Woloson 2009-12-16
The definitive history of pawnbroking in the United States from the nation's founding through the Great Depression, *In Hock* demonstrates that the pawnshop was essential to the rise of capitalism. The class of working poor created by this economic tide could make ends meet only, Wendy Woloson argues, by regularly pawning household objects to supplement inadequate wages. Nonetheless, businessmen, reformers, and cultural critics claimed that pawnshops promoted vice, and employed anti-Semitic stereotypes to cast their proprietors as greedy and cold-hearted. Using personal correspondence, business records, and other rich archival sources to uncover the truth behind the rhetoric, Woloson brings to life a diverse cast of characters and shows that pawnbrokers were in fact shrewd businessmen, often from humble origins, who possessed sophisticated knowledge of a wide range of goods in various resale markets. A much-needed new look at a misunderstood institution, *In Hock* is both a first-rate academic study of a largely ignored facet of the capitalist economy and a resonant portrait of the economic struggles of generations of Americans.

Cultures and Globalization - Helmut K Anheier 2007-03-27

"In the age of globalization we are no longer home alone. Migration brings other worlds into our own just as the global reach of the media transmits our world into the hearts and minds of others. Often incommensurate values are crammed together in the same public square.

Increasingly we all today live in the kind of 'edge cultures' we used to see only on the frontiers of civilizations in places like Hong Kong or Istanbul. The resulting frictions and fusions are shaping the soul of the coming world order. I can think of no other project with the ambitious scope of defining this emergent reality than The Cultures and Globalization project. I can think of no more capable minds than Raj Isar and Helmut Anheier who can pull it off." - Nathan Gardels, Editor-in-Chief, NPQ, Global Services, Los Angeles Times
Syndicate/Tribune Media "This series represents an innovative approach to the central issues of globalization, that phenomenon of such undefined contours." - Lupwishi Mbuyumba, Director of the Observatory of Cultural Policies in Africa
The world's cultures and their forms of creation, presentation, and preservation are deeply affected by globalization in ways that are inadequately documented and understood. The Cultures and Globalization Series is designed to fill this void in our knowledge. Analyzing the relationship between globalization and cultures is the aim of the Series. In each volume, leading experts as well as young scholars will track cultural trends connected to globalization throughout the world, covering issues ranging from the role of cultural difference in politics and governance to the evolution of the cultural economy and the changing patterns of creativity and artistic expression. Each volume will also include an innovative presentation of newly developed 'indicator suites' on cultures and globalization that will be presented in a user-friendly form with a high graphics content to facilitate accessibility and understanding Like so many phenomena linked to globalization, conflicts over and within the cultural realms crystallize great anxieties and illusions, through misplaced assumptions, inadequate concepts, unwarranted simplifications and instrumental readings. The aim here is to marshal evidence from different disciplines and perspectives about the culture, conflict and globalization relationships in

conceptually sensitive ways.

Experiential Landscape - Kevin Thwaites
2006-12-05

Invention of Tradition and Syncretism in Contemporary Religions - Stefania Palmisano
2017-09-28

This book explores manifestations of creativity in the religious domain. Specifically, the contributions focus on the nexus of the sacred and the creative, and the mechanisms of syncretism and (re)invention of tradition by which this manifestations occur. The text is divided into two sections. In the first, empirical cases of spirituality characterized by syncretistic processes are highlighted; in the second, examples which can be traced

back to forms of the (re)invention of tradition are examined. The authors document possible forms of adaptations and religious enculturation. In the second, the authors demonstrate that spiritual traditions, whether ancient or historically fictitious, are suitable for reframing in the context of critical interpretative frameworks related to cultural expectations which challenge them and call their continuity into question.

