Arrival Cities - Burcu Dogramaci 2020-09-01

Exile and migration played a critical role in the diffusion and development of modernism around the globe, yet have long remained largely

understudied phenomena within art historiography. Focusing on the intersections of exile, artistic practice and urban space, this volume brings together contributions by international researchers committed to revising the historiography of modern art. It pays particular attention to metropolitan areas that were settled by migrant artists in the first half of the 20th century. These arrival cities developed into hubs of artistic activities and transcultural contact zones where ideas circulated, collaborations emerged, and concepts developed. Taking six major cities as a starting point – Bombay (now Mumbai), Buenos Aires, Istanbul, London, New York, and Shanghai –the authors explore how urban topographies and landscapes were modified by exiled artists re-establishing their practices in metropolises across the world. Questioning the established canon of Western modernism, *Arrival Cities* investigates how the migration of artists to different urban spaces impacted their work and the historiography of art. In doing so, it aims to encourage the

discussion between international scholars from different research fields, such as exile studies, art history, social history, architectural history, architecture, and urban studies.

We Believe in the Holy Spirit - Cheryl M. Peterson 2021-07-02

The concept of "identity" today is contested against the backdrop of myriad forms of social, political, economic and ecological exclusion. How is identity expressed in a global Lutheran tradition whose members share common biblical, liturgical, confessional, theological and spiritual foundations yet represent diverse cultures and traditions? At the end of 2019, The Lutheran World Federation (LWF) hosted a global consultation on contemporary Lutheran identities, in Addis Ababa, Ethiopia. The result was the papers presented in this publication. The authors—church leaders, youth, theologians, lay and ordained practitioners in local communities—explore the Spirit's work to revive and equip the faithful for vocation through the ministry of the church today and into the future of the Lutheran communion. [Wir glauben an den Heiligen Geist. Globale Perspektiven lutherischer Identität] Ende 2019 veranstaltete der Lutherische Weltbund (LWB) eine globale Konsultation zu zeitgenössischen lutherischen Identitäten. Die Konsultation in Addis Abeba, Äthiopien, zielte darauf ab herauszufinden, wie die gemeinsamen Noten lutherischer Identität in der reichen Harmonie gelebter, kontextbezogener Identitäten in der gesamten lutherischen Gemeinschaft wiedergegeben werden können. Der LWB engagierte Theologen seiner Mitgliedskirchen, um das Wirken des Heiligen Geistes unter dem Thema "Wir glauben an den Heiligen Geist. Globale Perspektiven lutherischer Identität" zu reflektieren. Dieser Band ist eine Zusammenstellung von Aufsätzen, die bei der Konsultation vorgestellt wurden. Er wird Kirchen, theologischen Institutionen, Pastoren und Laienmitgliedern in der gesamten LWB-Gemeinschaft empfohlen, die die trinitarischen Grundlagen der lutherischen Tradition und die Taufberufung zur Teilnahme an Gottes Mission erforschen möchten.

The Copy Theory of Movement - Norbert Corver 2007-06-27

This volume brings together papers which address issues regarding the copy theory of movement. According to this theory, a trace is a copy of the moved element that is deleted in the phonological component but is available for interpretation at L(ogical) F(orm). Thus far, the bulk of the research on the copy theory has mainly focused on interpretation issues at LF. The consequences of the copy theory for syntactic computation per se and for the syntax-phonology mapping, in particular, have received much less attention in the literature, despite its crucial relevance for the whole architecture of the model. As a contribution to fill this gap, this volume congregates recent work that deals with empirical and conceptual consequences of the copy theory of movement for the inner working of syntactic computations within the Minimalist Program, with special emphasis on the syntax-phonology mapping.

Pluricentricity - Augusto Soares da Silva 2013-11-27

The "one-nation-one-language" assumption is as unrealistic as the well-known Chomskyan ideal of a homogeneous speech community. Linguistic pluricentricity is a common and widespread phenomenon; it can be understood as either differing national standards or differing local norms. The nine studies collected in this volume explore the sociocultural, conceptual and structural dimensions of variation and change within pluricentric languages, with specific emphasis on the relationship between national varieties. They include research undertaken in both the Cognitive Linguistic and sociolinguistic tradition, with particular emphasis upon the emerging framework of Cognitive Sociolinguistics. Six languages, all more or less pluricentric, are analyzed: four Germanic languages (English, German, Dutch and Swedish) and two Romance languages (Portuguese and French). The volume describes patterns of phonetic, lexical and morphosyntactic variation, and perception and attitudes in relation to these pluricentric languages. It makes use of advanced empirical methods able to account for the complex interplay between conceptual and social aspects of pluricentric variation and other forms of language-internal variation.

