Comparative Deviance - Graeme R.
Newman 2017-07-12

"Comparative Deviance" represents a systematic attempt to survey public

perceptions of deviant behavior cross-culturally: in India, Indonesia, Iran, Italy, Yugoslavia and the United States. There is extensive diversity in both law and perception concerning such deviances as taking drugs, homosexuality, and abortion, yet there is evidence for a

basically invariant structure in perception of deviance across all cultures. Within the countries studied in this volume, Geraeme Newman discovers that the strength of religious belief and urban rural background accounted for major differences in the perception of deviance - when differences were identified. Contrary to popular academic opinion in the United States, Newman finds that those countries with the most liberal laws on deviance (i.e., the least punitive sanctions) are also those highly economically developed and least totalitarian (United States and Italy). But when public opinion is considered, the public favors harsher punishments than the law provides. In contrast, in the developing countries of India, Iran and Indonesia, where penal sanctions are more severe, public opinion is much more liberal. The crucial question is the role criminal law plays in the process of

modernization: whether law is a stable cultural influence, round which public opinion wavers in a startling fashion, depending on the stage of modernization. These findings challenge many assumptions of conflict theory in sociology, of cultural relativism in anthropology, and of ethical relativism in moral philosophy. All findings are examined in relation to research on modernization, social development, and the evolution of law. These fundamental issues are thus important to many different disciplines across the board.

Health Service Marketing Management in Africa - Robert Hinson 2019-12-16
Health Service Marketing Management in Africa (978-0-429-40085-8,

K402492) Shelving Guide: Business & Management / Marketing Management The application of marketing to healthcare is a fascinating field that will likely have more impact on society than any other field of marketing. It's been theorized that an intrinsically unstable environment characterizes this very relevant emerging field, hence raising new questions. Changing regulations, discoveries, and new health treatments continuously appear and give rise to such questions. Advancements in technology not only improve healthcare delivery systems but also provide avenues for customers to seek information regarding their health conditions and influence their participatory behaviors or changing roles in the service delivery. Increasingly, there is a shift from a doctor-led approach to a more patient-centered approach. In Africa, the importance of marketing-driven practices in

improving the delivery of healthcare services cannot be overemphasized. The issue of healthcare delivery and management is significant for policymakers, private sector players, and consumers of health-related services in developing economy contexts. Scholars have strongly argued in favor of marketing and value creation in healthcare service delivery in Africa. Each country in Africa has its own issues. For example, long waiting times, unavailable medications, and unfriendly staff are just a sampling of issues affecting the acceptability of healthcare services. These examples highlight the need to utilize marketing and value creation tools in the delivery of healthcare services. Furthermore, there is a need for the integration of service marketing and management principles to enhance the delivery of quality healthcare across Africa and other developing economies which is the

critical focus of this book. This book responds to calls for quality healthcare service management practices or processes from developing economy perspectives. Focusing primarily on African and other developing economy contexts, this book covers seven thematic areas: strategy in healthcare; marketing imperatives in healthcare management; product and pricing management in healthcare; distribution and marketing communications in healthcare; managing people in healthcare; physical evidence and service quality management in healthcare; and process management in healthcare.

State and Society in India - Anand Kumar 1989

State, Nationalism, and Islamization

- Raja M. Ali Saleem 2017-07-11

This book argues that Islam's role in state nationalism is the best predictor of the Islamization of

government using two most different cases: Turkey, which was an aggressively secular country until recently, and Pakistan, a country that is synonymous with Islamization. It establishes a causal link between Islam's role in state nationalism and Islamization of government during various periods of the history of both countries. The indicators used to establish the causal link between Islam's role in state nationalism and Islamization are the presence of Islamic provisions in the constitution, Islam-inspired national symbols, Islamic images on the national currency, Islamic basis of family law, a Department of Religious Affairs, and governmental support for religious education. The book concludes by identifying three causal mechanisms—legitimacy, mobilization, and authenticity—that link Islam's role in state nationalism and the Islamization of government.