Across Anthropology - Margareta von Oswald 2020-06-15

How can we rethink anthropology beyond itself? In this book, twenty-one artists, anthropologists, and curators grapple with how anthropology has been formulated, thought, and practised 'elsewhere' and 'otherwise'. They do so by unfolding ethnographic case studies from Belgium, France, Germany, Italy, the Netherlands, and Poland - and through conversations that expand these geographies and genealogies of contemporary exhibition-making. This collection considers where and how anthropology is troubled, mobilised, and rendered meaningful. Across Anthropology charts new ground by analysing the convergences of museums, curatorial practice, and Europe's reckoning with its colonial legacies. Situated amid resurgent debates on nationalism and identity politics, this book addresses scholars and practitioners in fields spanning the arts, social sciences, humanities, and curatorial studies. Freedom, Imprisonment, and Slavery in the Pre-Modern World - Albrecht Classen 2021-04-19

Contrary to common assumptions, medieval and early modern writers and poets often addressed the high value of freedom, whether we think of such fable authors as Marie de France or Ulrich Bonerius. Similarly, medieval history knows of numerous struggles by various peoples to maintain their own freedom or political independence. Nevertheless, as this study illustrates, throughout the pre-modern period, the loss of freedom could happen quite easily, affecting high and low (including kings and princes) and there are many literary texts and historical documents that address the problems of imprisonment and even enslavement (Georgius of Hungary, Johann Schiltberger, Hans Ulrich Krafft, etc.). Simultaneously, philosophers and theologians discussed intensively the fundamental question regarding free will (e.g., Augustine) and political freedom (e.g., John of Salisbury). Moreover, quite a large number of major pre-modern poets spent a long time in prison where they composed some of their major works (Boethius, Marco Polo, Charles d'Orléans, Thomas Malory, etc.). This book brings to light a vast range of relevant sources that confirm the existence of this fundamental and impactful discourse on freedom, imprisonment, and enslavement.

Achtung-Panzer! - Heinz Guderian 1995

This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it

pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Nationalism, Politics and the Practice of Archaeology - ed KOHL 1995

Archaeology has often been put to political use, particularly by nationalists. The case studies in this timely collection range from the propaganda purposes served by archaeology in the Nazi state, through the complex interplay of official dogma and academic prehistory in the former Soviet Union, to lesser-known instances of ideological archaeology in other European countries, in China, Japan, Korea and the Near East. The introductory and concluding chapters draw out some of the common threads in these experiences, and argue that archaeologists need to be more sophisticated about the use and abuse of their studies. The editors have brought together a distinguished international group of scholars. Whilst archaeologists will find that this book raises cogent questions about their own work, these problems also go beyond archaeology to implicate history and anthropology more generally.

Revolution, democratic transition and disillusionment - Anca Pusca 2018-04-30

This book develops a fresh and challenging perspective on the transition from communism to capitalism. Drawing on a wide and diverse range of material and

texts, it argues that transition and democratisation studies should turn their attention towards processes of illusion formation and disillusionment as key to understanding the shift from one ideological framework to another. The author provides alternative approaches to otherwise classical sites of examination of social change - such as revolutions and the emergence of civil society - and proposes a number of new possible sites by analysing the politics of self-reflection, the element of shock inherent in any transition and the role of visual narratives in negotiating change. The chapters are inspired by unique interviews and discussions with the leaders of the Timisoara Revolution, the Group of Social Dialogue - the first civil society organisation in post-communist Romania, the leading author of the 'Presidential Report Analysing the Communist Dictatorship in Romania' and an innovative group of photographers tracing the Romanian transition through images.

Mediterranean Oak Woodland Working Landscapes - Pablo Campos 2013-06-18

The oak tree was a boon companion as humans expanded their presence across much of the globe. While oak woodlands (*Quercus* spp.) come today in stunningly diverse forms, the stately dehesas of Spain and the dramatic oak-dominated ranchlands of California are working landscapes where cultivation and manipulation for a couple of millennia have shaped Mediterranean-type ecosystems into a profoundly modified yet productive environment that is sought-after by every manner of species. The grazing of wildlife and livestock in oak woodlands yields a remarkable plant and animal biodiversity, creating a mosaic of habitats and visually pleasing savannas. Added products unique to Spain such as Iberian pigs and cork, and in California multiple landowner benefits, include valued ecosystem services that allow owners, visitors, and conservation supporters to experience the benefits of woodland life. With its 15 chapters a decade in the making, this handsomely illustrated book covers key topics in oak woodland policy,

ecology, and management in Spain and California, presenting new research results and reviewing an existing expert literature.