Landscape's Revenge - Caio Yurgel 2018-11-05

Landscape, as it appears and is described throughout the works of Bernardo Carvalho and Robert Walser, provides an excellent—yet virtually unexplored—pathway to the authors' literary projects. The landscape functions here as a synthetic and unifying figure that triggers, at first, through the analysis of its description per se, the main and most evident elements of the authors' works. However, when sustained as a methodological figure beyond the scope of its own description, the

landscape soon reveals a darker, far more fascinating and far less explored side of the authors' oeuvres: a vengeful, seemingly defeatist resentment against the status quo, which gives way to the more latent and biting elements of the authors' prose, such as irony, the *unheimlich*, an anti-heroic agenda, the apocalyptic aesthetics of a disaster-prone fictional world, as well as an understanding of history and literature through the figures of failure and marginality. By drawing from diverse critical traditions from Latin-America and Europe, this comparative text seeks to unravel, in all of its complexity and scope, the fictional stage upon which Walser's and Carvalho's characters narrate, with their dying breath, a world that is slowly undoing itself.

Cangoma Calling - Pedro Meira Monteiro 2012

The Color of Modernity - Barbara Weinstein 2015-02-04

In *The Color of Modernity*, Barbara Weinstein focuses on race, gender, and regionalism in the formation of national identities in Brazil; this focus allows her to explore how uneven patterns of economic development are consolidated and understood. Organized around two principal episodes—the 1932 Constitutionalist Revolution and 1954's IV Centenário, the quadricentennial of São Paulo's founding—this book shows how both elites and popular sectors in São Paulo embraced a regional identity that emphasized their European origins and aptitude for modernity and progress, attributes that became—and remain—associated with “whiteness.” This racialized regionalism naturalized and reproduced regional inequalities, as São Paulo became synonymous with prosperity while Brazil's Northeast, a region plagued by drought and poverty, came to represent backwardness and São Paulo's racial “Other.” This view of regional difference, Weinstein argues, led to development policies that exacerbated these inequalities and impeded democratization.

[The Dialectics of Citizenship](#) - Bernd Reiter 2013-05-01

What does it mean to be a citizen? What impact does an active

democracy have on its citizenry and why does it fail or succeed in fulfilling its promises? Most modern democracies seem unable to deliver the goods that citizens expect; many politicians seem to have given up on representing the wants and needs of those who elected them and are keener on representing themselves and their financial backers. What will it take to bring democracy back to its original promise of rule by the people? Bernd Reiter's timely analysis reaches back to ancient Greece and the Roman Republic in search of answers. It examines the European medieval city republics, revolutionary France, and contemporary Brazil, Portugal, and Colombia. Through an innovative exploration of country cases, this study demonstrates that those who stand to lose something from true democracy tend to oppose it, making the genealogy of citizenship concurrent with that of exclusion. More often than not, exclusion leads to racialization, stigmatizing the excluded to justify their non-membership. Each case allows for different insights into the process of how citizenship is upheld and challenged. Together, the cases reveal how exclusive rights are constituted by contrasting members to non-members who in that very process become racialized others. The book provides an opportunity to understand the dynamics that weaken democracy so that they can be successfully addressed and overcome in the future.

Technology of the Oppressed - David Nemer 2022-02-15

How Brazilian favela residents engage with and appropriate technologies, both to fight the oppression in their lives and to represent themselves in the world. Brazilian favelas are impoverished settlements usually located on hillsides or the outskirts of a city. In *Technology of the Oppressed*, David Nemer draws on extensive ethnographic fieldwork to provide a rich account of how favela residents engage with technology in community technology centers and in their everyday lives. Their stories reveal the structural violence of the information age. But they also show how those oppressed by technology don't just reject it, but consciously resist and appropriate it, and how their experiences with digital technologies enable them to navigate both digital and nondigital sources of oppression—and even, at times, to flourish. Nemer uses a decolonial and intersectional framework called Mundane Technology as an analytical tool to understand how digital technologies can simultaneously be sites of oppression and tools in the fight for freedom. Building on the work of the Brazilian educator and philosopher Paulo Freire, he shows how the favela residents appropriate everyday technologies—technological artifacts (cell phones, Facebook), operations (repair), and spaces (Telecenters and Lan Houses)—and use them to alleviate the oppression in their everyday lives. He also addresses the relationship of misinformation to radicalization and the rise of the new far right. Contrary to the simplistic techno-optimistic belief that technology will save the poor, even with access to technology these marginalized people face numerous sources of oppression, including technological biases, racism, classism, sexism, and censorship. Yet the spirit, love, community, resilience, and resistance of favela residents make possible their pursuit of freedom.