Services Marketing - C. Bhattacharya
2009

While most books on marketing and services are readable, very few take the student's viewpoint and set out to answer the question Is it understandable? in the affirmative. This book and its pedagogy has been designed precisely with this in mind: v Design: The book has a consistency of design that is innovative, with aesthetic appeals. v Opening and Closing Cases: Every chapter begins and ends with a case. The cases introduce the primary theme and issues discussed in the chapter and closes with analytical tasks for the students. The cases are original, pertaining to Indian situations, companies and protagonists, helping the Indian students to connect. v Objectives: Every chapter has clear learning expectations, get a glimpse of the chapter context and their respective importance. v End-of-chapter Questions: The questions are many and have been designed carefully to enhance learning for the students.

There are elements of research, project work, and academic exercises in them.v Illustrations: The book is generous with pleasing and informative charts, tables and diagrams.v Glossary: The Appendix at the end of the book contains a glossary of services and marketing terminologies. v Marketing models: In addition to the text, the appendix also contains major marketing models mentioned in the text, which are frequently used by the marketers.v How to do cases: The Appendix also contains an useful section for all students a template for case discussion and analysis. There are four parts in the book. Part I takes an overview look at the major differences between services and goods and their characteristics, classifications and different models. It methodically analyses the section on the local, domestic and international conditions and environment factors that have

affected services. It also examines the importance of Relationship Marketing in services. Part II examines in-depth the marketing of services. It looks sweepingly and with depth at marketing planning and strategy, service buying behaviour, knowledge management and marketing research in services, and the seven marketing mix variables for services. Part III is about the assessment of service delivery and customer relationship management. Part IV deals exclusively with comprehensive service cases. The cases are in addition to the opening and closing cases. Free Learning - Ross Parker
2021-11-30

This edited volume explores, investigates and analyses Free Learning - an innovative approach to student-directed learning which seeks to challenge educational norms from within. The volume is framed by a recognition of the urgent need for transformation of our educational systems. In traditional education, students work through a teacher-directed linear syllabus, at a pace dictated by the teacher, with summative assessment hurdles at too-frequent intervals. Progression and direction are determined solely by the teacher. In Free Learning, students determine their own learning pathway through a non-linear

syllabus, which can be visualised as a mind map. Students may then complete as many units as they either have time for, or are interested in, moving from one unit to another on the basis of having formatively satisfied the demands of each individual unit. This volume showcases the value and potential of Free Learning in contemporary practice, and is intended to bridge theory and practice. The structure of the book reflects this complementary fit, with contributions from practitioners describing Free Learning as a learning and teaching tool in a range of educational settings, subjects and age-ranges. It also contains qualitative and quantitative analyses by researchers exploring the uptake of Free Learning and students' responses to the methodology. Researchers and educators who are interested in student-directed methodologies, especially in Asia, will find that

the practical accounts and analyses of Free Learning contained within, provide much food for thought with regard to redefining student learning.

Women Welfare and Empowerment in India - Rameshwari Pandya 2008

In India, policies and programs at different levels of the government cover various dimensions and strategies in gender development. Over the years, efforts have been made to empower women socially, economically, and politically. However, due to a lack of synergy and coordination, the achievements are not satisfactory. It is imperative that an integrated policy and strategy be formulated to address the economic, social, and political issues related to women, along with the requisite programs and schemes. Though India has created protective legislations for women, the enactments have not been easy to implement. The vastness of the country, the scattered nature of women workers, their lack of education and legal literacy, and the

indifferent attitude of government bureaucracy have all contributed to the continuing vulnerability of women. This is true not only for unorganized rural women, but also for urban women workers. Although the constitutional commitments to women find reflections in the planning processes, legislation, policies, and programs of the central and state governments, the current socio-economic status of women is unsatisfactory in terms of almost all important indicators of human development. Women, Welfare and Empowerment in India contains research papers by social scientists and academics from different parts of India, focusing on specific gender-related issues. The collection provides valuable information for researchers, non-governmental organizations, and government agencies and functionaries. It contains 42 contributions related to women issues, categorized into the

following six themed parts: Health, Nutrition, and Fertility of Women • Education and Training of Women • Employment of Women • Self-help Groups and Empowerment of Women • Problems of Rural Women • Women, Media, Politics, and Human Rights.
